

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. This wave re-fields questions on awareness of and familiarity with vaccines for children under 5, likelihood to vaccinate for parents of children 6 months – 4 years old, preference for children's vaccine type, and parents' trusted information sources. New or modified questions include time off for vaccines/boosters, children's vaccine uptake, parents' perceptions and concerns, children's vaccine locations, and updated booster preferences.
