#### Expense Assumption Description Example

\*\*\*The following example does not reflect the above opportunity and is provided for the purpose of clarification only.\*\*\*

*Direct expenses are expected to surpass historical direct expenses, as fuel and insurance prices increase. Studies by the Department of Commerce indicate that fuel prices will to rise at a rate of 10% annually over the next ten years, as opposed to the historical ten year rate of 4% annually. Additionally, insurance costs, according to a nationwide insurance broker survey, are expected to rise at 15% annually for the next 10 years, as opposed to the 10 year historical rate of 2% annually. Accordingly, direct expenses associated with the operation are forecast to increase from an annual average of 10% of Gross Revenue to an annual average of 20% of Gross Revenues over the life of the Draft Contract.*
