SUPPLEMENTARY INFORMATION: The National Commission on Fire Prevention and Control conducted a comprehensive study of the Nation's fire problem and recommended to Congress actions to mitigate the fire problem, reduce loss of life and property, and educate the public on fire protection and prevention. As a result of the study, Congress enacted Public Law 93-498, Federal Fire Prevention and Control Act of 1974, which establishes the U.S. Fire Administration (USFA) to administer fire prevention and control programs, supplement existing programs of research, training, and education, and encourage new and improved programs and activities by state and local governments. Section 9(a) of the Act authorizes the USFA Administrator to operate directly or through contracts or grants an integrated, comprehensive method to select, analyze, publish, and disseminate information related to prevention, occurrence, control, and results of fires of all types. The National Fire Incident Reporting Systems (NFIRS) was established in the mid-1970s and is mandated by the Federal Fire Prevention and Control Act of 1974 which authorizes the National Fire Data Center to gather and analyze information such as: (1) the frequency, causes, spread, and extinguishment of fires; (2) injuries and deaths resulting from fires; (3) information on injuries sustained by a firefighter; and (4) information on firefighting activities. The act further authorizes USFA to develop uniform data reporting methods, and to encourage and assist Federal, state, local and other agencies in developing and reporting

information. NFIRS is a reporting standard that fire departments use to uniformly report on the full range of their activities, from fire to emergency medical services to severe weather and natural disasters. This reporting allows fire departments, as well as many other government and non-government agencies, to quantify their actions and identify incident and response trends. Recent modernization to the data collection improved and therefore reduced the burden hours for reporting data to NFIRS. FEMA is requesting a revision of this information collection.

This proposed information collection previously published in the **Federal Register** on December 9, 2022, at 87 FR 75642 with a 60-day public comment period. No comments were received. The purpose of this notice is to notify the public that FEMA will submit the information collection abstracted below to the Office of Management and Budget for review and clearance.

SUPPLEMENTARY INFORMATION: Section 404 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5170c, authorizes the Hazard Mitigation Grant Program (HMGP).
