

safety regulations for “covered small passenger vessels,” defined as small passenger vessels with overnight accommodations for passengers or operating on an oceans or coastwise route, excluding fishing vessels and ferries. Topics in the new policy include means of escape, special consideration by the Officer in Charge, Marine Inspection, and excursion permits.

In particular, the interim rule eliminated the option for “existing vessels” (as defined in 46 CFR subchapters K and T) to comply with the means of escape requirements applicable to them on March 10, 1996, bringing all covered small passenger vessels, regardless of age, up to current standards for means of escape design and arrangement. CG–CVC developed Policy Letter 23–03 in response to numerous inquiries requesting clarification on the correct application of the interim rule to the wide variety of small passenger vessel arrangements.

A copy of CG–CVC Policy Letter 23–03 issued on October 26, 2023 is available in the docket where indicated in the **ADDRESSES** section of this document and on CG–CVC’s website, at <https://www.dco.uscg.mil/Our-Organization/Assistant-Commandant-for-Prevention-Policy-CG-5P/Inspections-Compliance-CG-5PC-/Commercial-Vessel-Compliance/CG-CVC-Policy-Letters/>.

This notice is issued under authority of 5 U.S.C. 552(a) and 46 U.S.C. 3306(n).

Captain, U.S. Coast Guard, Chief, Commercial Vessel Compliance.

SUPPLEMENTARY INFORMATION:

Telecommunications Service Priority (TSP) is authorized by E.O. 12472, E.O. 13618 and 47 CFR part 64. The Emergency Communications Division (ECD) of the Department of Homeland Security (DHS) Cybersecurity and Infrastructure Security Agency (CISA), uses the TSP Program to authorize national security and emergency preparedness organizations to receive priority treatment for vital voice and data circuits or other telecommunications service, under National Security or Emergency Preparedness telecommunications (NS/EP). The TSP Program provides service vendors a Federal Communications Commission (FCC) mandate to prioritize requests by identifying those services critical to national security and emergency preparedness. A TSP assignment ensures that it will receive priority attention by the service vendor before any non-TSP service.

Four broad categories serve as guidelines for determining whether a circuit or telecommunications service is eligible for priority provisioning or restoration. TSP service user organizations may be in the Federal, State, local, or tribal government, critical infrastructure sectors in industry, non-profit organizations that perform critical NS/EP functions, or foreign governments. Typical TSP service users are responsible for the command-and-control functions critical to management of and response to NS/EP situations, particularly during the first 24 to 72 hours following an event.

Information to request a priority, to obtain a sponsor for requesting a priority, and for other administrative requirements of the program is required from any person or organization having an NS/EP service for which they wish priority restoration from the vendor providing the service. Information is also required to allow immediate installation of a new service to support NS/EP requirements. Information is required from vendors to allow the ECD to track and identify the telecommunications services that are being provided priority treatment.

The forms used are the SF314 (Revalidation for Service Users), SF315 (TSP Request for Service Users), SF317 (TSP Action Appeal for Service Users), SF318 (TSP Service Confirmation for Service Vendors), and the SF319 (TSP Service Reconciliation for Service Vendors).

The SF314 is for users to request that their existing TSP codes be revalidated for three more years.

The SF315 is used to request restoration and/or provisioning for an organization’s critical circuits.

The SF317 is for organizations to appeal the denial of TSP restoration and/or provisioning.

The SF318 is for service vendors to provide circuit ID information associated with TSP codes they’ve been given by their customers.

The SF319 is for service vendors to provide data to the program office in order to reconcile their TSP data with the TSP database.

Participants request TSP priorities via email in order to reduce the use of the paper forms. The paper forms will also be available for download via the CISA website.

There have been no changes to the information being collected. The annual government cost has increased due to increased wage rates/compensation factors and IT system security requirements.

This is a reinstatement of an approved information collection that was

approved on 7/31/2020. The initial 60-Day Notice and request for comments was published on 4/10/2023. No comments were received.
