https://aemcorp.qualtrics.com/jfe/form/SV_3xhrzdbamUSMpPE

The National Center for Education Statistics (NCES), in the U.S. Department of Education's Institute for Education Sciences, is authorized to conduct the SLDS survey by the Education Sciences Reform Act of 2002 (ESRA 2002, 20 U.S.C. §9543).

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this voluntary information collection is 1850-0933. The time required to complete this information collection is estimated to average 2 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate, suggestions for improving this collection, or any comments or concerns regarding the status of your individual submission of this form, please write to: Statewide Longitudinal Data Systems (SLDS), National Center for Education Statistics, 550 12th St., SW, 4th floor, Washington, DC 20202.

The National Center for Education Statistics (NCES) conducts this biennial data collection effort because statewide longitudinal data systems (SLDS) capacity can change quickly as a result of infrastructure enhancements, evolving P20W agency collaborations, state legislation impacts, and other factors. Your responses to this survey will inform the field, SLDS Grant Program's ongoing evaluation and technical assistance efforts, and they may guide the goals for future grant rounds. Thank you for completing this survey accurately.

Instructions:

Please answer the following questions about the current status of data elements and capabilities in your SLDS for 2023. Do not answer based on the status of elements or capabilities in systems that are not linked to your SLDS.

Most questions ask you to identify the status of an SLDS feature with the following options:

- **Not Planned.** Your state or territory is not currently planning to include this element or capability in its SLDS. You should also choose "Not Planned" for items that do not apply to your SLDS at this time due to legislative prohibitions, lack of interest, or other factors.
- **Planned.** Your state or territory intends to include this element or capability in its SLDS and has a documented plan and funding source to implement it, but implementation work has not begun.
- **In Progress.** Your state or territory is building or implementing this element or capability as part of its SLDS, but it is not yet fully operational.

- **In Progress.** Your state or territory is building or implementing this element or capability as part of its SLDS, but it is not yet fully operational.
- **Operational.** This element or capability is fully functional and available for its intended users.

Many of the questions ask about linking different types of data together. For the purpose of this survey, data are considered "linked" when the SLDS has an established technology solution to identify and join data records for the same individual from multiple source data systems in a replicable and useful way. Additional terms used in the survey are defined at the end of document. Defined terms are underlined throughout the survey and definitions may also be accessed by hovering over underlined terms.

If your state has or is building more than one SLDS—for example, a K-12 SLDS and a P-20W+ SLDS—please answer the questions based on the status of the element or capability in both systems. A P-20W+ system encompasses information across multiple sectors, such as K-12, early childhood, K-12 education, postsecondary education, and workforce data. You may need to consult other state agency or department representatives to complete questions about data linking and use in those sectors.

We have prepopulated the majority of your 2023 survey with the responses your state or territory provided in 2022. Please carefully review your survey to ensure that the options selected best reflect your SLDS at the time you complete this survey.

Some items have not been pre-populated:

1. "Other" response options
2. Text entry boxes
3. Items that were not answered in 2022

Please be sure to answer every question in the survey.

This survey tool will automatically save your responses on each completed page. If you navigate away from the survey, simply use the provided link to return to your saved responses. **Incomplete pages will not be saved.** You must complete each item on a survey page and move to the next page in order for your responses to be saved.

Please submit your survey AFTER all items have been completed. If you submit the survey prior to completion, you will be unable to make further changes and will need to fill out the survey again.

If you have any questions on this survey, please feel free to contact your State Support Team member for help completing the survey.

Data Use and Research Capacity

End of Survey

Definitions

Adult Education

A program providing basic education and literacy services to individuals over the age of 16 who are not currently enrolled in school and lack a high school diploma or the basic skills to function effectively in the workplace and in their daily lives.

Advanced Placement (AP)

A curriculum sponsored by the College Board that offers standardized college-level courses and aligned summative assessments to high school students

Automated system

A technological solution that requires minimal manual configuration to complete. Any system that links data in a standard, repeatable process should be considered for this response. Ad hoc data linking should not be considered for this response.

Benchmark or interim assessment

An assessment administered throughout the school year that a) evaluates student knowledge and skills relative to a specific set of academic goals, usually within a limited period of time, and b) is designed to give educators immediate, formative feedback on how students are performing and inform decisions at the classroom and school or district level.

Centralized data model

A data model in which all participating source systems periodically copy their data to a single, centrally located data repository where they are organized, integrated, and stored using a common data standard. Users can query the system to access the data that they have been authorized to view and use.

Common Education Data Standards (CEDS)

A national collaborative effort to develop voluntary, common data standards for a key set of education data elements to streamline the exchange, comparison, and understanding of data within and across P-20W+ institutions and sectors.

Data governance

The overall management of SLDS data, including its availability, usability, integrity, quality, and security.

Data integration

The process of integrating data into an SLDS or other general education data system that provides state education agencies with more complete data and helps them improve the accuracy of federal reporting, increase the quality of and access to data within and across data systems, and make better informed policy decisions.

Demographics

Characteristics of individual students, including date of birth, gender, race/ethnicity, and disability status.

Diploma/certificate

The credential earned by a completer or graduate, including high school diploma, special education diploma, modified diploma, certificate of attendance, or GED.

Discipline

Information about student infractions of rules, including type of incident, type of disciplinary action, and duration of disciplinary action.

Early Intervention, IDEA Part C

The Program for Infants and Toddlers with Disabilities (Part C of IDEA) is a federal grant program that assists states in operating a comprehensive statewide program of early intervention services for infants and toddlers with disabilities, ages birth through age 2 years, and their families.

EDFacts

A U.S. Department of Education initiative to centralize performance data supplied by K-12 state education agencies with other data assets, such as financial grant information, within the department to enable better analysis and use in policy development, planning, and management.

Federated data model

A data model in which individual source systems maintain control over their own data but agree to share some or all of this information with other participating systems upon request. System users submit queries via a shared intermediary interface that then searches the independent source systems. Data are queried from source systems, and records are matched to fulfill a data requestor's information needs. The linked data are not stored by the system, but rather are removed once cached and delivered.

Generate

A software application that improves data quality and automates reporting for state education agencies through standardization.

Hybrid data model

A data model that combines features of the centralized and federated models. For example, hybrid models may establish and maintain data linkages through common identifiers such as Social Security number, name, date of birth, and student identifier, while data such as enrollment, attainment, and assessment information to be shared with researchers or other data recipients are kept separate.

Individuals with Disabilities Education Act (IDEA)

Federal legislation that makes available a free, appropriate public education to eligible children with disabilities and ensures special education and related services to those children. Infants and toddlers, birth through age 2, with disabilities and their families receive early intervention services under IDEA Part C. Children and youth ages 3 through 21 receive special education and related services under IDEA Part B.

Integrated Data Store

The CEDS Integrated Data Store (IDS) includes the complete set of CEDS elements, entities, and attributes with standard technical syntax and third-normal-form database normalization. The IDS model provides a standard framework for integrating P-20W+ data systems through a well-normalized operational data store. It can be used for transactional education data systems, to perform near real-time reporting, and as a standard staging area to load the CEDS Data Warehouse.

Integrated Postsecondary Education Data System (IPEDS)

A system of interrelated surveys conducted annually by the U.S. Department of Education's National Center for Education Statistics (NCES).

**Interoperability**

The ability for different systems to communicate, exchange data, and use information that has been exchanged.

Kindergarten entry assessment

An assessment used to determine children's skills and abilities at the time they enter kindergarten. The assessment informs instruction and services in the early elementary grades.

Link

An established technology solution that allows for data to be brought together in a replicable and useful way.

Match process

The protocol or series of steps used to analyze all the information relating to individuals and/or entities from multiple sources of data to determine whether the same individual or entity exists in more than one database. The process may use Social Security numbers (SSN), as an example.

National Student Clearinghouse (NSC)

A national repository of postsecondary enrollment data.

Occupation code

Occupational identifiers within the Standard Occupational Classification (SOC) system used by federal statistical agencies.

Perkins Career and Technical Education (CTE)

The Carl D. Perkins Career and Technical Education Act of 2006 (Perkins CTE) provides federal support for CTE programs in all 50 states, the District of Columbia, and the territories. The law focuses on the academic and technical achievement of CTE students, strengthening the connections between secondary and postsecondary education, and improving accountability.

**Pre-kindergarten (Pre-K)**

An early childhood education program serving students before kindergarten.

Program/major

The program or major that a student completed when they earned a degree.

Recognized postsecondary credential

A credential consisting of an industry-recognized certificate or certification, a certificate of completion of an apprenticeship, a license recognized by the state or by the federal government, or an associate or baccalaureate degree.

Remediation

Instructional courses designed for students deficient in the general competencies necessary for a regular postsecondary curriculum and educational setting.

Research agenda

A research plan that focuses on issues and ideas that are of greatest current interest or need. A research agenda is shaped around challenges of practice, policy, and implementation; helps orient internal staff and stakeholders toward short- and long-term goals; guides priority areas, research project selection, and reporting needs; and changes over time as interests, priorities, and needs shift, and as knowledge grows and as new research questions emerge.

School Courses for the Exchange of Data (SCED)

A voluntary, common classification system for prior-to-secondary and secondary school courses. It can be used to compare course information, maintain longitudinal data about student coursework, and efficiently exchange coursetaking records.

SCED is based on a 5-digit course code that provides a basic structure for classifying course content. Additional SCED elements and attributes provide descriptive information about each course.

Special Education, IDEA Part B (Section 619)

Specially designed instruction provided to preschool children ages 3-5 with disabilities as defined in IDEA.

Student records exchange (SRE or SREx)

A system and process for exchanging electronic versions of students' academic records among education agencies to facilitate the registration, course placement, and provision of services when students transfer.

Summative or end-of-course assessment

An assessment given at the end of a unit of time (such as a semester or school year) to evaluate students' performance

Trade Adjustment Assistance

A federal entitlement program that assists U.S. workers who have lost or may lose their jobs as a result of foreign trade. This program seeks to provide adversely affected workers with opportunities to obtain the skills, credentials, resources, and support necessary to become reemployed.

Unemployment Compensation (UC)

A program that provides benefits for eligible unemployed former employees.

Unemployment Insurance (UI)

A program that provides unemployment benefits to eligible workers who become unemployed through no fault of their own, and meet certain other eligibility requirements.

Wagner-Peyser

The Wagner-Peyser Act of 1933 established a nationwide system of public employment offices known as the Employment Service. The system provides universal access to an integrated array of labor exchange services so that workers, job seekers and businesses can find the services that they need in one stop and frequently under one roof in easy-to-find locations.

Workforce Innovation and Opportunity Act (WIOA)

The Workforce Innovation and Opportunity Act was signed into law on July 22, 2014. WIOA is designed to help job seekers access employment, education, training, and support services to succeed in the labor market and to match employers with the skilled workers that they need to compete in the global economy. WIOA supersedes the Workforce Investment Act of 1998 and amends the Adult Education and Family Literacy Act, the Wagner-Peyser Act, and the Rehabilitation Act of 1973.
