Goals/Purpose

The purpose of this NOFO will provide funding to: build state and local public health capacity & expertise in environmental health surveillance; create modern, interoperable, and real-time public health data and surveillance systems; modernize the collection, integration, dissemination, & application of timely, local environmental health data; and empower public health practitioners, healthcare providers, community members, policy members, and others to make information-driven decisions that affect their health.

Objective

Integrate health, exposure, and hazard information and data, Build and maintain an IT infrastructure--including web-based portals that follow Tracking metadata, data and functional standards--that allows for controlled access to and exchange of data with CDC's Tracking Program, Conduct analyses using tracking data and expertise to address environmental health issues.

Does this project include interventions, services, or policy change work aimed at improving the health of groups who have been excluded or marginalized and/or decreasing disparities?

Yes

Project does not incorporate elements of health equity science

Not selected

Measuring Disparities
