

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. This wave refields questions on parents' concerns, CDC COVID-19 Community Levels, and COVID treatment for children under 12. New or modified questions include those on concerns about vaccine side effects, reasons for waiting to get a booster, and awareness of the Novavax vaccine.
