

CET W101 (fields June 16-18):

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. This wave re-fields questions on updated vaccine access, vaccine uptake, COVID susceptibility and risk, health care provider communication, social norms, and updated vaccine perceptions. Questions added that were not present in the previous wave include those on children's vaccines, and COVID risk and testing. Also new are the messages to test.

- **Children's vaccines (Q13, refield with minor edits):** Asking about awareness of the availability of updated vaccines for children 6 months and older.
- **COVID risk and testing (Q14-15, refield):** Rotating in these regular questions to wrap up our tracking.
