Abstract: BSEE will use the information required by 30 CFR 282 to determine if lessees are complying with the regulations that implement the mining operations program for minerals other than oil, gas, and sulphur. Specifically, BSEE will use the information:

- To ensure that operations for the production of minerals other than oil, gas, and sulphur in the OCS are conducted in a manner that will result in orderly resource recovery, development, and the protection of the human, marine, and coastal environments.

- To ensure that adequate measures will be taken during operations to prevent waste, conserve the natural resources of the OCS, and to protect the environment, human life, and correlative rights.

- To determine if suspensions of activities are in the national interest, to facilitate proper development of a lease including reasonable time to develop a mine and construct its supporting facilities, and to allow for the construction or negotiation for use of transportation facilities.

- To identify and evaluate the cause(s) of a hazard(s) generating a suspension, the potential damage from a

hazard(s) and the measures available to mitigate the potential for damage.

- For technical evaluations that provide a basis for BSEE to make informed decisions to approve, disapprove, or require modification of the proposed activities..
