SUPPLEMENTARY INFORMATION: This document provides notice that the BLM New Mexico State Director intends to prepare a RMP amendment with an associated EA for the Río Grande del Norte National Monument, announces the beginning of the scoping process, and seeks public input on issues and planning criteria. The RMP amendment would change the existing Taos RMP.

The planning area is located in Taos and Rio Arriba counties, New Mexico,

and encompasses approximately 247,852 acres of public land.

Purpose and Need

Need: The need for the RMP amendment was established by the Presidential Proclamation that designated the Monument. The Proclamation states, "For purposes of protecting and restoring the objects. . . the Secretary, through the BLM, would prepare and maintain a management plan. . . ." An RMP amendment is necessary—as mandated by the Proclamation—for providing the management guidance critical for ensuring the Monument objects are preserved.

FLPMA, which established public land policy, also requires the BLM to "develop, maintain, and, when appropriate, revise land use plans" for the management of public lands. Furthermore, it is BLM policy that each Monument has an independent decision document that specifies the management guidance for that Monument.

In addition to these mandates, an amendment to the Taos RMP is necessary to address the new information that has been accrued and the changed circumstances the Monument has experienced since its designation in 2013. New surveys of seeps and springs, cultural resources, sagebrush distribution, sensitive species, wildlife corridors, among other resources, have been conducted in recent years that add to the BLM's catalogue of the best-available information. This new information will enable the BLM to reevaluate and adjust its current management of the Monument under an amended Taos RMP. Changed circumstances include increased demand for recreational opportunities and increased pressure on recreation facilities and infrastructure within the Monument. The public is seeking a wider array of trail use opportunities, particularly around the communities of Taos and Questa, and increased pressure on existing trails and recreational facilities has been especially evident since the onset of the COVID-19 pandemic. Trailhead parking is regularly at or exceeds capacity throughout much of the Monument. New types of recreation, such as e-bikes, also need to be addressed.

Opportunities for new rights-of-way for electrical transmission in support of renewable energy development is an evolving circumstance that may require new authorizations consistent with the parameters specified in the Proclamation. Changed circumstances regarding climatic conditions also
