Key

Do you want to

Required, to

Are there any

How to focus on seemingly points of failures in flow (abandoning page, straight from usage advice)?

Do we want to focus on new or returning customers (average yearly metric of returning visitors required for reference)? What impacts the returning customer metrics?

What is the desired volume of digital feedback? What constitutes a significant response sample size?

What defines sufficient usage for customers visiting the website (average metric required for reference)? How to ensure customers are not overly interrupted?

What defines

What defines
Digital specific
