Each student is counted individually, no full-time equivalency.

Report only for LEAs and schools with graduate levels. Each student is counted individually, no full-time equivalency.

Each student is counted individually, no full-time equivalency.

Used only when there is a hierarchy relationship among LEAs

Previously known as the FIPS state code

SEAs are 01.

An example of a shared times school is a regional career and technical education center that enrolls (or serves) students from high schools on a part-time basis.

While a school may be reconstituted for purposes of SIG or ESEA accountability provisions, for purposes of CCD, the school may be recognized as a new school and thus does not receive a new NCES ID. This data group provides a record that an existing school has undergone a school restructuring or transformation when it closes and reopens but does not meet the CCD criteria for being a new school. This indicator is used in the school year that the school implements the restructuring or transformation change.

Virtual education is instruction during which students and teachers are separated by time and/or location and interact via internet computers or other electronic devices.

An example of a shared times school is a regional career and technical education center that enrolls (or serves) students from multiple high schools on a part-time basis.

While a school may be reconstituted for purposes of SIG or ESEA accountability provisions, for purposes of CCD, the school is not recognized as a new school and thus does not receive a new NCES ID. This data group provides a record that an existing school has undergone a school restructuring or transformation when it closes and reopens but does not meet the CCD criteria for being a new school. This indicator is used in the school year that the school implements the restructuring or transformation change.

Virtual education is instruction during which students and teachers are separated by time and/or location and interact via computers or other electronic devices.
