<b>Other change**</b>	<p>EDFacts is a U.S. Department of Education (ED) initiative, conducted by the National Center for Education Statistics (NCES), to collect, analyze, report on, and promote the use of high-quality, pre-kindergarten through grade 12 (pre-K–12) performance data for use in education planning, policymaking, and management and budget decision making to improve outcomes for students. By centralizing data provided by state education agencies about state level data, local education agencies, and schools, NCES uses the EDFacts data to report on students, schools, staff, services, and education outcomes at the state, district, and school levels. The centralized approach provides ED users with the ability to efficiently analyze and report on submitted data and has reduced the reporting burden for state and local data producers through the use of streamlined data collection, analysis, and reporting tools. EDFacts collects information on behalf of ED grant and program offices for approximately 150 data groups for all 50 states, Washington DC, Puerto Rico, and seven outlying areas and freely associated states (American Samoa, Federated States of Micronesia, Guam, Marshall Islands, Commonwealth of the Northern Mariana Islands, Republic of Palau, and the U.S. Virgin Islands), the Department of Defense Education Activity (DoDEA), and the Bureau of Indian Education (BIE). The request to conduct the 2022-23, 2023-24, and 2024-25 EDFacts Data Collection was approved in June 2022, with a change request approved in July of that year (1850-0925 v.8-9). This request includes three types of changes to the data collection project: (1) retiring an unneeded file and subtotal; (2) requesting technical corrections; and (3) updating metadata collections. More detailed descriptions of these changes are included in the attached change memo. This change does not change respondent burden or cost to the federal government.</p>
