

NAHMS Sheep 2024 Study

You've been selected to participate!

Only a select number of producers across the United States have been selected to participate in the NAHMS Sheep 2024 Study. You are one of these producers!

This is the second phase of the NAHMS Sheep 2023 study, and is different than the survey completed in February. This study is only done once every 10 years and focuses on sheep management and health.

We received your contact information when you completed phase I of the study, but we have been unable to reach you. Please respond, so your voice can be heard! If you wish to participate in the study, please call xxx-xxx-xxxx

NAHMS Sheep 2024 Study

You've been selected to participate!

Your information will be used to help develop new treatments, controls, and prevention mechanisms for sheep diseases. The results will also guide future research and education. You will not only represent yourself, but also other producers who were not selected for the study.

If you agree to participate and have 20 or more ewes, you will be eligible to receive **free** testing for gastrointestinal parasites, lameness pathogens, and enteric microbes.

Value = \$3,200
