# Environmental Health Perspectives

Dear Colleagues,

Help *EHP*'s news content meet your needs by telling us about the science news you enjoy, no matter the source. Your answers to [this survey](#), which should take **2-3 minutes**, will help us gauge whether new offerings or other changes will support our goal of publishing news that engages and educates a broad audience.

Currently, *EHP* News includes Focus articles (feature length pieces that explore current topics in a multidisciplinary fashion) and Science Selections (short explainers about published *EHP* research findings).

Thank you for sharing your thoughts! We encourage you to share [the survey](#) with any colleagues who may be interested.

All the best,

*EHP* Editors
