How to Use This Workbook

The National Human Trafficking Hotline (NHTH) prime recipient is responsible for compiling performance indicator data into detailed monthly, fiscal year, and ad hoc reports as directed by OTIP to monitor the prime recipient's progress toward accomplishing the objectives and requirements of the project and improving funded activities. In addition, the prime recipient must submit ad hoc reports detailing notable data trends regarding human trafficking and the efforts of the NHTH.

The NHTH grantee is expected to submit client program entry, delivery barriers and monitoring, client case closure, training, technical assistance, and partnership development data to OTIP on a quarterly basis and client service use and costs of services data on an annual basis. The name of each quarterly submission tab will start with a 'Q.' The name of each annual submission tab will start with 'FY.'

Over the course of the reporting period, the NHTH grantee aggregate and submit performance indicator data to OTIP via this Excel-based data collection workbook and through GrantSolutions.gov to fulfill post-award performance reporting requirements.

Several of the OMB-approved data elements have a predetermined list of values. Unfortunately, in order to adhere to HHS' Policy for Software Development Secure Coding Practices, we are unable to add macros that would allow for multi-select data validation. This means that, for some data elements/columns, you will need to type the relevant information.

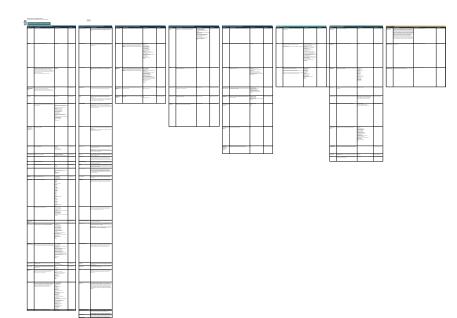

The grey cells above each of the data elements describe the format of the data that should be entered into the column and a pop-up comment box in the cell provides the field value options. The yellow example row of data also has a drop down box that contains all field options. See screenshots below. If you are adding more than one value to these "multi-select" open text cells, please separate the values with a comma delimiter. For example, under the Services Requested/Needed column, you might type out, "Basic Necessities, Child Care". You can find term definitions on the 'Definitions' tab and operational guidance, including response options for each data element in the workbook on the 'Operational Guidance' tab.
