"SECTION 1. SHORT TITLE.

"This Act may be cited as the 'Crime Victims With Disabilities Awareness Act'.

"SEC. 2. FINDINGS; PURPOSES.

"(a) Findings.-Congress finds that-

"(1) although research conducted abroad demonstrates that individuals with developmental disabilities are at a 4 to 10 times higher risk of becoming crime victims than those without disabilities, there have been no significant studies on this subject conducted in the United States;

"(2) in fact, the National Crime Victim's Survey, conducted annually by the Bureau of Justice Statistics of the Department of Justice, does not specifically collect data relating to crimes against individuals with developmental disabilities;

"(3) studies in Canada, Australia, and Great Britain consistently show that victims with developmental disabilities suffer repeated victimization because so few of the crimes against them are reported, and even when they are, there is sometimes a reluctance by police, prosecutors, and judges to rely on the testimony of a disabled individual, making individuals with developmental disabilities a target for criminal predators;

"(4) research in the United States needs to be done to-

"(A) understand the nature and extent of crimes against individuals with developmental disabilities;

"(B) describe the manner in which the justice system responds to crimes against individuals with developmental disabilities; and

"(C) identify programs, policies, or laws that hold promises for making the justice system more responsive to crimes against individuals with developmental disabilities; and

"(5) the National Academy of Science Committee on Law and Justice of the National Research Council is a premier research institution with unique experience in developing seminal, multidisciplinary studies to establish a strong research base from which to make public policy.

"(b) Purposes.-The purposes of this Act are-

"(1) to increase public awareness of the plight of victims of crime who are individuals with developmental disabilities;

"(2) to collect data to measure the extent of the problem of crimes against individuals with developmental disabilities; and

"(3) to develop a basis to find new strategies to address the safety and justice needs of victims of crime who are individuals with developmental disabilities.

"SEC. 3. DEFINITION OF DEVELOPMENTAL DISABILITY.

"In this Act, the term 'developmental disability' has the meaning given the term in section 102 of the Developmental Disabilities Assistance and Bill of Rights Act of 2000 [42 U.S.C. 15002].

"SEC. 4. STUDY.

"(a) In General.-The Attorney General shall conduct a study to increase knowledge and information about crimes against individuals with developmental disabilities that will be useful in developing new strategies to reduce the incidence of crimes against those individuals.

"(b) Issues Addressed.-The study conducted under this section shall address such issues as-

"(1) the nature and extent of crimes against individuals with developmental disabilities;

"(2) the risk factors associated with victimization of individuals with developmental disabilities;

"(3) the manner in which the justice system responds to crimes against individuals with developmental disabilities; and

"(4) the means by which States may establish and maintain a centralized computer database on the incidence of crimes against individuals with disabilities within a State.

"(c) National Academy of Sciences.-In carrying out this section, the Attorney General shall consider contracting with the Committee on Law and Justice of the National Research Council of the National Academy of Sciences to provide research for the study conducted under this section.

"(d) Report.-Not later than 18 months after the date of enactment of this Act [Oct. 27, 1998], the Attorney General shall submit to the Committees on the Judiciary of the Senate and the House of Representatives a report describing the results of the study conducted under this section.

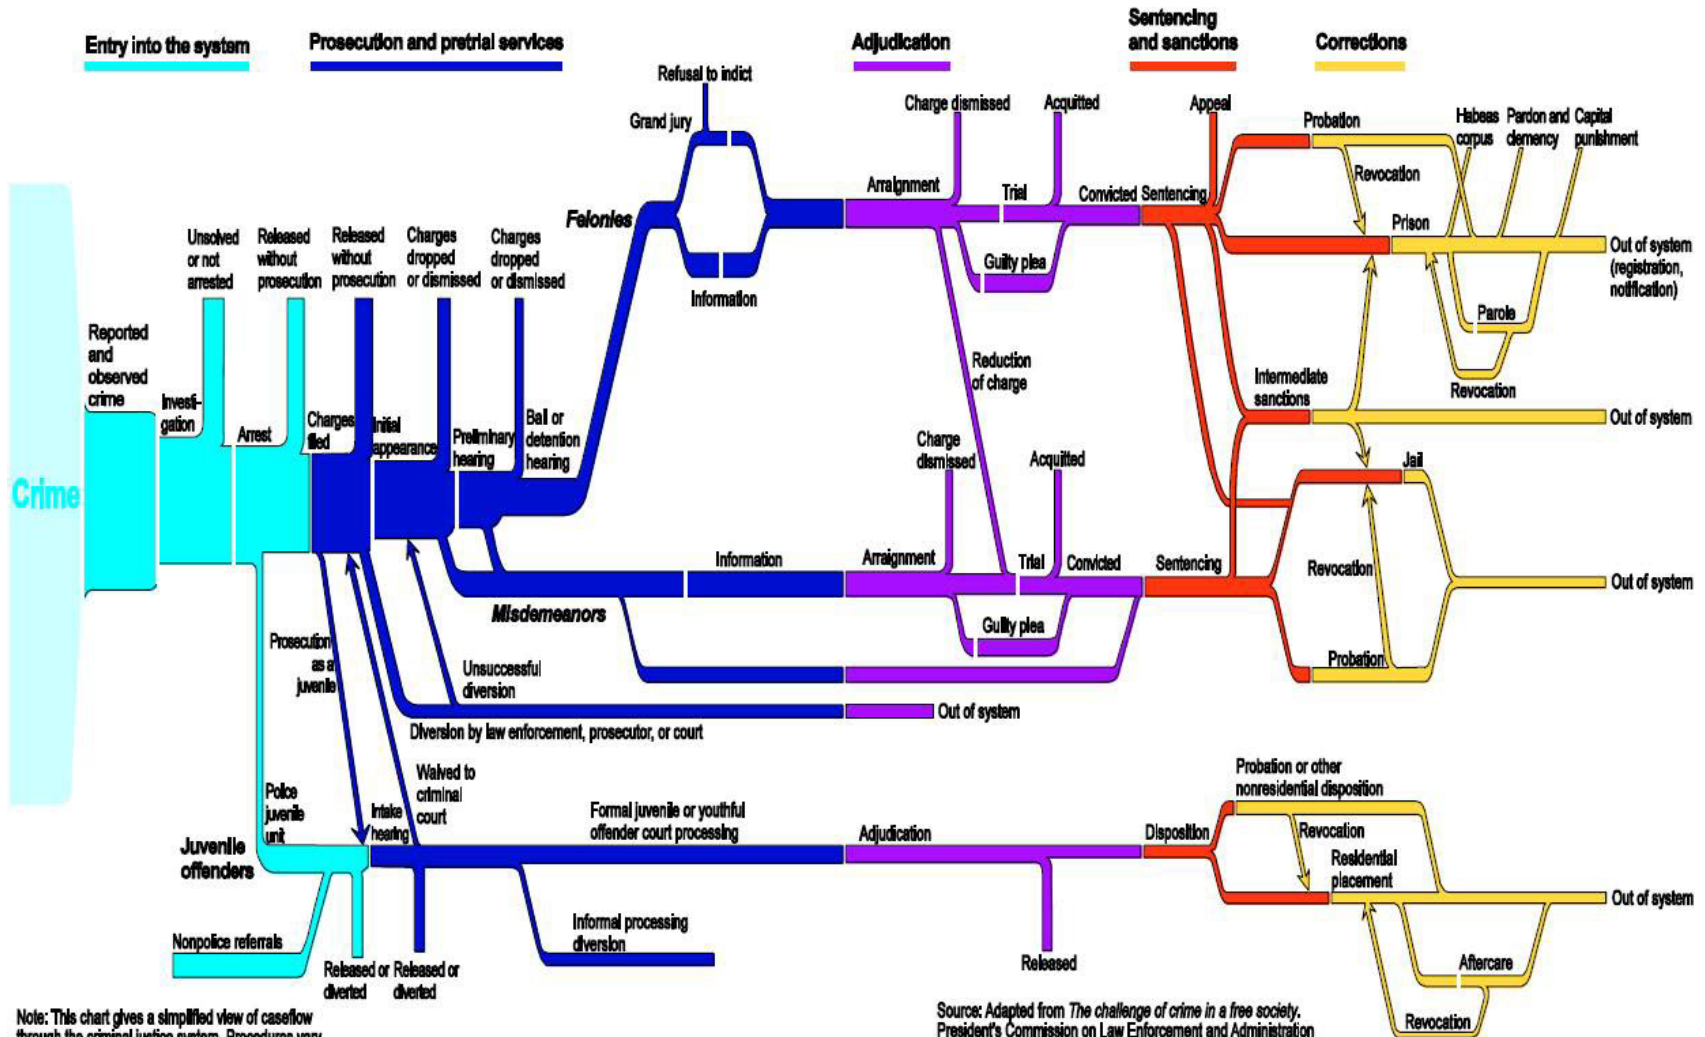

"SEC. 5. NATIONAL CRIME VICTIM'S SURVEY.

"Not later than 2 years after the date of enactment of this Act, as part of each National Crime Victim's Survey, the Attorney General shall include statistics relating to-

- "(1) the nature of crimes against individuals with developmental disabilities; and

Visualizations

Each visualization is presented as a bar graph, with a data table below. Missing data are not shown in the graphs. The graphs are interactive, allowing you to focus on the variables of interest.

Hovering over a variable in the bar graph will present data labels and counts for that year.

Hovering over the legend will highlight the variable of interest (as shown in the example for "Males")

Clicking on a variable in the legend turns it "off and on." By default, all variables are "on." In the example below, the user "off," thereby removing the data from the visualization.

Abstract: These establishment surveys provide BJS with the capacity to report annually on changes in the size and composition of the community corrections populations in the United States. The surveys also track key outcomes of offenders on probation or parole, such as completion of supervision terms and return to incarceration (or recidivism). Data are collected from the known universe of probation and parole supervising agencies, using central reporters wherever possible to minimize burden the public. The ASPP provides the only national level, regularly collected, data on the community corrections

populations, and, as such, they inform this key stage of the criminal justice process. Revisions include an updated frame of probation agencies including additional misdemeanor only supervising agencies, as well changes to the probation survey forms (CJ-8 and CJ-8M) to collect information separately for felony and misdemeanor probation.

Overview of this information collection:

1. *Type of Information Collection:* Revision of a previously approved collection.
2. *The Title of the Form/Collection:* Annual Surveys of Probation and Parole.
3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* The Annual Surveys of Probation and Parole (ASPP) contain three forms: CJ-7: Annual Parole Survey CJ-8: Annual Probation Survey and CJ-8M: Annual Probation Survey (Misdemeanant Supervision Only). The applicable component within the Department of Justice is the Bureau of Justice Statistics (BJS), in the Office of Justice Programs.
4. *Affected public who will be asked or required to respond as well as the obligation:* The affected public is

Federal Government. The obligation to respond is voluntary.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The ASPP will collect data from approximately 860 supervising agencies. The ASPP will collect data from approximately 860 supervising agencies. For each data collection cycle, we estimate an average burden of 96 minutes for the survey form CJ-7, 150 minutes for the updated survey form CJ-8, and 20 minutes for the updated survey form CJ-M. If needed, respondents to the CJ-7 and CJ-8 will be contacted by email or telephone to verify data quality issues. We estimate that data quality follow-up is needed for 70% of the CJ-7 and CJ-8 respondents (213) in each cycle and will run an average of 15 minutes for each respondent. We estimate a 10-minute follow-up for half (304) of the CJ-8M respondents.

6. *An estimate of the total public burden (in hours) associated with the collection:* There are approximately 3,015 hours, annual burden, associated with this information collection (1,005 per three years).

Attachment 10- Introducing New CJ-8 Questionnaire Form Email

TO: <<DATA PROVIDER_EMAIL>>

SUBJECT: Introducing Changes to the Annual Probation Survey (APS)

BODY OF E-MAIL:

Dear <<DATA PROVIDER_NAME>>,

Thank you for your agency's past participation in the Bureau of Justice Statistics (BJS) Annual Probation Survey (APS). Your responses are incredibly important for BJS and local and federal policymakers who rely on the data you provide to make decisions impacting funding and other policies affecting adults on probation.

After the new year we will be launching the 2023 Annual Probation Survey. I wanted to make you aware of a few changes to the questionnaire that may impact your preparations for responding to this data request. In an effort to distinguish adults on misdemeanor probation supervision from those on felony probation supervision, we are asking agencies to break down their reported population counts into these two population types.

At its core the questionnaire will, as in previous years, gather information on the number of adults under probation supervision by your agency throughout the 2023 calendar year and collect information on the demographics of that population (e.g., most serious offense, supervision status, sex, and race and ethnicity). However, the updated questionnaire asks that these totals all be reported separately for adults on misdemeanor and felony probation.

In addition to breaking down population counts by misdemeanor and felony supervision, the updated Annual Probation Survey (APS) questionnaire will ask your agency to report the number of adults on probation on December 31, 2023 that fall into various population type categories, where applicable. Some of these categories are new additions to the Annual Probation Survey. They include:

- Adults on parole
- Adults who have been released from prison to serve a period of time under community supervision
- Adults on some other type of post-custody conditional release
- Adults awaiting trial
- Adults serving a term of pre-trial probation or other type of probation prior to conviction
- Adults in prison
- Adults in jail, and
- Other offense

In order to assist you with preparing for the survey launch in January, we have uploaded a pdf version of the questionnaire for you to review these changes discussed above ([LINK](#)). We are also extending the deadline for submission to provide you with additional time you may need to respond to these changes. Please let us know if you have any questions or concerns regarding this upcoming revised questionnaire.

Members of the data collection agency, RTI International's Agency Support Team, can be reached by calling toll-free (866) 334-4175 or by sending an email to bjs-aps-help@rti.org.

Once again, we thank you for your past participation in the Annual Probation Survey, and we look forward to working with you once again on this important data collection effort!

Sincerely,

Danielle Kaeble

We understand that these changes are significant and thus wanted to make you aware of them early on to help you prepare.>>

In January, RTI International will send your designated survey respondent an invitation to the 2023 collection. Use the following information to log onto the <<ASPP, APS>> website (www.bjs-aps.org) and confirm or update the contact information for your agency:

At a time in which the probation and parole field is at the epicenter of criminal justice reform and reinvestment strategies, having accurate data is extremely important. How can you justify the need for additional money in your budget if you don’t have the numbers to support it? How can you determine whether changes are having an impact on outcomes? To this extent, participation of each supervising agency in the ASPP is vital.

Initiate NR Follow-up: Conversational Topics

- Address concerns
 - If a DP wants to participate, but does not want to use the web survey, offer to have the helpdesk call them to discuss alternative methods, such as over the phone. Record the case ID, the name and contact information of the individual you spoke with, and reason for needing a call-back and let your manager know.
 - If a DP is hesitant to participate because they don't have a good computer system, let them know that we accept estimates.
 - Offer to send the study information again. Verify the contact information and in the HERO ticket, select the "NRFU" category and "Requests Login Information Email" subcategory.
 - If you learn that you need to speak with someone other than the DP listed in the SMS, call that person. Follow through with agency contacts until you reach or leave a message for the proper person.
- Answer questions
 - **Is this mandatory?** No; however...
 - The statistics produced are imperative to understanding the characteristics of the total population of persons under correctional authority.
 - Data such as these are used by state and local criminal justice officials to justify budgets, compare changes in populations with comparable jurisdictions, and track outcomes of those on probation.

- There is no other ongoing, comprehensive, nationally-representative survey of the probation population.
 - **How long will the survey take?**
 - CJ-7 (parole) takes an average of 1.5 hours.
 - CJ-8 (probation long) takes an average of 2.5 hours.
 - CJ-8M (probation short) takes an average of 20 minutes.
 - Users can start, save, and return to the survey at any time.
- Help Desk Referrals
 - If an agency wants to complete the form while on the phone, email or fax it in, refer them to the helpdesk:
 - E-mail: bjs-aps-help@rti.org
 - Phone: 1-866-334-4175
 - Fax: 1-866-509-7471
 - If an agency has a question on a survey item or how to interpret a question and properly report their data, tell them the helpdesk will be in touch, or they can reach out themselves if they prefer and give them the helpdesk number. Either way, alert your supervisor to this case and they will communicate this to the survey team.
- Negotiate due date
 - Suggest a due date in two weeks (from the current date) unless the agency describes circumstances where they will not be able to submit during that time.
 - If the date is more than a month away, let the agency know that we will check in with them in a few weeks to confirm that they are on track for the new due date.
 - Check in with the agency every two weeks to confirm they are on track for submission.
- Employ refusal conversion
 - We can accept estimates in lieu of exact counts.
 - We can collect the information via phone or send a form via mail, e-mail or fax.
 - If the respondent still refuses, in the HERO ticket select the “NRFU” category and the “Refusal” subcategory and describe the conversation. Also, update the Survey Status in the SMS to *Initial Refusal*.
- **As a last resort**, we have four critical items that we would like to collect. These are:
 - Your agency’s adult [**PROBATION/PAROLE**] population on January 1, 2023
 - Between January 1, 2023, and December 31, 2023, how many adults *entered* [**PROBATION/PAROLE**]?
 - Between January 1, 2023, and December 31, 2023, how many adults were *discharged* from [**PROBATION/PAROLE**] supervision?
 - Your agency’s adult [**PROBATION/PAROLE**] population on December 31, 2023? (This should be equal to the population you provided for January 1, 2023, plus the number who entered [**PROBATION/PAROLE**] throughout the year, minus the number of discharges)
