## Monitoring Assignments: SRNs and PEPs

Not yet Approved by OMB  
 Control Number 3060-0207  
 Estimated time per response: 100 hours  
 Month 2023

Please identify all broadcast and satellite Primary Entry Point (PEP) EAN sources where indicated, and any State Relay Networks (SRNs) used in your state. For each SRN, list all satellite and broadcast PEP EAN sources the SRN monitors and transmits, as well as all Common Alerting Protocol (CAP) and state and local alert sources the SRN monitors and transmits.

### Broadcast and Satellite PEP EAN Sources (optional field to improve report clarity)

Your PEP or "Primary Entry Point" sources are those that sit at the top of the monitoring hierarchy and deliver the Presidential Alert or "EAN" message to stations and EAS participants that are monitoring them downstream. They are generally either AM radio stations or nationwide satellite networks. Please list all PEP EAN sources in your monitoring assignments, including each broadcast PEP station by call sign and each satellite PEP source by name (SiriusXM, NPR Squawk, or Premier). These entities must also be included in the "additional sources" column of the monitoring assignment tables to show which EAS participants are monitoring them.

Save

### State Relay Networks (SRNs) (optional field to improve report clarity)

A "State Relay Network" or SRN is a specific network that distributes EAS messages to extend their reach throughout some states. An SRN may consist of a relay-chain of broadcast stations, dedicated wireline facilities, wireless point-to-point or wide area networks, satellite links, internet delivery, or any combination of those facilities or other communication facilities. Not all jurisdictions use SRNs in their EAS monitoring assignments. If SRNs are used in your jurisdiction, please list each SRN source in your monitoring assignments, and which sources the SRN monitors and transmits. The SRN name should then be listed in the "additional sources" column in the monitoring assignment tables to show which EAS participants monitor the SRN in the matrix. If none, then skip these fields.
