	Total Service Allocations		

¹ Infrastructure are costs associated with the development and expansion of data systems. It may include technical assistance on the type, design, and building of new data systems, bridging existing systems to achieve data integration, improving data entry to decrease burden and increase accuracy, training of staff and providers on collecting and using data, and employing experts to provide accurate and in-depth data analysis.

² Planning and evaluation are costs associated with stakeholder engagement and process and outcome evaluation activities.

³ EHE Initiative Services are costs associated with a broader approach to addressing HIV in the community than exists in services authorized by the RWHAP legislation. For example, the only requirement for determining eligibility is that the individual has an HIV diagnosis. There is no requirement that individuals served are low-income or that initial eligibility is documented prior to services being provided. Initiative services are services and activities that do not fit neatly within the RWHAP service categories (e.g., linkage to care). These services may be innovative and creative with a focus on ending the HIV epidemic.

Public Burden Statement:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB number. The OMB control number for this project is 0915-0318 and it is valid until 09/30/2023. Public reporting burden for this collection of information is estimated to be 4 hours per response. These estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments to HRSA Reports Clearance Officer, Health Resources and Services Administration, Room 10-33, 5600 Fishers Lane, Rockville, MD. 20857.
