

Justification of Non-Material Change
Bureau of Engraving and Printing Feature of Interest (FOI) Survey for Banknote Equipment
Manufacturers

1520-0012

BEP is submitting a non-material change request to modify questions five and six as well as create variable versions of the OMB Control Number 1520-0012 - **Bureau of Engraving and Printing Feature of Interest (FOI) Survey for Banknote Equipment Manufacturers**. The information collected by the BEP is not changing. The BEP is only modifying the wording of questions five and six to provide clarity to respondents. OMB 1520-0012 was designed to be used for many different Features of Interest (FOI) and for all denominations at Feedback Opportunities. The BEP proposes to grey out or delete questions for respondents when the question is not relevant to the Feature of Interest under discussion. This will reduce the burden of respondents and make the survey more succinct.
