2 Data Introduction

2.1 Overview

This document provides a description of the data elements used to describe the implementation and performance of CSP Grantees as part of the Charter School Programs (CSP) Data Collection, Risk Assessment, and Monitoring contract (GS-10F-0288W) and the Charter Online Management and Performance System (COMPS).

The Charter Schools Program (CSP) grant program serves the purpose of Section 5201 of the Elementary and Secondary Education Act of 1965 (ESEA), which seeks to expand the number of high-quality charter schools and increase national understanding of the charter school model.

2.2 Purpose

The Charter Online Management and Performance System (**COMPS**) is a web-based application designed to assist ED in conducting compliance and performance monitoring activities for CSP Grantees. COMPS accumulates evidence of compliance and performance from Grantees, as well as provides the ability to capture previously reported data in a more secure and efficient manner. The vision is that COMPS will:

- Streamline the collection of data relating to the CSP monitoring of Grantees using COMPS.
- Provide a comprehensive performance and knowledge management platform.
- Collect grant-recipient performance data, import budget data, perform analytics, automates key document and reporting workflows, and enables two-way communication between OESE and Grantees.

The Grant Profile is the baseline and foundation module for COMPS. Grantees are required to submit baseline information at the time of their award, such as assurances, competitive priorities, key program activities, grant objectives, approved budget and waiver requests. The Grant Profile module will only be filled out once by Grantees at the start of their grant award. The information continued in the module will be used in the School/Subgrant Data Collection Module and Annual performance Reports (APR) modules, which are covered in a separate user guide. This data is used by ED to track the progress Grantee's are making towards meeting their goals against their baseline.

The purpose of this document is to outline the data architecture and key data elements associated with the User Management and Grant Profile module for State Entity (SE) Grantees. This data guide defines the fields collected in the COMPS Grant Profile for SE grantees. It is to be used in conjunction with the SE Grant Profile User Guide for a complete understanding of the system and process.

3 Data Workflow/Architecture

3.1 Workflow

The following steps depict the high-level workflow:

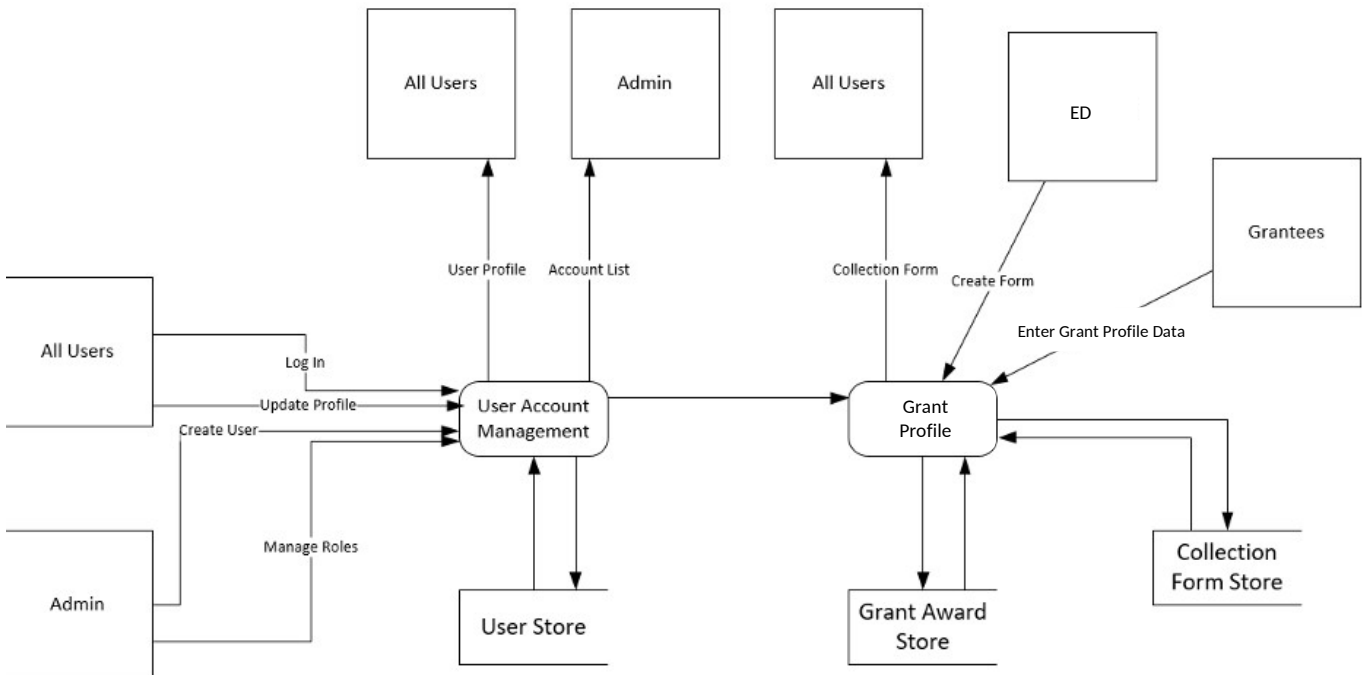

1. User accounts are created by the system admin and ED, with unique emails and password.
2. Grantees are assigned to the appropriate organization and role.
3. Grantees log into the system to update information as needed.
4. ED creates Grantee Organizations and Grant Awards. They create cohort templates (Fiscal year and Program) to set the correct assurances, competition priorities and budget periods.
5. Grantees log into the system to manually enter information in the Grant Profile related to their award. Components of their entry are auto calculated and transmitted to additional modules.
6. Grantees submit their form for review.
7. ED reviews the form and either accepts it, or returns the form to Grantees to correct and resubmit.

3.2 Data Architecture

The database for COMPS is contained in a Microsoft SQL Server instance contained within the virtual machine running the web application.

3.3 Logical Data Model

The following diagram is a simple example of how the User Account Management and Grant Profile modules are linked, with interactions by users.

4 User Access Management

4.1 Overview

The User Access and Management module allows access, through an authentication process, to the system’s landing page for approved users. The system will provide a central web portal that delivers information, based on role, to SE organizations. The portal permits users to see only the information that is appropriate for their roles. For example, a Grantee project director would only be able to see data collection information regarding their grant. Users are able to navigate to a user access management page that allows them to edit their name and email address and change their password.

4.2 Data Dictionary

The following sections describe the data tables, data fields, and descriptions for the User Access Management and Security module. These data elements are used to ensure Grantee users are tied to the correct organizations and grant awards.
