OMB Approval No. 2502-0010
(Exp. 01-31-2018)

Public reporting burden for this collection of information is estimated to average 0.5 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. This agency may not collect this information, and you are not required to complete this form, unless it displays a currently valid OMB control number.

This information is necessary to secure a marketable title and title insurance for the property that provides security for project mortgage insurance furnished under the FHA multifamily programs. This information assists in making determinations regarding the property's compliance with applicable program regulations, e.g., those pertaining to flood hazard, and in reaching underwriting determinations regarding property suitability and worth for the intended use. This information is mandatory. HUD does not assure confidentiality and there are no sensitive questions.

This survey is to be used in a loan transaction for which the U.S. Department of Housing and Urban Development (HUD) is to insure a multifamily project mortgage.

Its uses will include:

- ☐ Land title recordation (all cases).
- ☐ Site grading plan preparation (item 1 below).
- ☐ Plot plan design/redesign (item 2 below).

Special Project Features:

- ☐ Care Facility,
- ☐ Condo/Air-rights, and/or
- ☐ Other: (Specify)

Standards of Performance: In every instance the survey and map(s) and/or plat(s) must be made in accordance with the requirements for an "ALTA/ACSM Land Title Survey" and in compliance with the:

- Minimum Standard Detail Requirements and Classifications for ALTA/ACSM Land Title Surveys, as adopted by the American Land Title Association and American Congress on Surveying and Mapping, dated 2005;
- Table A, Optional Survey Responsibilities and Specifications, thereof, items 1 through 4 and 7 through 13 except for subitems 7b and 7c, & 16, 17 & 18;
- and the following requirements as applicable:

1. **Site Grading Involved:** Comply with table A, item 5. Contours may not exceed 1-foot vertical intervals, except that 2-foot and 5-foot vertical intervals may be used where the mean site gradient exceeds 5 percent and 10 percent respectively. Where curbs and/or gutters exist, show top of curb and flow line elevations.
2. **Plot Plan Design/Redesign Involved:** Comply with Table A, Item 6.

3. **Condo/Air-rights Involved:** The surveyor must provide a survey made in accordance with any applicable jurisdictional requirements or, in the absence of such requirements, professionally recognized standards.

4. **Flood Hazard Involved:** Where any portion of the site is subject to flood hazard, show the 100 year return frequency flood hazard elevation and flood zone for all projects plus the 500 year return frequency flood hazard elevation and flood zone for care facility projects. For existing projects show the site elevation at the entrances, lowest habitable finished floor, and basement for each primary building and the vehicular parking area that services each primary building. Take return frequency flood hazard elevations from the applicable Federal Flood Insurance Rate Map. Where such is not available, take the elevations from available State or local equivalent data, or when not available, work in conjunction with owner's engineer.

5. **Blanket Easement Involved.** Show on the map/plat the location of any facility that is located within or traverses the property under provisions of a blanket easement.
