2023 PULSE SURVEY:

OPERATIONAL CHALLENGES IN CHILD NUTRITION PROGRAMS

2023 PULSE SURVEY:

OPERATIONAL CHALLENGES IN CHILD NUTRITION PROGRAMS

INTRODUCTION

In recent years, school nutrition professionals have met extraordinary challenges to ensure every child can get the food they need to learn, grow, and thrive. As State Agencies (SAs) and School Food Authorities (SFAs) continue to work together to administer and operate Child Nutrition Programs, the US Department of Agriculture (USDA) seeks to better understand the critical issues SFAs are facing.

This survey is mandatory and is intended to ensure the USDA has national, representative-level information to assess the scope, reach, and variation in challenges and mitigation strategies. The survey focuses on current operational challenges in school food service, including those related to school food procurement, program administration, and program finances. The results will be used to assist USDA's Food and Nutrition Service (FNS) and its partners to enhance the toolbox for administrators and school nutrition professionals working hard to make sure students are served healthy and nutritious meals.

You can find the results of last year's survey here:

[SFA Survey on Supply Chain Disruption and Student Participation \(SY 2022-2023\)](#)

The survey has a maximum of 30 questions and is estimated to take approximately 20 minutes to complete. **FNS is asking all SFAs that participate in the Child Nutrition Programs to complete this survey by [DATE].**

Please note that the survey includes questions about changes in overall food costs, labor costs, and student participation during the last several years. If this information is not readily available to you, we encourage you to provide your best estimates.

We sincerely appreciate your participation in this survey, particularly as many of you have little time available given the exceptional levels of effort you are putting into feeding children. As such, we have made this survey as short and simple to complete as possible.

If you have any questions about the survey, please email us at CNSurveys@usda.gov.

We thank you in advance for your contribution to this important effort.

The Food and Nutrition Service (FNS) is collecting this information to better understand the impacts of school food vendor, cost, and labor issues on school districts nationwide. This is a mandatory collection. FNS will use the information to develop tailored resources, tools, and flexibilities to support school districts in serving students healthy and nutritious meals. This collection does not represent personally identifiable information (PII) under the privacy act of 1974. According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0584-XXXX. The time required to complete this information collection is estimated to average 20 minutes (0.33 hours) per response for SFA Directors, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: U.S. Department of Agriculture, Food and Nutrition Service, Office of Policy Support, 1320 Braddock Place, 5th Floor, Alexandria, VA 22314, ATTN: PRA (0584-XXXX).
