

and NOAA Uncrewed Systems Operations Center.

The research and survey ships operated, managed, and maintained by OMAO comprise the largest fleet of federal research ships in the nation. Ranging from large oceanographic research vessels capable of exploring the world's deepest ocean, to smaller ships responsible for charting the shallow bays and inlets of the United States, the fleet supports a wide range of marine activities including fisheries surveys, nautical charting, and ocean and climate studies.

NOAA aircraft operate throughout the world providing a wide range of capabilities including hurricane reconnaissance and research, marine mammal and fisheries assessment, and coastal mapping. NOAA aircraft carry scientists and specialized instrument packages to conduct research for NOAA's missions.

Housed within the NOAA Office of Marine and Aviation Operations and staffed by the U.S. Public Health Service (USPHS) Commissioned Corps officers, the Office of Health Services (OHS) is charged with directly supporting all personnel within the National Oceanic and Atmospheric Administration (NOAA).

NOAA medical officers work to maximize deployment readiness and minimize medically related disruptions to fleet, aircraft, and diving operations. OHS programs assess and promote mental and physical readiness within their operational medical discipline. Given the austere and geographically remote operational environments OHS supports, our officers are also responsible for preventing and containing disease in operational environments as subject matter experts in travel medicine. The forms contained in this collection will be used to make medical readiness recommendations for individuals and to key leadership in operational environments.

SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for approval of a collection currently in use without OMB approval.

The NOAA Diving Program (NDP) is administered by the U.S. Department of Commerce, National Oceanic and Atmospheric Administration (NOAA), and is headquartered at the NOAA Western Regional Center (WRC) in Seattle, Washington. The NDP provides the guidelines, policy, and training for all NOAA Divers, which includes all NOAA employees who dive, as well as contractors and volunteers, among others, who conduct diving operations.

With more than 300 divers, the National Oceanic and Atmospheric Administration (NOAA) has the largest complement of divers of any civilian federal agency. NOAA Divers conduct operations in our nation's waters and beyond in support of NOAA's scientific research and operations. They are called upon to work in various conditions ranging from the warm, clear waters of a marine sanctuary, to the cold, murky waters of a commercial harbor. The tasks NOAA Divers complete are as varied as the waters they dive in, with most divers supporting projects and research of the National Ocean Service (NOS), the National Marine Fisheries Service (NMFS), and the Office of Marine and Aviation Operations (OMAO).

NOAA Divers are required to maintain a high level of proficiency, both in practice (in the water) and in theoretical understanding (academic learning) in order to continue to dive at NOAA. In addition, NOAA Divers must maintain medical fitness to dive and are required to send their diving equipment out for maintenance as scheduled. If requirements are not met, divers may become unauthorized to dive or suspended. In order to become NOAA Divers, candidates must first submit a diving physical to the NOAA Diving Medical Officers to determine if they are medically fit to dive. After that, divers must complete medical documentation annually to maintain authorization to dive. To maintain fitness to dive, it is imperative that divers recognize the need for a continual and aggressive exercise program that exceeds basic health maintenance standards.

II. Method of Collection

Information will be collected electronically via email.

III. Data

OMB Control Number: 0648–XXXX.
