BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Reporting Requirements for the Ocean Salmon Fishery Off the Coasts of Washington, Oregon, and California**

AGENCY: National Oceanic & Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before August 25, 2023.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at NOAA.PRA@noaa.gov. Please reference OMB Control Number 0648-0433 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Shannon Penna, National Marine Fisheries Service (NMFS) West Coast Region, 7600 Sand Point Way NE, Seattle WA 98115; telephone: 562-980-4239; email: shannon.penna@noaa.gov.

SUPPLEMENTARY INFORMATION:**I. Abstract**

This request is for an extension of a currently approved information collection.

Ocean salmon fisheries conducted in the U.S. exclusive economic zone, 3–200 nautical miles off the West Coast states of Washington, Oregon, and California are managed by the Pacific Fishery Management Council (Council) and NOAA's NMFS under the Magnuson-Stevens Fishery Conservation and Management Act (MSA). Management measures for the ocean salmon fisheries are set annually, consistent with the Council's Pacific Coast Salmon Fishery Management Plan (FMP). The FMP provides a framework for managing the ocean salmon fisheries in a sustainable manner, as required under the MSA, through the use of conservation objectives, annual catch limits, and other reference points and status determination criteria described in the FMP. To meet these criteria, annual management measures, published in the **Federal Register** by NMFS, specify regulatory areas, catch restrictions, and landing restrictions based on the stock abundance forecasts. These catch and landing restrictions include area- and species-specific quotas for the commercial ocean salmon fishery, and generally require catch and landings to be reported to the appropriate state and tribal agencies to allow for timely and accurate accounting of the season's catch (50 CFR 660.404 and 50 CFR 660.408(o)). The best available catch and effort data and projections are presented by the state fishery managers in telephone conference calls involving the NMFS Regional Administrator and representatives of the Council. However, NMFS acknowledges that unsafe weather or mechanical problems could prevent commercial fishermen from making their landings at the times and places specified, and the MSA requires conservation and management measures to promote the safety of human life at sea. Therefore, the annual management measures will include provisions to exempt commercial salmon fishermen from compliance with the landing requirements when they experience unsafe weather conditions or mechanical problems at sea, so long as the appropriate notifications are made by, for example, at-sea radio and cellular telephone, and information on catch and other required information is given, under this collection of information.

The annual management measures will specify the contents and procedure of the notifications, and the entities

receiving the notifications (e.g., U.S. Coast Guard). Absent this requirement by the Council, the state reporting systems would not regularly collect this specific type of in-season radio report. These provisions, and this federal collection of information, promote safety at sea and provide practical utility for sustainably managing the fishery, and ensure regulatory consistency across each state by implementing the same requirements in the territorial waters off each state. This information collection is intended to be general in scope by leaving the specifics of the notifications for annual determination, thus providing flexibility in responding to salmon management concerns in any given year.

II. Method of Collection

Notifications are made by at-sea radio or cellular phone transmissions.

III. Data

OMB Control Number: 0648-0433.

Form Number(s): None.

Respondent's Obligation: Mandatory.

Legal Authority: Magnuson-Stevens Fishery Conservation and Management Act.

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request

to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

SUPPLEMENTARY INFORMATION:

Title: Adaptation of Regulations to Incorporate Swaps—Records of Transactions; Exclusion of Utility Operations Related Swaps with Utility Special Entities from De minimis Threshold for Swaps with Special Entities (OMB Control No. 3038–0090). This is a request for extension of a currently approved information collection.

Abstract: Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act, Pub. L.

111–203, 124 Stat. 1376 (2010)) amended the Commodity Exchange Act (CEA) to establish a comprehensive new statutory framework for swaps. These amendments required the Commodity Futures Trading Commission (“the Commission”) to amend several of its regulations to implement the new framework. The information collection obligations imposed by the “Adaptation of Regulations to Incorporate Swaps” final regulations² remain necessary to implement section 721 of the Dodd-Frank Act, which amended the definitions of futures commission merchant (“FCM”) and introducing broker (“IB”) to permit these intermediaries to trade swaps on behalf of customers. They also are necessary to implement section 733 of the Dodd-Frank Act which introduced swap execution facilities (“SEFs”) as a new trading platform for swaps. As a result of the enactment of sections 721 and 733, the Commission needed to amend certain recordkeeping regulations (§§ 1.31, 1.33, 1.35, 1.37, and 1.39) so that records of swap transactions are maintained analogously to how futures transactions are maintained.

Further, the “Exclusion of Utility Operations-Related Swaps With Utility Special Entities from De Minimis Threshold for Swaps With Special Entities”³ regulation amended the Commission's swap dealer definition to permit a person to exclude “utility operations-related swaps” with “utility special entities” in their de minimis threshold calculations. The regulation requires a person claiming the exclusion to maintain, in accordance with Commission regulation 1.31, any written representations that the person receives from utility special entities related to this exclusion.

The information collection burdens associated with these regulations (collectively, the “Swap Recordkeeping Requirements”) are restricted to the costs associated with the recordkeeping and reporting requirements that these regulations impose upon affected registrants, registered entities, those registered entities' members, and other respondents covered by the final rules.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. On April 14, 2023, the Commission published in the **Federal Register** notice of the proposed
