

Information Collection Domains

Indicates the category of information collection by time period that corresponds to the burden table. For each of the following Domains, there is a corresponding Tab.

- 1- Pre-Transplant Information Collection
 - 2- Transplant Procedure and Product Information
 - 3- Post-Transplant Periodic Information Collection
- Below are the definitions for each column heading.

Column Header Title	Column Header Title Definitions
Information Collection Domain Sub-Type	Identifies a grouping of information collection within an Information Collection Domain. These information collection domain sub types roughly correspond to section/domain headers currently found on CIBMTR data collection instruments.
Information Collection Domain Additional Sub Domain	Additional Sub Domain set recipient, donor, infusion type or product criteria that must be met for an information collection element to be required
Response required if Additional Sub Domain applies	Response options are "yes" or "no". If the criteria noted in Additional sub domain applies, the information collection data element will be applicable and information collection data element responses supplied. Always "yes" when an additional sub domain is present.
Information Collection may be requested at multiple times	Response options are "yes" or "no". Some information may be collected at "multiple" time points or in multiple iterations. A multiple request may occur with a new or duplicate event, new infusion, changes in treatment or outcomes follow up. For example: product analyses at multiple timepoints, chimerism analyses on multiple dates, subsequent neoplasms, co-morbidities, covid infection, Disease Status, Post Transplant Therapy, GVHD, labs and pathology (collected at diagnosis, between diagnosis and infusion, at infusion and during followup)
Current Information Collection Data Element (if applicable)	Depicts the information collection data element currently being requested.
Current Information Collection Data Element Response Option(s)	Depicts the information collection data element response options currently being requested.
Information Collection update:	Notes the type of update. If Blank, there was no change. options: Addition of Information Requested Deletion of Information Requested Deletion of Information: Merged to Check all that Apply Change/Clarification of Information Requested Change/Clarification of Response Options Change/Clarification of Information Requested and Response Options
Proposed Information Collection Data Element (if applicable)	Depicts the changes to the information collection data element requested in red line format. Rows containing changes are highlighted in Yellow
Proposed Information Collection Data Element Response Option(s)	Depicts the changes to the information collection data element response options in red line format. Rows containing changes are highlighted in yellow.
Rationale for Information Collection Update	The following options identify the change summary:

Column Header Title	Column Header Title Definitions
	options:
	Reduce burden: expanded response options to include responses previously reported manually or created a "check all that apply"
	Be consistent with current clinical landscape, improve transplant outcome data
	Capture data accurately
	Examples added or typographical errors corrected for clarification
	Covid-19 Impact
	Capture additional relevent disease information
