Shigella Hypothesis Generating Questionnaire

Survey #: 500

Organization: Centers for Disease Control and Prevention

Form Approved OMB No. 0920-1307 Exp. Date 11/30/2026

The Centers for Disease Control and Prevention, in collaboration with your local health department, are collecting information about people who were recently sick with a *Shigella* infection, also called shigellosis. *Shigella* are a group of bacteria that cause diarrheal illness. We are trying to determine how you (or the ill person) became sick with a *Shigella* infection. The information we are collecting in this questionnaire will also help prevent others from getting sick.

To begin, please click on the Begin Survey button.

Public reporting burden of this collection of information is estimated to average 45 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB Control Number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333: ATTN: PRA 0920-1307

Begin Survey

Survey Starting Date: Tuesday, September 26, 2023 12:00 AM

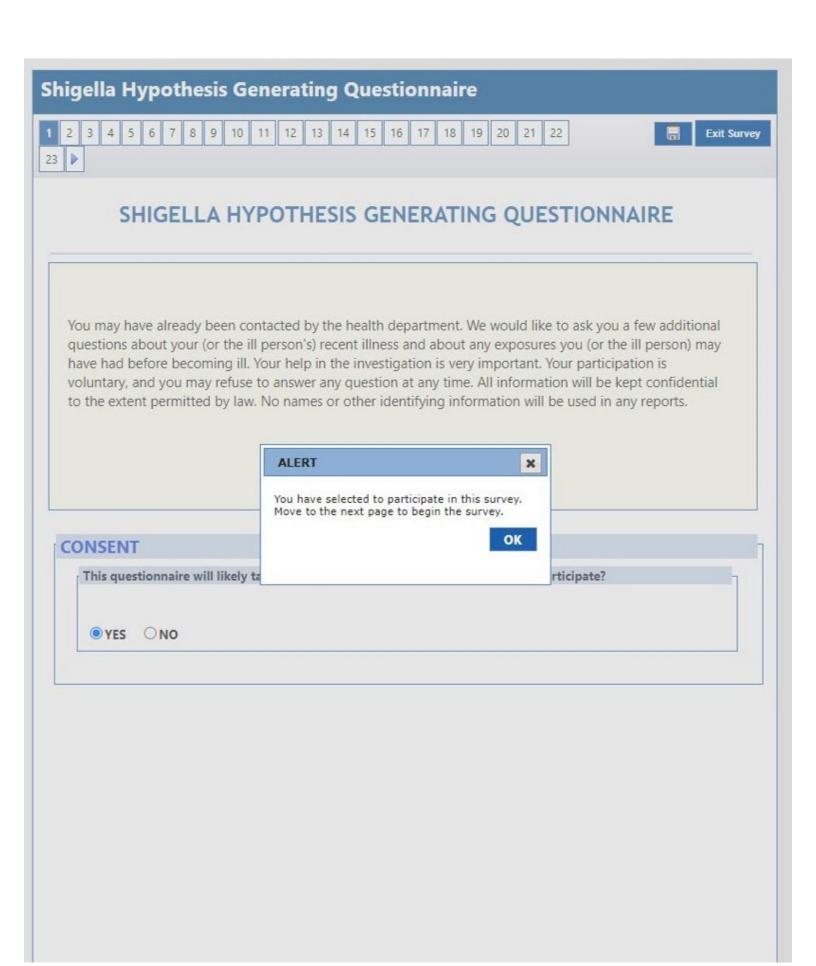

Survey Closing Date: Monday, November 30, 2026 11:59 PM

Notice to Respondents:

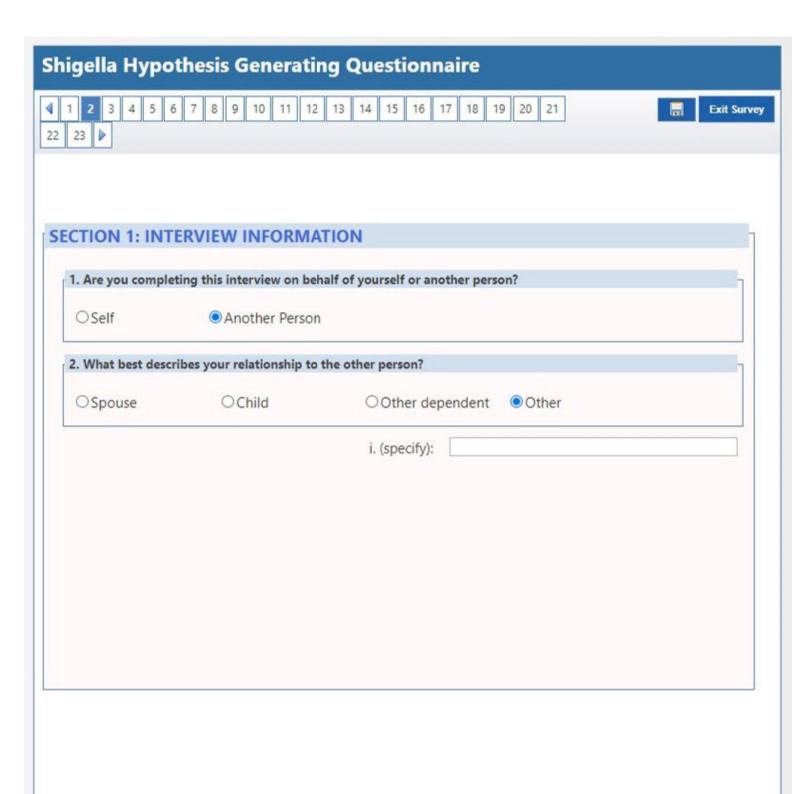

This Epi Info™ Secure Web Survey system is approved for the collection of Personally Identifiable Information (PII) and Protected Health Information (PHI) as described in 45 CFR 160.103 and summarized at <u>Summary of the HIPAA Privacy Rule</u> and <u>HHS Office of Civil Rights: Summary of the HIPAA Privacy Rule PDF</u>. The survey that follows *MAY* collect your personally identifiable information. If you have any questions about how your data will be used, protected, and possibly shared, please contact the survey authors listed in the survey.

SEXUAL ACTIVITY SECTION

Finally, we would like to ask about your recent sexual activity because *Shigella* can be spread through sexual contact. *Shigella* germs are very contagious; it takes just a small number of *Shigella* germs to make someone sick. People can get shigellosis when they put something in their mouths or swallow something that has come into contact with the stool of someone else who is sick with shigellosis. This can happen during sex.

As described previously, your responses are voluntary, and you may refuse to answer any question at any time. We ask all adults who were diagnosed with a *Shigella* infection these questions. Your answers to these questions will be kept private and may help us to identify how you became sick with a *Shigella* infection. This will also help us to prevent others from getting sick.

Do you wish to proceed with the next section? YES ONO
