Public reporting burden of this collection of information is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer; 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; Attn: OMB-PRA (0920-New)

mChoice CleverCap Onboarding Guide

Below is the app welcome screen. Participants will hit “Sign in” at baseline. Their account will be set up prior to their enrollment and credentials will be sent to their email. A study team member will help the participant log into the app and become familiar with it.

Below is the side menu bar. By tapping the three lines on the top right of the screen, participants can navigate to “Dashboard,” “My Alerts,” “My Stats,” “My Account,” “Support,” “Options,” “Chat,” “Videos and Information” (all explained in detail below) or they can log out.

Dashboard

The “Dashboard page” is the homepage of the CleverCap application. Here, participants can enter their sexual activity and manually log that they took their medication. The dashboard displays pending, taken, missed, or off-schedule doses.

Sexual Activity

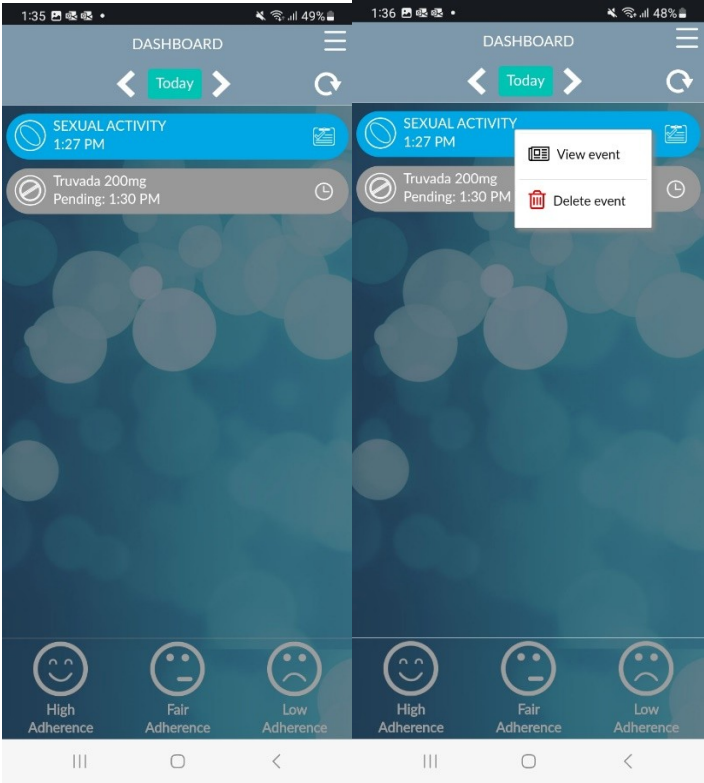

By clicking 'Add event' on the "Sexual Activity" log, participants can enter recent sexual activity information. The questions, pictured below, will appear. For participants who are using the on-demand PrEP regimen, logging a sexual activity instance will trigger reminders for participants to take their subsequent 2-1-1 doses.

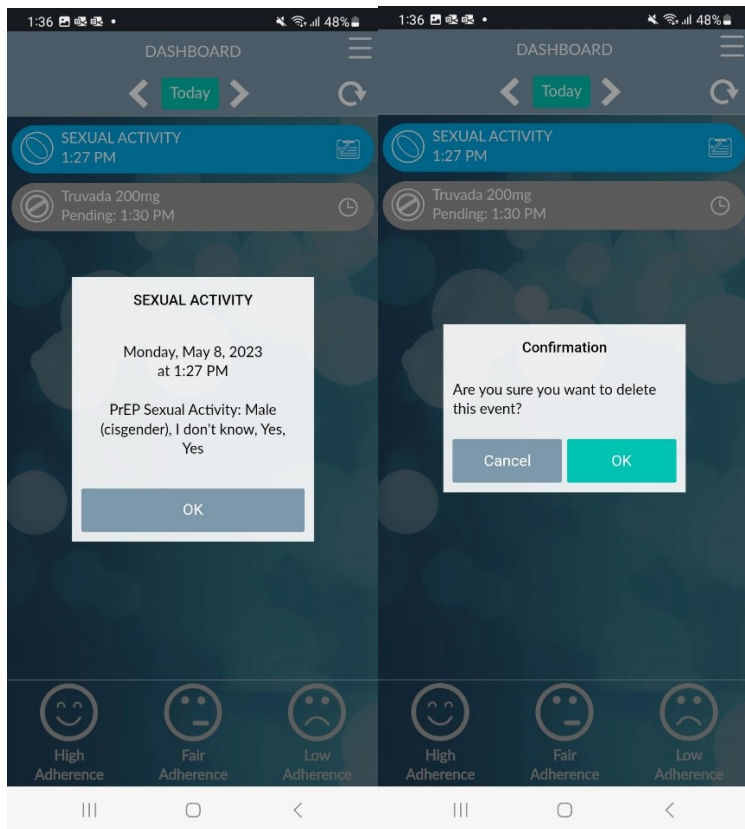

The screenshot shows a mobile application interface for logging sexual activity. The top bar is labeled 'DASHBOARD' and 'Today'. Below it, there's a 'SEXUAL ACTIVITY' section with a 'Pending' status and an 'Add event' button. A 'Truvada 200mg' event is also shown with a 'Pending: 1:30 PM' status. The main form is titled 'PrEP Sexual Activity' and is for 'Monday, Jan 23, 2023'. The form contains the following sections:

- Partner gender**
 - Male (cisgender)
 - Male (transgender)
 - Female (cisgender)
 - Female (transgender)
 - Other
 - N/A
 - Rather not say
- Partner HIV status**
 - Positive
 - Negative
 - I don't know
- Is your partner taking PrEP?**
 - Yes
 - No
 - I don't know
- Did you use a condom?**
 - Yes
 - No

At the bottom of the form, there are two 'Save' buttons. The bottom navigation bar shows three adherence levels: High Adherence (smiley face), Fair Adherence (neutral face), and Low Adherence (sad face).

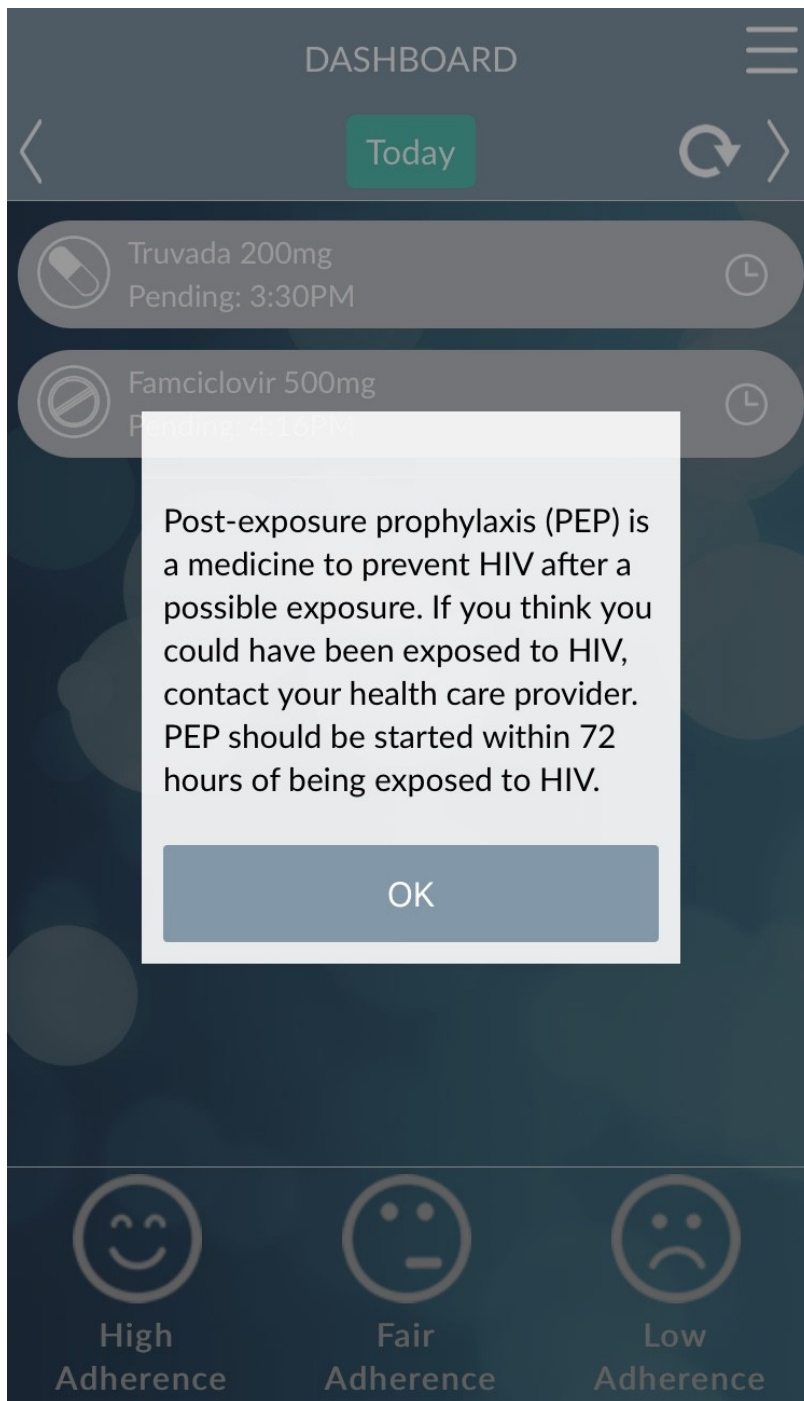

Once an event is added, participants will have the option to either view the event or delete the event.

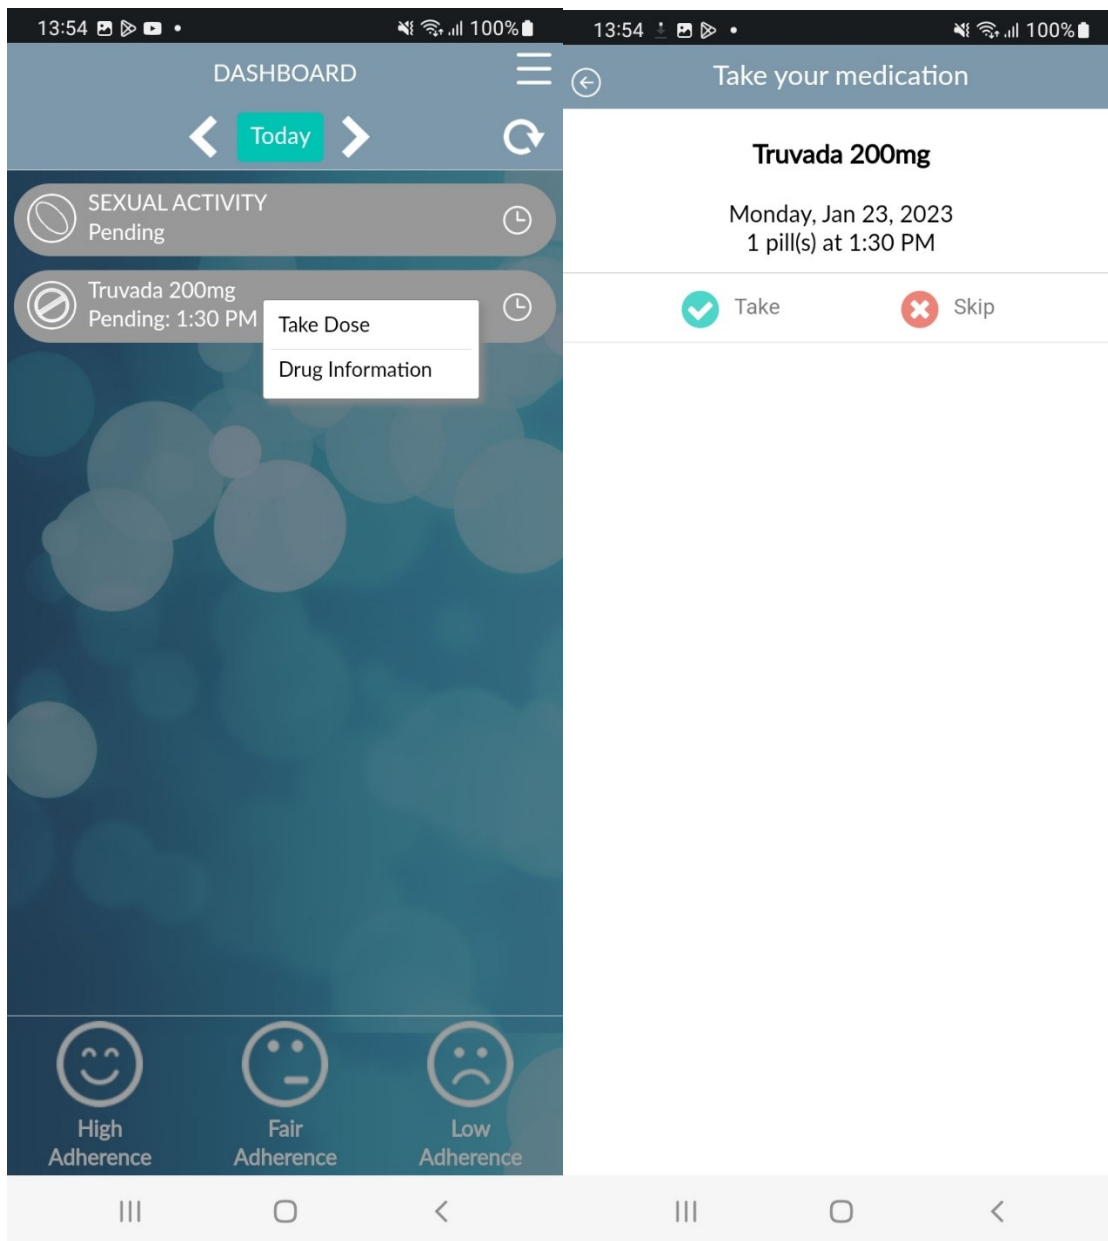

PEP Pop-up Message (For participants taking on-demand PrEP)

Participants who did not take/log 2 pills prior to engaging in/documenting sexual activity will see the below message.

Dose

By clicking on the medication/dose, participants can either enter that they have taken their medication or see more information about the medication.

Drug Information

The “Drug Information” page of the CleverCap app shows details of the participant’s medication such as suggestions, side effects, and when to contact a healthcare provider.

You should know the following regarding your Truvada 200mg treatment:

PLEASE NOTE THIS MEDICINE MAY BE TAKEN WITH or WITHOUT FOOD. ©2016 DK
