

Feature **Water Use Information**

Identification	Agency name
	Agency address--street,city,county, zip
	Agency water-resources information contact: name, address-street,city,county, zip, email, telephone
	Facility name
	Facility Employer Identification Number
	Facility address--street,city,county, zip, latitude-longitude with horizontal datum if available
	Facility contact: name, address--street,city,county, zip, , email, telephone
	Ownership: Company name
	Owner: name, address--street,city,county, zip, email, telephone
	Owner contact: name, address--street,city,county, zip, email, telephone
	Industry code – NAICS North American Industry Classification System (https://www.census.gov/naics/?99967)
	Industry code – Standard Industrial Classification (https://guides.loc.gov/industry-research/classification-sic)
	State water-use registration/reporting threshold
Category	Year facility established
	Year water source accessed
	Date reporting
	Water-use category: Public Supply, Domestic, Industrial, Crop Irrigation, Golf Irrigation, Thermoelectric-Cooling, Livestock, Aquaculture, Mining, Hydropower
Split uses	Approximate amounts of primary water use(s) (% of total) in facility including production output, electricity production, irrigation, potable water uses, sanitation, pollutant discharge, heating, cooling or other uses.
Sources	Sources of water: Public/municipal supplier with system name , PWSID identifier and whether recycled wastewater is used; self-supplied groundwater with well, wellfield, or spring identifier, well depth and diameter, pump capacity,latitude and longitude with horizontal datum, hydrologic unit code, aquifer, whether fresh, saline or brackish, withdrawal permit/registration and agency issuing; self-supplied surface water with source-identifier, intake diameter, pump capacity, latitude and longitude with horizontal datum, hydrologic unit code, water-body name, whether fresh, saline or brackish, withdrawal permit/registration and agency issuing.
Volumes	Volume of water obtained by month/year from each source identified including water-source identifier, units of measurement, measurement method, water-rights/permit limits including average flow-rate, maximum flow rate, with permitted flow durations and units of flow measurement.
Operating	Ancillary facility operating characteristics by year/month related to water use [Number of employees: NE], [Production: PR] [Power production: PP], [Power production, closed-loop: PC], [Power production, once-through: PO], [Acres irrigated: AC], [Acres irrigated (Spray): SP], [Acres irrigated (Flood): FL], [Acres irrigated (Micro): MC]; Energy supplied by outside sources such as electricity, natural gas, diesel fuel, etc.
