Instructions for Completing EPA Form 3540-16 Pesticide Report for Pesticide-Producing and Device-Producing Establishments Reporting Year January 1, 2022 through December 31, 2022

Reporting Deadline on or before March 1, 2023

It is unlawful to knowingly falsify all or part of any pesticide or device production information reported on EPA Form 3540-16. (FIFRA §12(a)(2)(M))

Electronic Reporting (RECOMMENDED)

Before using PDF version of EPA Form 3540-16, please note that EPA created an optional [electronic reporting system](#) for pesticide establishments using the Section Seven Tracking System (SSTS). Once a company registered its first establishment, a company can use EPA's Central Data Exchange (CDX) to quickly register new establishments (EPA Form 3540-8), submit Annual Pesticide Production Reports (EPA Form 3540-16), keep establishment site and contact information current and request the termination of an EPA establishment number, when appropriate, as part of the reporting process.

To sign up for electronic reporting, go to: <https://www.epa.gov/compliance/electronic-reporting-pesticide-establishments>

6. How to terminate an establishment's registration:

- If you wish to terminate your establishment number at your request, because the establishment is out of business or has ceased production of pesticides, active ingredients or devices, please attach your letter of intent to terminate your establishment's registration on signed company letterhead and include:

7. Definitions

- **Producer** — any person, as defined by FIFRA, "who produces any pesticide, active ingredient, or device (including packaging, repackaging, labeling and relabeling)." (40 CFR §167.3)
- **Produce** — "manufacture, prepare, propagate, compound or process any pesticide, including any pesticide product pursuant to FIFRA §5, any active ingredient or device, or to package, repackage, label, relabel or otherwise change the container of any pesticide or device." (40 CFR §167.3)
- **Establishment** — Includes:
 - Any site where a pesticidal product, active ingredient or device is produced.
 - Sites that are independently owned or operated regardless of whether such site is domestic and producing a pesticidal product for export only or whether the site is foreign and producing a pesticidal product for import into the United States. (40 CFR §167.3)
 - Sites that produce a pesticidal product for use under an Experimental Use Permit, FIFRA Section 18 Emergency Exemption or Section 24(c) Special Local Needs registration, must report. (40 CFR §167.20)
 - Sites that produce unregistered pesticidal products for export from the United States.

- **Custom Blender** — any **facility** that provides the service of mixing registered pesticides to a customer’s specifications, specifically:
 - a pesticide-pesticide blend
 - a pesticide-fertilizer blend
 - a pesticide-animal feed mixture when:
 - the blend is not held in inventory
 - the pesticide used in producing the blend bears labeling that does not prohibit the use of the pesticide in the blend
 - the blend is delivered to the end-user with a copy of the labeling of the pesticide used in producing the blend and a statement specifying the composition of the mixture

If these conditions are not met, the establishment does not meet the definition of “custom blender” and must comply with FIFRA Section 7 requirements.

NOTE: A facility where **only custom blending** activities take place is not considered a pesticide-producing establishment and therefore does not need to be registered. Please see the link below for more information.
