

Section 319.56–4 contains a performance-based process for approving the importation of fruits and vegetables that, based on the findings of a pest risk analysis, can be safely imported subject to one or more of the five designated phytosanitary measures listed in paragraph (b) of that section.

APHIS received a request from the national plant protection organization (NPPO) of the United Kingdom to allow the importation of fresh table beet root (*Beta vulgaris* L.) for consumption from the United Kingdom into the continental United States, Hawaii, Puerto Rico, and the U.S. Virgin Islands. As part of our evaluation of the United Kingdom's request, we have prepared a pest risk assessment to identify the pests of quarantine significance that could follow the pathway of the importation of fresh table beet root for consumption into the United States and specified territories from the United Kingdom. Based on the pest risk assessment, a risk management document (RMD) was prepared to identify phytosanitary measures that could be applied to fresh table beet root to mitigate the pest risk.

Therefore, in accordance with § 319.56–4(c), we are announcing the availability of our pest risk assessment and RMD for public review and comment. Those documents, as well as a description of the economic considerations associated with the importation of fresh table beet root from the United Kingdom, may be viewed on the *Regulations.gov* website or in our reading room (see **ADDRESSES** above for a link to *Regulations.gov* and information on the location and hours of the reading room). You may request paper copies of the pest risk assessment and RMD by calling or writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. Please refer to the subject of the analysis you wish to review when requesting copies.

After reviewing any comments we receive, we will announce our decision regarding the import status of fresh table beet root from the United Kingdom in a subsequent notice. If the overall conclusions of our analysis and the Administrator's determination of risk remain unchanged following our consideration of the comments, then we will authorize the importation of fresh table beet root (*Beta vulgaris* L.) for consumption from the United Kingdom into the continental United States, Hawaii, Puerto Rico, and the U.S. Virgin Islands subject to the requirements specified in the RMD.

SUPPLEMENTARY INFORMATION: The Office of Management and Budget's (OMB) regulation (5 CFR part 1320) implementing provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104–13) requires that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8(d)). This notice identifies the following information collection that RUS is submitting to OMB as an extension to an existing collection with Agency adjustment.

Title: RUS Specification for Quality Control and Inspection of Timber Products.

OMB Control Number: 0572–0076.

Expiration Date of Approval: February 29, 2024.

Type of Request: Extension of a currently approved collection.

Estimate of Burden: This collection of information is estimated to average 1.01 hour per response.

Respondents: Not-for-profit institutions; Business or other for profit.

Estimated Number of Respondents: 25.

Estimated Number of Responses per Respondent: 800.

Estimated Total Number of Responses: 20,000.

Estimated Annual Reporting Burden on Respondents: 20,000 hours.

Estimated Annual Recordkeeping Burden on Respondents: 333.25 hours.

Estimated Total Annual Burden on Respondents: 20,333.25 hours.

Abstract: RUS Bulletin 1728H–702 and 7 CFR 1728.202 describe the responsibilities and procedures pertaining to the quality control by producers and pertaining to inspection of timber products produced in accordance with RUS specifications. To ensure the security of loan funds, adequate quality control of timber products is vital to loan security on electric power systems where hundreds of thousands of wood poles and cross-arms are used. Since RUS and its borrowers do not have the expertise or manpower to quickly determine imperfections in the wood products or their preservatives treatments, they must obtain service of an inspection agency to ensure that the specifications for wood poles and cross-arms are being met. Copies of test reports on various preservatives must accompany each load of poles treated at the same time in a pressure cylinder (charge) as required by 7 CFR 1728.202(i). RUS feels the importance of safety concerns are

enough to justify requiring test reports so that the purchaser, inspectors, and RUS will be able to spot check the general accuracy and reliability of the tests.

Comments are invited on:

(a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.

(b) the accuracy of the Agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used.

(c) ways to enhance the quality, utility, and clarity of the information to be collected; and

(d) ways to minimize the burden of the collection of information on respondents, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Copies of this information collection can be obtained from Kimble Brown, Innovation Center—Regulations Management Division, at (202) 720–2825. Email: kimble.brown@usda.gov.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.
