

Rapid cycle evaluation of operational improvements in SNAP E&T:

In-depth participant interview discussion guide

Introduction

Thank you so much for meeting with me today. My name is _____ and I am with a company called [Mathematica]. I'm an independent researcher assisting the U.S. Department of Agriculture on a study to learn more about changes in [Supplemental Nutrition Assistance Programs (SNAP) employment and training (E&T) programs] that aim to help people get and keep jobs, and link them to the services they need to be successful. I'm here today to learn about your background and your experience with that program. I am also interested in learning about some of the things that might make it harder or easier for you to participate in this program or to find employment. This information will help us determine what works in these programs and what could be improved, so your input is valuable to us.

Your participation in this study is voluntary and you can stop at any time. The information you share with me today will be summarized and put together with information that we will gather from other clients. Nothing you say will be linked to your name in reports. We also won't share what you say with [SNAP Program Name and SNAP E&T Program Name] or any other program. All confidential information will be stored safely and destroyed at the end of the study. Your decision to participate in this interview and what you say will not affect your benefits.

Please remember that we are interested in your experiences and opinions; there are no right or wrong answers. My hope is that you will feel comfortable talking with me, but, if at any time I ask you a question and you don't feel comfortable talking about the topic, feel free to say so and we will move on. Our conversation will take about 90 minutes, and at the end we will give you \$50.

I would like to record our conversation, so I don't miss anything. No one will hear the recording except for researchers and the person who transcribes it. Is it okay with you if I record this conversation? If you want me to turn the recorder off for any reason or at any time, just say so. [INTERVIEWER: TURN THE RECORDER ON, specify your name, the respondent's FIRST name, date, and location]

Do you have any questions? If you have any questions in the future, you can contact Mathematica at [NUMBER] or by e-mail at [EMAIL].

Before we begin, I'd like to have your consent documented for our records. Do you agree to participate in this interview?
