### Instructions

This section collects information about the progress you have made in the collection, analysis, and use of ACEs and PCEs data, data on the social determinants of health, and data on shared risk and protective factors. To best mirror the types of data that are often available and used for prevention and intervention purposes, there are three tables that align with broad types of data that may be used by your program. **Please add ONE row for each data source AND data collection year.** For example, if you have data from the Youth Risk Behavior Survey from 2021 and 2023, please add two rows: one row for the 2021 YRBS and one row for the 2023 YRBS.
