SUPPLEMENTARY INFORMATION:

OMB Control Number: 2105–0529.
Title: Procedures for Transportation Workplace Drug and Alcohol Testing Programs.

Type of Review: Clearance of a renewal of an information collection.
Form Numbers: DOT F 1385; DOT F 1380.

Respondents: The information will be used by transportation employers, Department representatives, and a variety of service agents.

Abstract: Under the Omnibus Transportation Employee Testing Act of 1991, DOT is required to implement a drug and alcohol testing program in various transportation-related industries. This specific requirement is elaborated in 49 CFR part 40, Procedures for Transportation Workplace Drug and Alcohol Testing Programs. This request for a renewal of the information collection for the program includes 45 burden items including the U.S. Department of Transportation Alcohol Testing Form (ATF) [DOT F 1380] and the DOT Drug and Alcohol Testing Management Information System (MIS) Data Collection Form [DOT F 1385].

The ATF includes the employee’s name, the type of test taken, the date of the test, and the name of the employer. Data on each test conducted, including test results, is necessary to document that the tests were conducted and is used to take action, when required, to ensure safety in the workplace. The MIS form includes employer specific drug and alcohol testing information such as the reason for the test and the cumulative number of test results for the negative, positive, and refusal tests. No employee specific data is collected. The MIS data is used by each of the affected DOT Agencies (*i.e.*, Federal Aviation Administration, Federal Transit Administration, Federal Railroad Administration, Federal Motor Carrier Safety Administration, and the Pipeline and Hazardous Materials Safety

Administration) and the United States Coast Guard when calculating their industry’s annual random drug and/or alcohol testing rate.

On May 2, 2023, part 40 was amended to include oral fluid testing as an additional methodology for drug testing that gives employers a choice that will help combat employee cheating on urine drug tests and provide a less intrusive means of achieving the safety goals of the program [88 FR 27596]. As a result of the rule to include oral fluid testing as an additional methodology for drug testing, two new burden items have been added to this collection: (1) Oral Fluid Collector (Qualification and

Refresher) Training Documentation [§ 40.35(b) & (e)]; and (2) Oral Fluid Collector Error Correction Training Documentation [§ 40.35(f)]. These new burden items are analogous to the existing burden items for urine collectors and screening test technicians and breath alcohol technicians.

Also as a result of the May 2023 rule to include oral fluid as an additional methodology for drug testing, DOT will request OMB approval for a revision of the MIS Data Collection Form to facilitate the collection of oral fluid testing data from employers. Specifically, in Section III of the form, “Drug Testing Data,” DOT will add

additional rows under each “Type of Test” (e.g., Pre-Employment, Random, Post-Accident, Reasonable Suspicion/Cause, Return-to-Duty, Follow-Up, and Total) for employers to enter the number of urine tests, the number of oral fluid tests, and the number of total tests conducted.

Estimated Total Number of Respondents: 1,426,662.

Estimated Number of Responses: 11,459,756.

Frequency of Response: The information will be collected annually.

Estimated Total Number Burden Hours: 1,469,136.
