*First, I'd like to learn a bit about your family, community, and how you spend your time to understand how your housing fits into your life.*

### **Section 1: WARM-UP, BACKGROUND, FAMILY ROSTER AND DYNAMICS**

- 1. Let's start with the story of your life. You know, where you grew up, with whom, and how you got to where you are today.**

[Probes: parents, life at home, relationship with family members, school, neighborhood]

[**Note:** *This story can last between 10-20 minutes – at least. Allow/encourage this story to weave into the residential history. Use important life events to anchor the story in time. We'd like to keep the interviews within two hours, but I always find this particular opening section to set the tone for how people perceive the whole thing moving forward, and the time when they realize this is not a survey, but rather a chance to tell stories in detail, as they choose.*]

- 2. Let's talk more specifically about the past year. Generally speaking, how have things been this past year for your family?**

Tell me about any big changes your family has experienced.

[Probes: changes in employment status; how children are doing in school and with their friends; relationship with landlord, neighbors, other family members; changes in neighborhood conditions; changes in support system or finances]

[**Note:** *This is an important question. If possible, have the respondent actually show you the features of the unit that they feel work well or not well for the family. Where do people sleep, eat, and spend time? We want to understand philosophies of what makes for a good environment for kids here.*]

**What would make it better?**

[Probe: Cost, size, location, neighbors]

When you think about different things about your house that make you and your family feel healthy, what sorts of things come to mind? Tell me about that.
