FEDERAL COST: *The estimated annual cost to the Federal government is \$0.67 per survey response (67 cents), an amount provided to me by the GSA team providing us with access to the survey instrument Qualtrics. \$0.67 cents X 19,200 estimated survey responses equals a federal cost of \$12,864.00.*

If you are conducting a focus group, survey, or plan to employ statistical methods, please provide answers to the following questions:

The selection of your targeted respondents

1. Do you have a customer list or something similar that defines the universe of potential respondents and do you have a sampling plan for selecting from this universe?
[] Yes [X] No

If the answer is yes, please provide a description of both below (or attach the sampling plan)?
If the answer is no, please provide a description of how you plan to identify your potential group of respondents and how you will select them?

This request is for a classic random-invite customer satisfaction survey. For that type of survey, we choose a certain percentage of visitors to invite to participate in this totally optional and brief survey about their website experience. The percentage that we choose could vary, as we base it on the percentage needed to get a valid sample. However, visitation to our website is pretty consistent, so that percentage remains the same of about 2% for English pages and around 10% for Spanish pages.

Administration of the Instrument

1. How will you collect the information? (Check all that apply)
[X] Web-based or other forms of Social Media (Qualtrics)
[] Telephone
[] In-person
[] Mail
[] Other, Explain
2. Will interviewers or facilitators be used? [] Yes [X] No

Please make sure that all instruments, instructions, and scripts are submitted with the request.
