PAGO (102) A2. We are interested in how people are getting along financially these days. Would you say that you (and your family living there) are better off or worse off financially than you were a year ago?

-
1. BETTER NOW
 3. SAME
 5. WORSE NOW
 8. DK
 9. NA

PAGOR1 A2a. Why do you say so? (Are there any other reasons?)

PAGOR2
(103/4)

REASONS FOR MAKING FU BETTER OFF

10. Better pay: raise in wages or salary on present job, promotions, higher commissions, change to higher paying job (include Armed Forces induction or discharge) (Any family member who gets a raise is coded 10); increased tips, bonuses
11. Higher income from self-employment or property: higher business profits or farm income, higher dividends, royalties or rents, more income from professional practice or trade
12. More work, hence more income: Head (or wife) started working (again), more members of family working; higher income, NA why, MORE MONEY (if self-employed, code 11)
13. Increased contributions from outside FU: (from private individuals, government pension, relief or welfare, gifts); inheritance
14. Lower prices: decrease in cost of living; low or reasonable prices
15. Lower taxes; low or unchanged taxes
16. Decreased expenses: fewer people to be supported by FU; spending less, NA whether 14 or 16; thrift
18. Higher interest rates
19. Better asset position: more savings; business or farm worth more; has more business/farm assets; stocks went up; investments
20. Debt, interest or debt payments low or lower: have paid, is paying bills; interest rates lower
21. Change in family composition means higher income or better off (except 16 or 12); got married, etc. (no inheritance factor)
23. Good times, no recession (not codeable above) -- refers to the general situation as being good

VAR#

PAGOR1 A2a. (Continued)

PAGOR2

(103/4)

-
27. Other reasons for making FU better off: great security (job more permanent, psychological security), greater opportunities, higher standard of living, have more things, future outlook improved, got insurance; bought house, additions and repairs to house
38. Reference to government economic policy
39. Income tax refund

REASONS FOR MAKING FU WORSE OFF

50. Lower pay: decrease in wages or salary on present job, change to lower paying job (including Armed Forces induction or discharge) (Any family member who has a decrease in wages or salary is coded 50); no increase in pay; decreased tips, bonuses
51. Lower income from self-employment or property: lower business profits or farm income, lower dividends, royalties or rents, less income from professional practice or trade
52. Less work, hence less income: unemployed (refers to any unemployed family member) laid off, sick, retired, on strike, unsteady work, less overtime, fewer members of FU working, back to student status, lower income NA why (if self-employed, code 51); WORSE off because R/family member is/has been sick
53. Decreased/Unchanged contributions from outside FU, "worse because Social Security hasn't gone up" (if "same" because Social Security hasn't gone up, DO NOT USE THIS CODE); "worse because on a fixed income"
54. High(er) prices: increase in cost of living; prices rise faster than income; inflation; worse because raises have been too small --code "no raise" or decrease in pay in 50
55. Higher interest rates
56. High, higher taxes (except 57)
57. Income taxes
58. Increased expenses; more people to be supported by FU; spending more, NA whether 54, 55, 56, or 58
59. Worse asset position: savings used up wholly or partially; less business, farm or personal assets; stocks declined in value; interest rates lower
60. Debt: interest, debt, or debt payments high or higher
61. Change in family composition means lower income or worse off (except 58); divorced, death, etc.
63. Bad times, recession (not codeable above--refers to the general situation as being bad)
64. Strike(s)--not codeable in 52

VAR#

SECTION A: Percent Chance (A28-A29a)

VAR #

- A28. The next few questions ask about your views of the chances that various events will happen. Your answers can range from zero to one hundred, where zero means there is absolutely no chance, and one hundred means that it is absolutely certain. For example, when weather forecasters report the chance of rain, a number like 20 percent means "a small chance" of rain, a number around 50 percent means "a pretty even chance," and a number like 80 percent means "a very good chance."
- PINC A28a. What do you think the chances are that your (family) income (225) will increase by more than the rate of inflation in the next five years or so?

Code PERCENT (1-100), except:
996. Zero percent
998. DK
999. NA
- PJOB A28b. During the next 5 years, what do you think the chances are (226) that you (or your husband/wife/partner) will lose a job you wanted to keep?

Code PERCENT (1-100), except:
996. Zero percent
998. DK
999. NA
- PSSA A28c. What do you think the chances are that [IF R UNDER AGE 65] (227) (when you retire,) your income from Social Security and job pensions will be adequate to maintain your living standards?

Code PERCENT (1-100), except:
996. Zero percent
998. DK
999. NA
- PCRY A28d. Compared with 5 years ago, do you think the chances that (228) you (and your husband/wife/partner) will have a comfortable retirement have gone up, gone down, or remained the same?

1. GONE UP
3. SAME
5. GONE DOWN
8. DK
9. NA

PSTK A29. The next question is about investing in the stock market.
(250) Please think about the type of mutual fund known as a diversified stock fund. This type of mutual fund holds stock in many different companies engaged in a wide variety of business activities. Suppose that tomorrow someone were to invest one thousand dollars in such a mutual fund. Please think about how much money this investment would be worth one year from now.

What do you think is the percent chance that this one thousand dollar investment will increase in value in the year ahead, so that it is worth more than one thousand dollars one year from now?

998. DK

999. NA

PINC2 A29a. Next I would like to ask you about your OWN (personal)
(252) income prospects in the next twelve months. What do you think is the percent chance that your income in the next twelve months will be higher than your income in the past twelve months?

ICS The Index of Consumer Sentiment

The Index of Consumer Sentiment (ICS) is calculated using the following formula, in which the component questions ($x_1 \dots x_5$) are listed below. The relative scores of the 5 component questions are used in the equation and are defined as the percent giving favorable replies minus the percent giving unfavorable replies, plus 100. Each relative score is rounded to the nearest whole number. The denominator of the formula is the 1966 base period total of 6.7558, and the added constant (n) is to correct for sample design changes from the 1950s. Prior to December 1981, $n=2.7$; for December 1981 and after, $n=2.0$.

$$ICS = \frac{X_1 + X_2 + X_3 + X_4 + X_5}{6.7558} + n$$

The Index of Consumer Sentiment is derived from the following five questions:

- x_1 = "We are interested in how people are getting along financially these days. Would you say that you (and your family living there) are better off or worse off financially than you were a year ago?"
- x_2 = "Now looking ahead--do you think that a year from now you (and your family living there) will be better off financially, or worse off, or just about the same as now?"
- x_3 = "Now turning to business conditions in the country as a whole--do you think that during the next twelve months we'll have good times financially, or bad times, or what?"
- x_4 = "Looking ahead, which would you say is more likely--that in the country as a whole we'll have continuous good times during the next five years or so, or that we will have periods of widespread unemployment or depression, or what?"
- x_5 = "About the big things people buy for their homes-- such as furniture, a refrigerator, stove, television, and things like that. Generally speaking, do you think now is a good or bad time for people to buy major household items?"

ICC The Index of Current Economic Conditions

ICE The Index of Consumer Expectations

Using the same procedures given above, the Index of Current Economic Conditions (ICC) and the Index of Consumer Expectations (ICE) are calculated as follows.

$$ICC = \frac{X_1 + X_5}{2.6424} + n$$

$$ICE = \frac{X_2 + X_3 + X_4}{4.1134} + n$$
