

**Justification:**

There have been 4 clarifying questions added to the first section of the survey, *Project Identification*. This section asks basic project information of the respondents and allows us to tie their survey responses to their project. These additional clarifying questions will utilize a skip logic that enables respondents to skip those sections that do not pertain to their project.

These four questions are meant to assist the State Tourism Grantee respondents in better understanding how to answer the rest of the survey questions. Based upon the response to these questions, respondents receive additional instructions to either help them answer the rest of the survey (“*Please complete the applicable sections below based on the work completed by your organization and forward the survey to your subaward recipients for them to complete the survey*”) or thank them for their participation and end the survey (“*Thank for providing that information. Please forward the survey to your subaward recipients for them to complete the survey. (The Survey ends)*”) These four clarifying questions would only apply to around a subset of the respondents (around 58 respondents).
