CDC Women's Health Study

Thank you for your interest in this study!

EurekaFacts, an independent research company, has been contracted by the Centers for Disease Control and Prevention (CDC) for an important study. We are looking to hear from **Spanish-speaking** Hispanic/Latina women about women's health and the role that culture plays in their health choices. Conversation sessions with Spanish-speaking Hispanic/Latina women will be held both online and in-person. We would like to hear your honest feelings, thoughts, and experiences during a safe, non-judgmental, and respectful group conversation. Participation is voluntary. Your responses will be kept confidential –we will not share personal information or responses with anyone outside the research team.

Introduction page (2 of 2):

- Each conversation session will be **about 90 minutes**.
- Conversation sessions will either be **online OR in-person**.
- At the end of a session, each participant will receive a **\$75 gift card*** for their time and effort (*e-gift card for those who participate in a virtual focus group and physical gift card for those who participate in an in-person focus group).

To see if you are eligible for this study, please answer the following questions. It should take about 10 minutes to fill out. Please keep in mind that we will not share your answers with anyone.

Click the arrow to continue.

Privacy Act Statement

The information you are being asked to provide is subject to the Privacy Act and is covered by the System of Records Notice (SORN) 09-20-0136, "Epidemiologic Studies and Surveillance of Disease Problems". Providing this information is voluntary. The principal purposes for which CDC will use the information that you provide for the CDC Women's Health Study are to (1) understand folic acid and fortified food awareness, as well as food and supplement use practices, (2) develop new messaging and communication products to improve knowledge, awareness, and practices, and (3) inform future intervention activities to prevent neural tube defects among Hispanic/Latina women of reproductive age. The information that you provide for the KAPs Women's Health Study will only be used to conduct the project. The information you provide will be maintained in a Privacy Act system of records and will be used and may be disclosed for the purposes and routine uses as described and published in the aforementioned SORN which can be found at: www.hhs.gov/foia/privacy/sorns/09200136/index.html

Screenshot of Q1:

English
