

Note: *The draft you are looking for begins on the next page.*

Caution: DRAFT—NOT FOR FILING

This is an early release draft of an IRS tax form, instructions, or publication, which the IRS is providing for your information. **Do not file draft forms** and do **not** rely on draft forms, instructions, and pubs for filing. We incorporate all significant changes to forms posted with this coversheet. However, unexpected issues occasionally arise, or legislation is passed—in this case, we will post a new draft of the form to alert users that changes were made to the previously posted draft. Thus, there are never any changes to the last posted draft of a form and the final revision of the form. Forms and instructions are subject to OMB approval before they can be officially released, so we post drafts of them until they are approved. Drafts of instructions and pubs usually have some additional changes before their final release. Early release drafts are at [IRS.gov/DraftForms](https://www.irs.gov/DraftForms) and remain there after the final release is posted at [IRS.gov/LatestForms](https://www.irs.gov/LatestForms). Also see [IRS.gov/Forms](https://www.irs.gov/Forms).

Most forms and publications have a page on IRS.gov: [IRS.gov/Form1040](https://www.irs.gov/Form1040) for Form 1040; [IRS.gov/Pub501](https://www.irs.gov/Pub501) for Pub. 501; [IRS.gov/W4](https://www.irs.gov/W4) for Form W-4; and [IRS.gov/ScheduleA](https://www.irs.gov/ScheduleA) for Schedule A (Form 1040), for example, and similarly for other forms, pubs, and schedules for Form 1040. When typing in a link, type it into the address bar of your browser, not a Search box on IRS.gov.

If you wish, you can submit comments to the IRS about draft or final forms, instructions, or pubs at [IRS.gov/FormsComments](https://www.irs.gov/FormsComments). Include “NTF” followed by the form or pub number (for example, “NTF1040”, “NTFW4”, “NTF501, etc.) in the body of the message to route your message properly. We cannot respond to all comments due to the high volume we receive and may not be able to consider many suggestions until the subsequent revision of the product, but we will review each “NTF” message. If you have comments on reducing paperwork and respondent (filer) burden, with respect to draft or final forms, please respond to the relevant information collection through the Federal Register process; for more info, click [here](#).

Instructions for Form 8933

Department of the Treasury
Internal Revenue Service

(Rev. December 2023)

Carbon Oxide Sequestration Credit

Section references are to the Internal Revenue Code unless otherwise noted.

Future Developments

For the latest information about developments related to Form 8933 and its instructions, such as legislation enacted after they were published, go to [IRS.gov/Form8933](https://www.irs.gov/Form8933).

What's New

Credit rates and applicable dollar amounts. The credit rates for Part III, lines 1 through 6, are adjusted for inflation and increased, per Notice 2023-46. The applicable dollar amounts for Part III, lines 7 through 9, are established by linear interpolation between statutory dollar amounts and increased, per Notice 2018-93. The new applicable dollar amounts for Part III, lines 10 through 15, are established by the Inflation Reduction Act of 2022 (IRA22). See [2023 inflation adjusted credit rates and applicable dollar amounts](#), later.

Elective payment election. For tax years beginning after 2022, applicable entities as defined in section 6417(d)(1)(A) can elect to treat the carbon oxide sequestration credit for a qualified facility or equipment installed in a qualified facility and placed in service after 2022 as an elective payment. Section 6417(d)(1)(C) also allows a taxpayer not described in section 6417(d)(1)(A), including a partnership and an S corporation, to treat carbon oxide sequestration credit as an elective payment. See [Elective Payment Election for Carbon Oxide Sequestration Credit Under Section 6417](#), later.

Transfer of certain credits. For tax years beginning after 2022, entities that aren't applicable entities, including partnerships and S corporations, may transfer all or a portion of the section 45Q(a) credit with respect to a new or existing facility to an unrelated third-party buyer in exchange for cash. See [Election To Transfer Carbon Oxide Sequestration Credit Under Section 6418](#), later.

Facility information. As a result of recent tax law changes, Form 8933 and its instructions were changed to require separate information and computation of carbon oxide sequestration credit for each qualified facility or equipment installed in a qualified facility. See [Part II. Information About Facility](#), later.

Reminders

A summary of major changes to section 45Q is as follows. IRA22:

- Extended the deadline to begin construction of qualified facility from 2026 to 2033.
- Changed the base rate for section 45Q(b)(1)(A)(i)(I) and (II) rates to \$17 and \$12 (\$85 and \$60 if section 45Q(h)(2) requirements are met), respectively, for tax years beginning after 2022.

- Changed the base rate for section 45Q(b)(1)(B)(i) and (ii) rates to \$36 and \$26 (\$180 and \$130 if section 45Q(h)(2) requirements are met), respectively, for direct air capture facilities, for tax years beginning after 2022.
- Reduced annual thresholds of captured carbon oxide for qualified electric generating facility, a qualified direct air capture facility, and any other facility. See [Qualified facility](#).
- Changed credit reduction percentage to 15%. See [Coordination With Section 142 Bond Financing](#).
- Added definitions for new terms, including [Applicable electric generating unit](#), [Baseline carbon oxide production](#), and [Capacity factor](#).
- Allows the section 45Q(f)(9) election for carbon oxide captured and disposed of after 2021 for a qualified facility located in a federally declared disaster area. See [Section 45Q\(f\)\(9\) Election](#).
- Made prevailing wage and apprenticeship requirements. See Notice 2022-61, 2022-52 I.R.B. 561, available at [IRS.gov/irb/2022-52_IRB#NOT-2022-61](https://www.irs.gov/irb/2022-52_IRB#NOT-2022-61). See [Increased Credit Amount for Qualified Facilities and Equipment](#) to determine your qualification for the increased credit amounts by meeting certain requirements.

General Instructions

Purpose of Form

Use Form 8933 to claim the section 45Q carbon oxide sequestration credit. See [Definitions](#), later.

For purposes of this form, a partner in a partnership that has made a valid section 761(a) election will be considered the taxpayer. Partnerships with valid section 761(a) elections aren't required to complete or file this form. Instead, the partner is required to complete and file this form in a manner commensurate with its undivided ownership interest in the qualified facility. Also, see Rev. Proc. 2020-12, 2020-11, I.R.B. 511, for allocation safe harbor. However, if you elect to use the January 2021 Treasury Decision 9944 (TD), the section 761(a) election applies only in the case of qualified carbon oxide captured using carbon capture equipment that's originally placed in service at a qualified facility before February 9, 2018. For qualified carbon oxide captured using carbon capture equipment that's originally placed in service at a qualified facility on or after February 9, 2018, for each single process train of carbon capture equipment (as described in Regulations section 1.45Q-2(c)(3)), only one taxpayer will be considered the person to whom the credit is attributable and only that person may claim the carbon oxide sequestration credit. See Regulations section 1.45Q-1(h)(1).

Taxpayers other than partnerships or S corporations whose only source of this credit is from those pass-through entities (other than a partnership with a valid 761(a) election) aren't required to complete or file this

form. Instead, report this credit directly on line 1x in Part III of Form 3800, General Business Credit.

How To Figure the Credit

Subject to the section 45Q(f)(3)(B) election (discussed later), section 45Q(a)(1) allows a credit of \$20 per metric ton of qualified carbon oxide captured by you using carbon capture equipment that's (1) originally placed in service at a qualified facility before February 9, 2018, (2) disposed of by you in secure geological storage, and (3) not used by you as a tertiary injectant in a qualified enhanced oil recovery (EOR) or natural gas recovery project or utilized by you in a manner described in section 45Q(f)(5).

Section 45Q(a)(2) allows a credit of \$10 per metric ton of qualified carbon oxide (1) captured by you using carbon capture equipment that's originally placed in service at a qualified facility before February 9, 2018; and (2) either (a) used by you as a tertiary injectant in a qualified EOR or natural gas recovery project and disposed of by you in secure geological storage, or (b) utilized by you in a manner described in section 45Q(f)(5).

Section 45Q(a)(3) allows a credit of the applicable dollar amount (as determined under section 45Q(b)(1)) per metric ton of qualified carbon oxide (1) captured by you using carbon capture equipment that's originally placed in service at a qualified facility on or after February 9, 2018, during the 12-year period beginning on the date the equipment was originally placed in service, (2) disposed of by you in secure geological storage, and (3) neither used as a tertiary injectant in a qualified EOR or natural gas recovery project nor utilized in a manner described in section 45Q(f)(5).

Section 45Q(a)(4) allows a credit of the applicable dollar amount (as determined under section 45Q(b)(1)) per metric ton of qualified carbon oxide (1) captured by you using carbon capture equipment that's originally placed in service at a qualified facility on or after February 9, 2018, during the 12-year period beginning on the date the equipment was originally placed in service; and (2) either (a) used by you as a tertiary injectant in a qualified EOR or natural gas recovery project and disposed of by you in secure geological storage, or (b) utilized in a manner described in section 45Q(f)(5).

For purposes of determining the credit, you may elect under section 45Q(b)(3) to have the dollar amounts applicable under section 45Q(a)(1) or (2) apply in lieu of the dollar amounts applicable under section 45Q(a)(3) or (4) for each metric ton of qualified carbon oxide that's captured by you using carbon capture equipment that's originally placed in service at a qualified facility on or after February 9, 2018.

For the purpose of calculating the credit, a metric ton of carbon oxide includes only the contained weight of the carbon oxide. The weight of any other substances, such as water or impurities, isn't included in the calculation.

2023 inflation adjusted credit rates and applicable dollar amounts. The credit rates for Part III, lines 1b, 2b, 3b, 4b, 5b, and 6b are increased by the adjustment for inflation. The rates are as follows.

- Line 1b: \$26.94 per metric ton.

- Line 2b: \$13.47 per metric ton.
- Line 3b: \$13.47 per metric ton.
- Line 4b: \$26.94 per metric ton.
- Line 5b: \$13.47 per metric ton.
- Line 6b: \$13.47 per metric ton.

See Notice 2023-46, 2023-26 I.R.B. 1086, available at [IRS.gov/irb/2023-26_IRB#NOT-2023-46](https://www.irs.gov/irb/2023-26_IRB#NOT-2023-46).

For any tax year beginning in a calendar year after 2016 and before 2027, the section 45Q(b)(1)(A) (as in effect before August 16, 2022) applicable dollar amounts for Part III, lines 7b, 8b, and 9b, are established by linear interpolation between \$22.66 and \$50, and \$12.83 and \$35, respectively. The applicable dollar amounts are as follows.

- Line 7b: \$40.89 per metric ton.
- Line 8b: \$27.61 per metric ton.
- Line 9b: \$27.61 per metric ton.

See Notice 2018-93, 2018-51 I.R.B. 1041, available at [IRS.gov/irb/2018-51_IRB#NOT-2018-93](https://www.irs.gov/irb/2018-51_IRB#NOT-2018-93).

For any tax year after 2022, the section 45Q(b)(1)(A) applicable dollar amounts are as follows.

- Line 10b: \$17 per metric ton.
- Line 11b: \$12 per metric ton.
- Line 12b: \$12 per metric ton.

For any tax year after 2022, the section 45Q(b)(1)(B) applicable dollar amounts for direct air capture facilities are as follows.

- Line 13b: \$36 per metric ton.
- Line 14b: \$26 per metric ton.
- Line 15b: \$26 per metric ton.

Qualified facilities or any carbon capture equipment installed at a qualified facility and placed in service after 2022 that satisfy certain requirements may claim an increased credit amount. See [Increased Credit Amount for Qualified Facilities and Equipment](#) and the specific instructions for lines 4–6 and lines 10–15, later.

Amount captured by additional carbon capture equipment on existing qualified facility. For a qualified facility placed in service before February 9, 2018, for which additional carbon capture equipment is placed in service on or after February 9, 2018, the amount of qualified carbon oxide that's captured by you is the following.

- For purposes of lines 1 through 6, equal to the lesser of (a) the total amount of qualified carbon oxide captured at such facility for the tax year, or (b) the total amount of the carbon dioxide capture capacity of the carbon capture equipment in service at such facility on the day before February 9, 2018.
- For purposes of lines 7 through 15, an amount (not less than zero) equal to the excess of (a) the total amount of qualified carbon oxide captured at such facility for the tax year, over (b) the total amount of the carbon dioxide capture capacity of the carbon capture equipment in service at such facility on the day before February 9, 2018.

Definitions

Qualified carbon oxide. This is (a) any carbon dioxide captured from an industrial source by carbon capture equipment originally placed in service before February 9, 2018, which would otherwise be released into the

atmosphere as industrial emission of greenhouse gas or lead to such release, and is measured at the source of capture and verified at the point of disposal, injection, or utilization; (b) any carbon dioxide or other carbon oxide that's captured from an industrial source by carbon capture equipment originally placed in service on or after February 9, 2018, which would otherwise be released into the atmosphere as industrial emission of greenhouse gas or lead to such release, and is measured at the source of capture and verified at the point of disposal, injection, or utilization; or (c) in the case of a direct air capture (DAC) facility, any carbon dioxide that's captured directly from the ambient air, and is measured at the source of capture and verified at the point of disposal, injection, or utilization.

Qualified carbon oxide includes the initial deposit of captured carbon oxide used as a tertiary injectant. It doesn't include carbon oxide that's recaptured, recycled, and re-injected as part of the EOR and natural gas recovery process.

Carbon capture equipment. This includes all components of property that are used to capture or process carbon oxide until the carbon oxide is transported for disposal, injection, or utilization. Carbon capture equipment is equipment used for the purpose of (1) separating, purifying, drying, and/or capturing carbon oxide that would otherwise be released into the atmosphere from an industrial facility; (2) removing carbon oxide from the atmosphere via DAC; or (3) compressing or otherwise increasing the pressure of carbon oxide.

All components that make up an independently functioning process train capable of capturing, processing, and preparing carbon oxide for transport will be treated as a single unit of carbon capture equipment (single process train). See Rev. Rul. 2021-13, 2021-30 I.R.B. 152, available at [IRS.gov/irb/2021-30_IRB#REV-RUL-2021-13](https://www.irs.gov/irb/2021-30_IRB#REV-RUL-2021-13).

Applicable electric generating unit. An applicable electric generating unit is the principal electric generating unit for which the carbon capture equipment is originally planned and designed.

Baseline carbon oxide production. A baseline carbon oxide production means either of the following.

- In the case of an applicable electric generating unit that was originally placed in service more than 1 year prior to the date on which construction of the carbon capture equipment begins, the average annual carbon oxide production, by mass, from such unit during (i) in the case of an applicable electric generating unit that was originally placed in service more than 1 year prior to the date on which construction of the carbon capture equipment begins and on or after the date that's 3 years prior to the date on which construction of such equipment begins, the period beginning on the date such unit was placed in service and ending on the date on which construction of such equipment began; and (ii) in the case of an applicable electric generating unit that was originally placed in service more than 3 years prior to the date on which construction of the carbon capture equipment begins, the 3 years with the highest annual carbon oxide production during the 12-year period preceding the date on which construction of such equipment began.

- In the case of an applicable electric generating unit that (i) as of the date on which construction of the carbon capture equipment begins, is not yet placed in service; or (ii) was placed in service during the 1-year period prior to the date on which construction of the carbon capture equipment begins, the designed annual carbon oxide production, by mass, as determined based on an assumed capacity factor of 60%.

Capacity factor. Capacity factor means the ratio (expressed as a percentage) of the actual electric output from the applicable electric generating unit to the potential electric output from such unit.

Industrial facility. An industrial facility is a facility that produces a carbon oxide stream from a fuel combustion source or fuel cell, a manufacturing process, or a fugitive carbon oxide emission source that, absent capture and disposal, would otherwise be released into the atmosphere as industrial emission of greenhouse gas or lead to such release. An industrial facility doesn't include a facility that produces carbon dioxide from carbon dioxide production wells at natural carbon dioxide-bearing formations or a naturally occurring subsurface spring. Depending on your election to use the June 2020 Notice of Proposed Rulemaking (NPRM) or the TD, see section 3.02(b) of Notice 2009-83 or Proposed Regulations section 1.45Q-2(d)(1) or Regulations section 1.45Q-2(d)(1) and (d)(2). An **Industrial Source** is an emission of carbon oxide from an industrial facility. A **Manufacturing Process** is a process involving the manufacture of products, other than carbon oxide, that are intended to be sold at a profit, or are used for a commercial purpose. All facts and circumstances for the process and products are to be taken into account.

Electricity generating facility. An electricity generating facility is a facility described in section 45Q(d)(2)(A) or (B) and is subject to depreciation under MACRS asset class 49.11 (Electric Utility Hydraulic Production Plant), 49.12 (Electric Utility Nuclear Production Plant), 49.13 (Electric Utility Steam Production Plant), or 49.15 (Electric Utility Combustion Turbine Production Plant).

Direct air capture (DAC) facility. A DAC facility means any facility that uses carbon capture equipment to capture carbon oxide directly from the ambient air. It doesn't include any facility that captures carbon dioxide (1) that's deliberately released from naturally occurring subsurface springs, or (2) using natural photosynthesis.

Qualified facility. Any industrial facility or DAC facility (a) the construction of which begins before January 1, 2033, and the construction of carbon capture equipment begins before that date, or the original planning and design for the facility includes installation of carbon capture equipment; and (b) which captures:

1. In the case of a DAC facility, captures not less than 1,000 metric tons of qualified carbon oxide during the tax year;

2. In the case of an electricity generating facility that (i) captures not less than 18,750 metric tons of qualified carbon oxide during the tax year; and (ii) for any carbon capture equipment for the applicable electric generating unit at such facility, has a capture design capacity of not

less than 75% of the baseline carbon oxide production of such unit; or

3. In the case of any other facility, captures not less than 12,500 metric tons of qualified carbon oxide during the tax year.

Qualified EOR or natural gas recovery project. A qualified EOR or natural gas recovery project means any project located in the United States involving the application of one or more tertiary recovery methods defined in section 193(b)(3) that can reasonably be expected to result in more than an insignificant increase in the amount of crude oil or natural gas that will ultimately be recovered and for which the first injection of liquids, gases, or other matter begins after 1990.

Natural gas. Natural gas means any product (other than crude oil) of an oil or gas well if a deduction for depletion is allowable under section 611 for such product.

Tertiary injectant. An injectant (other than a hydrocarbon injectant that's recoverable) that's used as part of a tertiary recovery method. For more details, see section 193(b).

Secure geological storage. Secure geological storage includes, but isn't limited to, storage at deep saline formations, oil and gas reservoirs, and unminable coal seams.

If you're claiming a credit for a facility placed in service before February 9, 2018, the following applies.

- Secure geological storage requires approval by the U.S. Environmental Protection Agency (EPA) of a Monitoring, Reporting, and Verification Plan (MRV Plan) submitted by the operator of the storage facility or tertiary injection project.
- The annual amount of carbon oxide claimed for the credit must be consistent with amounts reported to the EPA under its Greenhouse Gas Reporting Program, subpart RR.

See Sections 6 through 8 of Notice 2009-83, 2009-44 I.R.B. 588, available at [IRS.gov/irb/2009-44_IRB#NOT-2009-83](https://www.irs.gov/irb/2009-44_IRB#NOT-2009-83) for reporting and recordkeeping requirements associated with the limitation on credits available under former section 45Q(a) (as in effect before February 9, 2018) and sections 45Q(a)(1) and (2). Sections 1 through 5 of Notice 2009-83 were obsoleted by REG-112339-19, 85 F.R. 34050-34075. After the end of the calendar year in which the Secretary, in consultation with the Administrator of the EPA, certifies that a total of 75,000,000 metric tons of qualified carbon oxide have been taken into account under former section 45Q(a) (as in effect before February 9, 2018) and sections 45Q(a)(1) and (2), the remaining sections of Notice 2009-83 will be obsoleted. Also see Notice 2022-38, 2022-39 I.R.B. 239, available at [IRS.gov/irb/2022-39_IRB#NOT-2022-38](https://www.irs.gov/irb/2022-39_IRB#NOT-2022-38).

If you're claiming a credit for a facility that was placed in service in tax years beginning on or after February 9, 2018, qualified carbon oxide is considered disposed of by you in secure geological storage such that the qualified carbon oxide doesn't escape into the atmosphere if the qualified carbon oxide is:

- Stored, and not used as a tertiary injectant in a qualified EOR or natural gas recovery project, in compliance with applicable requirements under 40 CFR Part 98 subpart RR;
- Used as a tertiary injectant in a qualified EOR or natural gas recovery project and stored in compliance with applicable requirements under 40 CFR Part 98 subpart RR, or the International Organization for Standardization (ISO) standards endorsed by the American National Standards Institute (ANSI) under CSA/ANSI ISO 27916:19, Carbon dioxide capture, transportation and geological storage—Carbon dioxide storage using enhanced oil recovery (CO₂-EOR); and
- Injected into a well that complies with applicable Underground Injection Control regulations onshore or offshore under submerged lands within the territorial jurisdiction of the United States.

Utilization of qualified carbon oxide. Utilization of qualified carbon oxide means (1) the fixation of such qualified carbon oxide through photosynthesis or chemosynthesis, such as through the growing of algae or bacteria; (2) the chemical conversion of such qualified carbon oxide to a material or chemical compound in which such qualified carbon oxide is securely stored; or (3) the use of such qualified carbon oxide for any other purpose for which a commercial market exists (with the exception of use as a tertiary injectant in a qualified EOR or natural gas recovery project), as determined by the Secretary of the Treasury or her delegate.

United States and U.S. territories. This includes the seabed and subsoil of those submarine areas that are adjacent to the territorial waters of the United States (or a U.S. territory) and over which the United States has exclusive rights, in accordance with international law, for the exploration and exploitation of natural resources.

Who Can Claim the Credit

The credit is attributable to you in the case of qualified carbon oxide captured using carbon capture equipment that's originally placed in service at a qualified facility on or after February 9, 2018, if you're the person that owns the carbon capture equipment and physically or contractually ensures the disposal, utilization, or use as a tertiary injectant of this qualified carbon oxide.

Elections

Section 45Q(b)(3) Election

You can elect to have the credit rates applicable to Part III, lines 1b, 2b, 3b, 4b, 5b, and 6b apply instead of the applicable dollar amounts applicable to Part III, lines 7b, 8b, 9b, 10b, 11b, 12b, 13b, 14b, and 15b for each metric ton of qualified carbon oxide that's captured by you using carbon capture equipment that's originally placed in service at a qualified facility on or after February 9, 2018.

Section 45Q(f)(6) Election

For purposes of section 45Q, for any tax year in which such facility is an applicable facility (a facility placed in service before February 9, 2018, and for which no taxpayer claimed a carbon oxide sequestration credit for any tax year ending before February 9, 2018) that captures not less than 500,000 metric tons of qualified

carbon oxide during the tax year, you can elect to have the facility, and any carbon capture equipment placed in service at the facility, treated as placed in service on February 9, 2018.

You make a section 45Q(f)(6) election by filing a statement of election with your income tax return for each tax year in which the credit arises. In addition to any information required on Form 8933, your statement of election must show your name, address, taxpayer identification number, location, and the identification number(s) assigned to the facility by the EPA's electronic Greenhouse Gas Reporting Tool (e-GGRT ID number(s)) (if available).

Note. EPA e-GGRT ID number(s) are identification number(s) assigned to the facility by the EPA's electronic Greenhouse Gas Reporting Tool.

Section 45Q(f)(3)(B) Election

In the case of qualified carbon oxide captured using carbon capture equipment that's originally placed in service at a qualified facility before February 9, 2018, if you're the person that captures and physically or contractually ensures the disposal, injection, or utilization of the qualified carbon oxide, the credit is attributable to you. You may claim the credit, or you may elect to allow the credit to the person that disposes of, injects, or utilizes the qualified carbon oxide. If you make this election, the amount you elect to allow won't be allowed to you. You can also elect to allow only part of the credit to the person that disposes of, injects, or utilizes the qualified carbon oxide in a tax year, and to claim the remainder yourself.

In the case of qualified carbon oxide captured using carbon capture equipment that's originally placed in service at a qualified facility on or after February 9, 2018, if you're the person that owns the carbon capture equipment and physically or contractually ensures the capture and disposal, utilization, or use as a tertiary injectant of such carbon oxide, you may check the box to elect to allow the credit to another person that disposes of, injects, or utilizes the qualified carbon oxide. If you make this election, the amount you elect to allow won't be allowed to you. You can also elect to allow only part of the credit to the person that disposes of, injects, or utilizes the qualified carbon oxide in a tax year, and to the claim the remainder yourself.

A new section 45Q(f)(3)(B) election must be made annually. You make a section 45Q(f)(3)(B) election by filing a statement of election (see [Model Certificate ELECT](#), later, and the information below) with the Form 8933 no later than the time prescribed by law (including extensions) for filing your federal income tax return or Form 1065, U.S. Return of Partnership Income, for the year in which the credit arises. You must make a separate election for each qualified facility.

The election may not be filed with an amended federal income tax return, an amended Form 1065, or an Administrative Adjustment Request (AAR), as applicable, after the prescribed date (including extensions) for filing the original federal income tax return or Form 1065 for the year, with the exception of amended federal income tax returns, amended Forms 1065, or

AARs, as applicable, for any tax year ending after February 9, 2018, and beginning on or before January 13, 2021. The amended federal income tax return or the amended Form 1065 must be filed, in no event, later than the applicable period of limitations on assessment for the tax year for which the amended federal income tax return or Form 1065 is being filed.

Information required to be provided by electing taxpayer.

- Election statement of the electing taxpayer on Form 8933 must indicate that an election is being made under section 45Q(f)(3)(B);
- The electing taxpayer must provide each credit claimant with a copy of the electing taxpayer's Form 8933; and
- The electing taxpayer must, in addition to any information required on Form 8933, set forth the following information:
 1. The electing taxpayer's name, address, taxpayer identification number, location, and e-GGRT ID number(s) (if available) of each qualified facility where carbon oxide was captured;
 2. The full amount of credit attributable to the taxpayer prior to the election;
 3. The name, address, and taxpayer identification number of each credit claimant, and the location and EPA e-GGRT ID number(s) (if available) of each secure geological storage facility where the qualified carbon oxide is disposed of or injected;
 4. The dollar amount of credits the taxpayer is allowing each credit claimant to claim and the corresponding metric tons of qualified carbon oxide; and
 5. The dollar amount of credits retained by the electing taxpayer and the corresponding metric tons of qualified carbon oxide.

Information required to be provided by credit claimant.

- The credit claimant must include the following information on Form 8933 with its timely filed federal income tax return or Form 1065 (including extensions).
- The name, address, and taxpayer identification number of the credit claimant;
 - The name, address, and taxpayer identification number of each taxpayer making an election under section 45Q(f)(3)(B) to allow the credit to the credit claimant;
 - The location and EPA e-GGRT ID number(s) (if available) of each qualified facility where carbon oxide was captured;
 - The location and EPA e-GGRT ID number(s) (if available) of each secure geological storage facility where the qualified carbon oxide is disposed of or injected;
 - The full dollar amount of credits attributable to each electing taxpayer prior to the election and the corresponding metric tons of carbon oxide;
 - The dollar amount of credits that each electing taxpayer is allowing the credit claimant to claim and the corresponding metric tons of carbon oxide; and
 - A copy of the electing taxpayer's Form 8933.

Section 45Q(f)(9) Election

For purposes of section 45Q(a)(3) and (4), a person described in section 45Q(f)(3)(A)(ii) may elect, at such time and in such manner as the Secretary may prescribe,

to have the 12-year period begin on the first day of the first tax year in which a credit under this section is claimed for carbon capture equipment that's originally placed in service at a qualified facility on or after February 9, 2018, if:

- No one claimed a credit under this section for such carbon capture equipment for any prior tax year;
- The qualified facility at which such carbon capture equipment is placed in service is located in an area affected by a federally declared disaster (as defined by section 165(i)(5)(A)) after the carbon capture equipment is originally placed in service; and
- Such federally declared disaster results in a cessation of the operation of the qualified facility or the carbon capture equipment after such equipment is originally placed in service.

Application of Section 45Q for Certain Carbon Capture Equipment

In the case of any carbon capture equipment placed in service before February 9, 2018, the credit will apply to qualified carbon oxide captured using such equipment before the end of the calendar year in which the Secretary, in consultation with the Administrator of the EPA, certifies that, during the period beginning after October 3, 2008, a total of 75,000,000 metric tons of qualified carbon oxide have been taken into account in accordance with section 45Q(a), as in effect on the day before February 9, 2018, and section 45Q(a)(1) and (2).

Effective August 16, 2022, in the case of any carbon capture equipment placed in service before February 9, 2018, the credit will apply to qualified carbon oxide captured using such equipment before the earlier of January 1, 2023, and the end of the calendar year in which the Secretary, in consultation with the Administrator of the EPA, certifies that during the period beginning after October 3, 2008, a total of 75,000,000 metric tons of qualified carbon oxide have been taken into account in accordance with section 45Q(a), as in effect on the day before February 9, 2018, and section 45Q(a)(1) and (2). See section 45Q(g) as amended by IRA22 and Notice 2022-38.

When Construction Begins

Two methods can be used to establish that construction of a qualified facility or carbon capture equipment has begun.

1. **Physical Work Test** is satisfied when physical work of a significant nature begins and other requirements provided in Section 5 of Notice 2020-12, 2020-11 I.R.B. 495, available at [IRS.gov/irb/2020-11_IRB#NOT-2020-12](https://www.irs.gov/irb/2020-11_IRB#NOT-2020-12), are met.

2. **Five Percent Safe Harbor** is satisfied when you pay or incur (within the meaning of Regulations section 1.461-1(a)(1) and (2)) 5% or more of the total cost of a qualified facility or carbon capture equipment and meets other requirements provided in Notice 2020-12, Section 6.

Although both methods can be used, only one method is needed to establish that construction of a qualified facility or carbon capture equipment has begun. If you began construction on a qualified facility or carbon capture equipment by satisfying either the Physical Work

Test or the Five Percent Safe Harbor, or both, before the effective date of Notice 2020-12 (March 9, 2020), you may use March 9, 2020, as the date that construction began on such qualified facility or carbon capture equipment. Additionally, if you began construction on a qualified facility or carbon capture equipment before March 9, 2020, under both the Physical Work Test and the Five Percent Safe Harbor, you may choose either method (but not both) for the purpose of applying the beginning of construction rules. If you began construction on a qualified facility or carbon capture equipment on or after March 9, 2020, construction will be deemed to have begun on the date you first satisfy either the Physical Work Test or the Five Percent Safe Harbor. If you fail to satisfy the Five Percent Safe Harbor in one year due to cost overruns (as defined in Section 6.03 of Notice 2020-12), you won't be prevented from using the Physical Work Test in a later year to establish beginning of construction, provided that occurs before January 1, 2033.

Increased Credit Amount for Qualified Facilities and Equipment

Notice 2022-61 explains how claimants, including taxpayers, tax-exempt and government entities, and non-taxable pass-through entities, receive increased credit amount for any qualified facility or equipment placed in service after December 31, 2022, by satisfying certain requirements. In the case of any qualified facility or equipment installed in any qualified facility, the amount of the credit rates as adjusted for inflation or applicable dollar amounts are multiplied by 5 if any one of the following requirements are met.

- A qualified facility the construction of which begins prior to January 29, 2023;
- Carbon equipment the construction of which begins prior to January 29, 2023, and installed in a qualified facility; or
- A qualified facility or equipment that satisfies the prevailing wage and apprenticeship requirements.

Additional information. If you checked the box and claimed an increased credit amount on lines 4a, 5a, 6a, 10a, 11a, 12a, 13a, 14a, or 15a in Part III, you must attach a statement to Form 8933 that includes the following information.

1. Your name and taxpayer identification number and the facility or equipment description and IRS-issued registration number (if applicable) from Part II.
2. If construction began before January 29, 2023, as shown on Part II, line 5, a statement that you met the Continuity Requirement under the Physical Work Test or the Five Percent Safe Harbor to establish the beginning of construction (alteration or repairs).
3. If construction began on or after January 29, 2023, include the following.
 - The applicable wage determinations (as defined below).
 - The wages paid (including any correction payments as defined in section 45(b)(7)(B)(i)(I)) and hours worked for each of the laborer or mechanic classifications engaged in the construction (alteration or repairs) of the facility or equipment.

- The number of workers who received correction payments.
- The wages paid and hours worked by qualified apprentices for each of the laborer or mechanic classifications engaged in the construction (alteration or repairs) of the facility or equipment.
- The total labor hours for the construction (alteration or repairs) of the facility or equipment installed at a facility by any laborer or mechanic employed by the taxpayer or any contractor or subcontractor.

4. A declaration, applicable to the statement and any accompanying documents, signed by you, or signed by a person currently authorized to bind you in such matters, in the following form: "Under penalties of perjury, I declare that I have examined this statement, including accompanying documents, and to the best of my knowledge and belief, the facts presented in support of this statement are true, correct, and complete."

Applicable wage determinations mean the wage listed for a particular classification of laborer or mechanic on the applicable wage determination for the type of construction and the geographic area or other applicable wage as determined by the Secretary of Labor. See Notice 2022-61 for more information.

Prevailing Wage Requirements

For any qualified facility and any carbon capture equipment placed in service at such facility, you must ensure that any laborers and mechanics employed by you or any contractor or subcontractor in (i) the construction of such facility or equipment, and (ii) for any tax year, for any portion of such tax year that's within the period described in section 45Q(a)(3)(A) or (4)(A), the alteration or repair of such facility or such equipment, must be paid wages at rates not less than the prevailing rates for construction, alteration, or repair of a similar character in the locality in which such facility and equipment are located as most recently determined by the Secretary of Labor, in accordance with subchapter IV of chapter 31 of title 40, United States Code. See Notice 2022-61 for details.

For information on how to correct a failure to satisfy the prevailing wage requirements, and the penalty related to the failure, see section 45(b)(7)(B) and Section 3 of Notice 2022-61.

Apprenticeship Requirements

Section 45(b)(8)(A)(i) provides that to meet the apprenticeship requirements you must ensure that, for the construction of any qualified facility, not less than the applicable percentage of the total labor hours of the construction, alteration, or repair work (including such work performed by any contractor or subcontractor) for such facility is, subject to section 45(b)(8)(B), performed by qualified apprentices. Under section 45(b)(8)(A)(ii), for purposes of section 45(b)(8)(A)(i), the applicable percentage is (i) in the case of a qualified facility the construction of which began before January 1, 2023, 10%; (ii) in the case of a qualified facility the construction of which begins after December 31, 2022, and before January 1, 2024, 12.5%; and (iii) in the case of a qualified facility the construction of which begins after December 31, 2023, 15%.

Section 45(b)(8)(B) provides that the requirement under section 45(b)(8)(A)(i) is subject to any applicable requirements for apprentice-to-journeyworker ratios of the Department of Labor or the applicable State Apprenticeship Agency (Apprenticeship Ratio Requirements). Section 45(b)(8)(C) provides that each taxpayer, contractor, or subcontractor who employs four or more individuals to perform construction, alteration, or repair work for the construction of a qualified facility must employ one or more qualified apprentices to perform such work (Apprenticeship Participation Requirements).

See Section 4 of Notice 2022-61 for details.

Beginning of construction. See Sections 2 and 5 of Notice 2022-61 and [When Construction Begins](#), earlier, to establish whether construction of a qualified facility or carbon capture equipment at a qualified facility began before January 29, 2023.

Recapture

A recapture event occurs when qualified carbon oxide for which a carbon oxide sequestration credit has been claimed ceases to be captured, disposed of, or used as a tertiary injectant during the recapture period. Recapture events are determined separately for each project involving capture, disposal, or use of qualified carbon oxide as a tertiary injectant.

Qualified carbon oxide ceases to be captured, disposed of, or used as a tertiary injectant if the leaked amount of qualified carbon oxide in the tax year exceeds the amount of qualified carbon oxide disposed of in secure geological storage or used as a tertiary injectant in that same tax year.

If a recapture event occurs during a project's recapture period and you have claimed a credit for that project, you must report the following information on a Form 8933 filed with your federal income tax return or Form 1065 for the tax year for which the recapture event occurred.

- The recapture amount (as defined in Regulations section 1.45Q-5(e));
- The quantity of leaked qualified carbon oxide (in metric tons) (as defined in Regulations section 1.45Q-5(c));
- The statutory credit rate at which the credits were originally calculated; and
- A statement that describes how you became aware of the recapture event, how the leaked amount was determined, and the identity and involvement of any regulatory agencies.

How To Elect Payment or Transfer of Carbon Oxide Sequestration Credit

Elective Payment Election for Carbon Oxide Sequestration Credit Under Section 6417

If you are an applicable entity as defined in section 6417(d)(1)(A), you may elect to treat the carbon oxide sequestration credit for a qualified facility or carbon equipment placed in service after 2022 as a payment of taxes on your 2023 Form 990-T, Exempt Organization Business Income Tax Return, or other applicable annual return. Applicable entities eligible to make the elective payment election include:

- State and local governments,
- Indian tribal governments,
- Alaska Native Corporations,
- The Tennessee Valley Authority,
- Rural electric cooperatives, and
- Other tax-exempt entities.

If you aren't an applicable entity, you may also elect to treat the section 45Q credit as a payment of taxes on your return. Section 6417(d)(1)(C) allows a taxpayer not described in section 6417(d)(1)(A), including a partnership and an S corporation under section 6417(c), to treat the section 45Q credit with respect to a qualified facility or equipment installed in a qualified facility and placed in service after December 31, 2022, as an elective payment of taxes.

You must follow these steps to make a valid election on your timely filed return (including extensions).

1. Obtain a registration number for the specific qualified facility before the filing of your return.

Note. You must pre-register your intention to make an elective payment election for each qualified facility or equipment installed at a qualified facility. If you make the election for payment, you may not make a transfer election for the same credit.

2. Calculate the amount for each facility or equipment by properly completing Part II, including the registration number, and the applicable lines of Sections A, B, or C of Part III of Form 8933 (including attaching model certificates or similar documents).

3. Report the calculated amount of the credit for the facility or property shown on Form 8933, Part III, Section D, line 21, on Form 3800, Part III, line 1x.

Note. You must also enter the facility registration number on Form 3800. See the Instructions for Form 3800 for additional information and reporting requirements to make a valid election. If you are a taxpayer, including an applicable entity with unrelated business taxable income (UBTI), you must first consider whether any credit for the facility or equipment may be allowed against net income tax in Parts I and II of Form 3800. See *Credit Ordering Rule* in the Instructions for Form 3800.

4. Attach the completed Form 8933 for each facility or equipment and Form 3800 to your return. See the Instructions for Form 990-T or other return for reporting the total or net elective payment amount (if any carbon oxide sequestration credit is allowed against any net income tax).

Note. If you make a section 6417(d)(1)(B) election, the election generally applies to 2023 and the 4 succeeding years (unless you revoke your election). For applicable entities described in section 6417(d)(1)(A), your election generally applies to 2023 and any subsequent year during the 12-year period described in 45Q(a)(3)(A) or (4)(A) with respect to such facility or equipment. You must obtain an IRS-issued registration number for the facility or equipment in 2023 and each of the succeeding years.

Election To Transfer Carbon Oxide Sequestration Credit Under Section 6418

If you are an eligible taxpayer, including a partnership or an S corporation, you may elect to transfer your carbon oxide sequestration credit for new or existing qualified facility or equipment (or portion thereof) on your 2023 tax return. An eligible taxpayer, including a partnership or an S corporation, is defined as any taxpayer not described in section 6417(d)(1)(A).

You must follow these steps to make a valid section 6418 election on your timely filed return (including extensions).

1. Obtain the registration number for the specific qualified facility or equipment before the filing of your return.

Note. You must pre-register your intention to elect to transfer the section 45Q credit (or portion thereof).

2. Calculate the credit amount for the new or existing facility or equipment installed at a facility by properly completing Part II, including the registration number, and the applicable lines of Sections A, B, or C of Part III of Form 8933 (including attaching model certificates or similar documents).

Note. You may not transfer any credit made under section 45Q(f)(3)(B) that is reported in Section D of Part III.

3. Report the calculated amount of the credit for the facility or property shown on Form 8933, Part III, section D, line 21, on Form 3800, Part III, line 1x.

Note. You must also enter the facility registration number on Form 3800. See the Instructions for Form 3800 for the required information and other requirements to treat the transferee taxpayer or acquirer as the taxpayer with respect to such credit (or portion thereof). If you're a partnership or an S corporation, you must also complete and attach Form 3800.

4. Attach the completed Form 8933 for each facility and Form 3800 (including any required information) to your 2023 tax return.

Note. If you're a partnership or an S corporation that elected to transfer only a portion of carbon oxide sequestration credit with respect to a qualified facility or equipment, see the Instructions for Form 3800 for distributing and reporting any non-transferred credit amount to your partners or shareholders.

Coordination With Section 142 Bond Financing

The credit for any project for any tax year is reduced by the amount that's the product of the credit for such tax year and the lesser of 15%, or a fraction, the numerator of which is the sum, for the tax year and all prior tax years, of the proceeds from an issue described in section 142(a)(17) used to provide financing for the project the interest on which is exempt from tax under section 103, and the denominator of which is the aggregate amount of additions to the capital account for the project for the tax year and all prior tax years. The amounts under the

preceding sentence for any tax year are determined as of the close of the tax year.

Note. For purposes of the above, there are no prior tax years before January 1, 2022.

Reporting Requirements

General Requirements

If you're claiming the carbon oxide sequestration credit, you must provide the name and location of the qualified facilities at which the qualified carbon oxide was captured.

If you're claiming the section 45Q credit on an amended federal income tax return, an amended Form 1065, or an AAR, as applicable, you must state "AMENDED RETURN FOR SECTION 45Q CREDIT" at the top of the amended federal income tax return, the amended Form 1065, or the AAR, as applicable. The amended federal income tax return or the amended Form 1065 must be filed, in no event, later than the applicable period of limitations on assessment for the tax year for which the amended federal income tax return or Form 1065 is being filed.

Contractually Ensuring Disposal, Injection, or Utilization of Qualified Carbon Oxide

If you enter into a contract with another party to ensure disposal, injection, or utilization of qualified carbon oxide, you must report the existence of each contract, and the parties involved annually on Form 8933 by each party to the contract, regardless of the party claiming the credit. In addition to any information stated as required on Form 8933, the report must include the following information.

- Your name and identifying number;
- The name and taxpayer identification number of each party with whom you have entered into a contract to ensure the disposal, injection, or utilization of qualified carbon oxide;
- The date on which each contract was executed;
- The number of metric tons of qualified carbon oxide each contracting party disposes of, injects, or utilizes on behalf of you each tax year for reporting to the IRS; and
- For contracts for the disposal of qualified carbon oxide in secure geological storage or the use of qualified carbon oxide as a tertiary injectant in EOR or natural gas recovery, identifying information (the name of the operator, field, unit, and reservoir), location by county and state, and EPA e-GGRT ID number(s) (if available) for submission of the facility's 40 CFR Part 98 (subpart RR) annual reports.

Secure Geological Storage

Certifications must be made annually.

Reporting Based on 40 CFR Part 98 (Subpart RR)

For an EOR or natural gas recovery project in which you reported volumes to the EPA pursuant to 40 CFR Part 98 subpart RR, you may self-certify the volume of carbon oxide claimed for purposes of the credit.

Reporting Based on CSA/ANSI ISO 27916:19

For an EOR or natural gas recovery project in which you determined volumes pursuant to CSA/ANSI ISO 27916:19, you may prepare documentation as outlined in CSA/ANSI ISO 27916:19 internally, but such documentation must be provided to a qualified independent engineer or geologist, who then must certify that the documentation provided, including the mass balance calculations as well as information regarding monitoring and containment assurance, is accurate and complete. For any leaked amount of qualified carbon oxide that's determined pursuant to CSA/ANSI ISO 27916:19, the certification must also include a statement that the quantity was determined in accordance with sound engineering principles.

If you capture qualified carbon oxide giving rise to the credit, you must file Form 8933 with a timely filed federal income tax return or Form 1065, including extensions, or for the purpose of this rule, amendments to federal income tax returns, Forms 1065, or on AARs, as applicable. Similarly, if you dispose of, inject, or utilize qualified carbon oxide, you must also file Form 8933 with a timely filed federal income tax return or Form 1065, including extensions, or for the purpose of this rule, amendments to federal income tax returns, Forms 1065, or on AARs, as applicable. If the volume of carbon oxide certified and reported is a negative amount, see Regulations section 1.45Q-5 for rules regarding recapture.

No credit is allowed for any tax year for which you (including credit claimants) have failed to timely submit complete documentation, including the required certifications. The credit will be allowed only for a tax year for which complete documentation and certification has been timely submitted. Certifications for each tax year must be submitted by the due date of the federal income tax return or Form 1065 on which the credit is claimed, including extensions. If a credit is claimed on an amended federal income tax return, an amended Form 1065, or an AAR, as applicable, certifications may also be submitted with such amended federal income tax return, amended Form 1065, or AAR. If a credit was claimed on a timely filed federal income tax return or Form 1065 for a tax year ending after February 9, 2018, and beginning on or before January 13, 2021, for which certifications weren't submitted, such certifications may be submitted with an amended federal income tax return, an amended Form 1065, or an AAR, as applicable, for the tax year in which the credit was claimed.

Qualified EOR or Natural Gas Recovery Project

Each qualified EOR or natural gas recovery project must be certified under Regulations section 1.43-3.

For purposes of a natural gas project, a petroleum engineer's certification as required under Regulations section 1.43-3(a)(3) and an operator's continued certification of a project as required under Regulations section 1.43-3(b)(3) must include an additional statement that the certification is for purposes of the credit.

Petroleum Engineer's Certification

The petroleum engineer's certification must be attached to a Form 8933 and filed no later than the last date prescribed by law (including extensions) for filing the operator's or designated owner's federal income tax return or Form 1065 for the first tax year in which qualified carbon oxide is injected into the reservoir.

If a credit is claimed on an amended federal income tax return, an amended Form 1065, or an AAR, as applicable, the petroleum engineer's certification will be treated as filed timely if it is attached to a Form 8933 that's submitted with such amended federal income tax return, amended Form 1065, or AAR. For a credit that's claimed on a timely filed federal income tax return or Form 1065 for a tax year ending after February 9, 2018, and beginning on or before January 13, 2021, for which the petroleum engineer's certification wasn't submitted, the petroleum engineer's certification will be treated as filed timely if it is attached to an amended Form 8933 for any tax year ending after February 9, 2018, but not for tax years beginning on or before January 13, 2021.

Operator's Continued Certification

The operator's continued certification of a project must be attached to a Form 8933 and filed no later than the last date prescribed by law (including extensions) for filing the operator's or designated owner's federal income tax return or Form 1065 for tax years after the tax year for which the petroleum engineer's certification is filed but not after the tax year in which injection activity ceases and all injection wells are plugged and abandoned.

Utilization

The amount of qualified carbon oxide utilized by you is equal to the metric tons of qualified carbon oxide that you demonstrate, based upon an analysis of lifecycle greenhouse gas emissions (LCA), that were captured and permanently isolated from the atmosphere (isolated), or displaced from being emitted into the atmosphere (displaced).

Lifecycle greenhouse gas emissions and lifecycle analysis. The term "lifecycle greenhouse gas emissions" means the aggregate quantity of greenhouse gas emissions (including direct emissions and significant indirect emissions such as significant emissions from land use changes) related to the full product lifecycle, including all stages of product and feedstock production and distribution, from feedstock generation or extraction through the distribution and delivery and use of the finished product to the ultimate consumer, where the mass values for all greenhouse gases are adjusted to account for their relative global warming potential according to Table A-1 of 40 CFR Part 98 subpart A. The amount of lifecycle greenhouse gas emissions measured by a lifecycle greenhouse gas analysis (LCA) is expressed in carbon dioxide equivalents (CO₂-e).

Measurement. The measurement and written LCA report must be performed by or verified by an independent third party. The LCA report must be prepared in conformance with, and contain documentation that conforms to, the

International Organization for Standardization (ISO) 14040:2006, Environmental Management—Life Cycle Assessment—Principles and Framework, and ISO 14044:2006, Environmental Management—Life Cycle Assessment—Requirements and Guidelines, as well as a statement documenting the qualifications of the independent third party, including proof of appropriate U.S. or foreign professional license, and an affidavit from the third party stating that it's independent from you.

Approval of the LCA. You must submit the written LCA report and independent third-party statement to the IRS and the Department of Energy (DOE). The LCA will be subject to a technical review by the DOE, and the IRS will determine whether to approve the LCA.

You should fax a copy of your LCA report, including the independent third-party statement specified in Regulations section 1.45Q-4(c)(4), to the IRS at 844-255-4817. The submission should include a cover letter with:

1. Name of the facility where the qualified carbon oxide is utilized ("utilization facility");
2. Name of the operator of the utilization facility, including operator's TIN/EIN;
3. Name of the taxpayer(s) claiming the credit based on the LCA, including each taxpayer's TIN/EIN;
4. Name of a corporate officer in charge of the LCA report submission (or a designated representative) with a written power of attorney (POA on Form 2848, Power of Attorney and Declaration of Representative) and that person's contact information, including official corporate mailing address;
5. Tax year in which the credit is claimed; and
6. Reserved for future use.

You should also mail (1) the items above, and (2) the model, if the LCA wasn't verified by an independent third-party review, on a USB thumb drive, to:

Internal Revenue Service
Office of Associate Chief Counsel (PSI)
1111 Constitution Ave. NW
Branch 6 (CC:PSI:6), Room 5114
Washington, DC 20224

You should also send the DOE an email at LCA45Q@hq.doe.gov, and the DOE will respond with instructions for submitting the LCA application to the DOE.

Specific Instructions

To claim the credit for disposal of carbon oxide in secure geological storage or for use of carbon oxide as a tertiary injectant in an EOR or natural gas recovery project, prior to disposal in secure geological sequestration, the amount of carbon oxide must be measured at the source of capture and verified either at the point of disposal in secure geological storage or at the point of injection as a tertiary injectant in an EOR or natural gas recovery project. The amount of qualified carbon oxide is presumed to be the lesser of the amount measured at capture and the amount verified at disposal or injection unless it can

be established to the satisfaction of the IRS that the greater amount is the correct amount.

To claim the credit for utilization of carbon oxide, the amount of qualified carbon oxide utilized by you is equal to the metric tons of qualified carbon oxide that you demonstrate, based upon an analysis of lifecycle greenhouse gas emissions (LCA), were (1) captured and permanently isolated from the atmosphere, or (2) displaced from being emitted into the atmosphere. The amount of qualified carbon oxide utilized by you for purposes of the carbon oxide sequestration credit can't exceed the amount of qualified carbon oxide measured at the source of capture.

Part I. Information About You

Line 1. See [Lifecycle greenhouse gas emissions and lifecycle analysis](#), earlier.

Line 2. See [Qualified carbon oxide](#), earlier.

Lines 4 and 5. See [Section 45Q\(f\)\(3\)\(B\) Election](#), earlier.

Part II. Information About Facility

If you are claiming carbon oxide sequestration credit for a qualified facility or equipment in Part III, you must complete Part II.

Note. You must also provide information about specific industrial facility and carbon capture equipment in Part I of your model certificate or version of model certificate. See [Model Certificate CF](#).

Line 1. If applicable, enter your pre-filing registration number for the facility that you received from the IRS.

Line 3. Enter the type and technical description of the facility or equipment that captured carbon oxide, disposed of carbon oxide, or used carbon oxide as a tertiary injectant.

Line 4. Enter the address of the facility. If the facility doesn't have an address, enter the coordinates of the facility or property (longitude and latitude) on line 4b.

Line 5. Enter the date construction began. See [Beginning of construction](#), earlier, for more information.

Part III. Credit Calculations

Section A—Facilities at Which Qualified Carbon Oxide Qualifies for a Credit Under Section 45Q(a)(1) or (2) for Which an Election Was Made Under Section 45Q(b)(3)

See [Section 45Q\(b\)\(3\) Election](#), earlier.

Line 1b. Enter \$26.94.

Line 1c. To see model versions of necessary attachments, see [Model Certificate CF](#), [Model Certificate DISP-Operator](#), and [Model Certificate DISP-Owner](#). The credit amount on line 1c should be equal to the credit amount shown on Model Certificate CF, Part III, Section A, line 1f.

Line 2b. Enter \$13.47.

Line 2c. To see model versions of necessary attachments, see [Model Certificate CF](#), [Model Certificate](#)

[EOR-Operator](#), and [Model Certificate EOR-Owner](#). The credit amount on line 2c should be equal to the credit amount shown on Model Certificate CF, Part III, Section A, line 2f.

Line 3b. Enter \$13.47.

Line 3c. To see model versions of necessary attachments, see [Model Certificate CF](#) and [Model Certificate UTZ](#). The credit amount on line 3c should be equal to the credit amount shown on Model Certificate CF, Part III, Section A, line 3f.

Line 4. If you checked the box on line 4a, enter \$134.70 (\$26.94 multiplied by 5). See [Additional information](#), earlier, to claim the increased credit amount.

If you checked the box on line 4b, enter \$26.94.

Line 4c. To see model versions of necessary attachments, see [Model Certificate CF](#), [Model Certificate DISP-Operator](#), and [Model Certificate DISP-Owner](#). The credit amount on line 4c should be equal to the credit amount shown on Model Certificate CF, Part III, Section A, line 4f.

Line 5. If you checked the box on line 5a, enter \$67.35 (\$13.47 multiplied by 5). See [Additional information](#), earlier, to claim the increased credit amount.

If you checked the box on line 5b, enter \$13.47.

Line 5c. To see model versions of necessary attachments, see [Model Certificate CF](#), [Model Certificate EOR-Operator](#), and [Model Certificate EOR-Owner](#). The credit amount on line 5c should be equal to the credit amount shown on Model Certificate CF, Part III, Section A, line 5f.

Line 6. If you checked the box on line 6a, enter \$67.35 (\$13.47 multiplied by 5). See [Additional information](#), earlier, to claim the increased credit amount.

If you checked the box on line 6b, enter \$13.47.

Line 6c. To see model versions of necessary attachments, see [Model Certificate CF](#) and [Model Certificate UTZ](#). The credit amount on line 6c should be equal to the credit amount shown on Model Certificate CF, Part III, Section A, line 6f.

Section B. Qualified Facilities Under Section 45Q(a)(3) or (4) for Which No Election Was Made Under Section 45Q(b)(3)

Line 7b. Enter \$40.89.

Line 7c. To see model versions of necessary attachments, see [Model Certificate CF](#), [Model Certificate DISP-Operator](#), and [Model Certificate DISP-Owner](#). The credit amount on line 7c should be equal to the credit amount shown on Model Certificate CF, Part III, Section B, line 7f.

Line 8b. Enter \$27.61.

Line 8. To see model versions of necessary attachments, see [Model Certificate CF](#), [Model Certificate EOR-Operator](#), and [Model Certificate EOR-Owner](#). The credit amount on line 8c should be equal to the credit amount shown on Model Certificate CF, Part III, Section B, line 8f.

Line 9b. Enter \$27.61.

Line 9c. To see model versions of necessary attachments, see [Model Certificate CF](#) and [Model Certificate UTZ](#). The credit amount on line 9c should be equal to the credit amount shown on Model Certificate CF, Part III, Section B, line 9f.

Line 10. If you checked the box on line 10a, see [Additional information](#), earlier.

Line 10c. To see model versions of necessary attachments, see [Model Certificate CF](#), [Model Certificate DISP-Operator](#), and [Model Certificate DISP-Owner](#). The credit amount on line 10c should be equal to the credit amount shown on Model Certificate CF, Part III, Section B, line 10f.

Line 11. If you checked the box on line 11a, see [Additional information](#), earlier.

Line 11c. To see model versions of necessary attachments, see [Model Certificate CF](#), [Model Certificate EOR-Operator](#), and [Model Certificate EOR-Owner](#). The credit amount on line 11c should be equal to the credit amount shown on Model Certificate CF, Part III, Section B, line 11f.

Line 12. If you checked the box on line 12a, see [Additional information](#), earlier.

Line 12c. To see model versions of necessary attachments, see [Model Certificate CF](#) and [Model Certificate UTZ](#). The credit amount on line 12c should be equal to the credit amount shown on Model Certificate CF, Part III, Section B, line 12f.

Section C—Qualified Direct Air Capture (DAC) Facilities Under Section 45Q(d)(2)(A) Placed in Service After 2022

Line 13. If you checked the box on line 13a, see [Additional information](#), earlier.

Line 13c. To see model versions of necessary attachments, see [Model Certificate CF](#), [Model Certificate DISP-Operator](#), and [Model Certificate DISP-Owner](#). The credit amount on line 13c should be equal to the credit amount shown on Model Certificate CF, Part III, Section C, line 13f.

Line 14. If you checked the box on line 14a, see [Additional information](#), earlier.

Line 14c. To see model versions of necessary attachments, see [Model Certificate CF](#), [Model Certificate EOR-Operator](#), and [Model Certificate EOR-Owner](#). The credit amount on line 14c should be equal to the credit amount shown on Model Certificate CF, Part III, Section C, line 14f.

Line 15. If you checked the box on line 15a, see [Additional information](#), earlier.

Line 15c. To see model versions of necessary attachments, see [Model Certificate CF](#) and [Model Certificate UTZ](#). The credit amount on line 15c should be equal to the credit amount shown on Model Certificate CF, Part III, Section C, line 15f.

Section D—Other Information

Line 19e

Subtract line 19d from the total carbon oxide sequestration credit reported to you on a statement substantially similar to Model Certificate(s) ELECT, Part II, line 6; enter amount on line 19e.

Attach the applicable model certificates. See [Model Certificate ELECT](#), [Model Certificate EOR-Owner](#), [Model Certificate DISP-Owner](#), and [Model Certificate UTZ](#).

Complete a statement substantially similar to Model Certificate ELECT if you elect under section 45Q(f)(3)(B) to allow another person to claim your carbon oxide sequestration credit. See [Model Certificate ELECT](#), later.

Line 20. Enter the total qualified carbon oxide sequestration credits on a separate Form 8933 to report your distributive or pro rata share from:

- Schedule K-1 (Form 1065), Partner's Share of Income, Deductions, Credits, etc., box 15 (code AW); and
- Schedule K-1 (Form 1120-S), Shareholder's Share of Income, Deductions, Credits, etc., box 13 (code AW).

Enter "Credit from partnerships and S corporations" on Form 8933, Part II, line 3. All others not using earlier lines to figure a separate credit can report the above credits directly on Form 3800, Part III, line 1x.

Line 22. Enter the carbon oxide sequestration credit recaptured. Attach a statement substantially similar to Model Certificate(s) RECAPTURE to Form 8933. Report the credit recapture amount on the appropriate line of your return.

Model Certificates

Per the TD and the NPRM that preceded it, if you're a large section 45Q project filer, you'll likely have to use multiple legal contracts with multiple parties for the capture, utilization, or disposal of carbon oxides and, generally to claim the credit, the existence of each contract and the parties involved must be reported on Form 8933 annually. For this reporting, filers should use attachments substantially similar to model certificates shown below.

Model Certificate CF. Use [Model Certificate CF](#) if you're the owner of a capture facility (may not be the same entity as the owner of the industrial facility) that emits carbon oxide. Model Certificate CF will help show your share of the carbon oxide sequestration credit.

Model Certificate DISP-Operator. Use [Model Certificate DISP-Operator](#) if you're the operator (or designated operator) of a geologic disposal site at which captured qualified carbon oxide was injected during the calendar year. Don't use this model certificate if carbon oxide was injected for enhanced oil or natural gas recovery. Provide a copy of your signed Model Certificate DISP-Operator to each owner of the disposal site project.

Model Certificate DISP-Owner. Use [Model Certificate DISP-Owner](#) if you're the owner (or one of the owners) of the geologic disposal site at which captured carbon oxide was injected during the calendar year. The operator of the

disposal site prepares Table 3 of Model Certificate DISP-Operator. Report the amounts from that Table 3 on lines 11, 12, and 14 through 16.

Model Certificate EOR-Operator. Use [Model Certificate EOR-Operator](#) if you're the operator (or designated operator) of an enhanced oil or gas recovery project (EOR project) at which captured qualified carbon oxide was injected during the calendar year. Provide a copy of your signed Model Certificate EOR-Operator to each owner of the EOR project.

Model Certificate EOR-Owner. Use [Model Certificate EOR-Owner](#) if you're the owner (or one of the owners) of the EOR project at which captured carbon oxide was injected during the calendar year. The operator of the EOR project prepares Table 3 of Model Certificate EOR-Operator. Report the amounts from that Table 3 on lines 11, 12, and 14 through 16.

Model Certificate UTZ. Use [Model Certificate UTZ](#) if you're the owner of the utilization facility who utilized

qualified carbon oxide during the calendar year. Don't combine information from separate utilization facilities on the same Model Certificate UTZ. Provide a copy of your signed Model Certificate UTZ to each supplier that supplied qualified captured carbon oxide to inform the suppliers of the amount of their qualified carbon oxide that was utilized.

Model Certificate ELECT. Use [Model Certificate ELECT](#) if (1) you're the owner of the capture facility that supplied qualified carbon oxide to another person that was properly disposed of in geological storage, used in an EOR project, or utilized in a manner consistent with section 45Q(f), and (2) you elect under section 45Q(f)(3)(B) to allow the carbon oxide sequestration credit to that person. You must make a separate election for each qualified facility.

Model Certificate RECAPTURE. Use [Model Certificate RECAPTURE](#) if you're the operator or owner of the geologic disposal site or EOR project to report a recapture event.

ONLY DRAFT

November 14, 2023

Model Certificate CF

Capture Facility Certification		2023
Name(s) shown on return:		Identifying number:
Part I. Information About Industrial Facility, Carbon Capture Equipment, Carbon Oxide Sequestration Credit, and Elections		
		Yes No
Section 1—Industrial facility information:		
1	Name of facility	
2	Location (county and state)	
3a	IRS-issued registration number(s) for the facility	
3b	Facility's EPA e-GGRT ID number(s)*	
4	Is the facility an electricity-generating facility?	<input type="checkbox"/> <input type="checkbox"/>
5	Is the facility a direct air capture (DAC) facility? If "Yes," skip to line 12	<input type="checkbox"/> <input type="checkbox"/>
6	If the facility isn't an electricity-generating or DAC facility, state the nature of the facility (for example, ethanol production, cement manufacturing, etc.)	
7	What is the placed-in-service date of the facility (MM/DD/YYYY)?	
8	Does the facility described above process carbon dioxide or any other gas from underground deposits?	<input type="checkbox"/> <input type="checkbox"/>
8a	If you answered "Yes" to line 8, was any gas obtained from a carbon dioxide production well at natural carbon dioxide-bearing formations or at a naturally occurring subsurface spring, which means a well that contains 90% or greater carbon dioxide by volume?	<input type="checkbox"/> <input type="checkbox"/>
8b	If you answered "Yes" to line 8a, you can't treat the facility as a qualified industrial facility to the extent that it processed gas described in line 8a during the tax year. See line 8c.	
8c	If you answered "Yes" to line 8a, do you attest that you meet the exception for a deposit that contains a product, other than carbon oxide, that's commercially viable to extract and sell without taking into account the availability of a commercial market for the carbon oxide that's extracted or any carbon oxide sequestration credit that might be available?	<input type="checkbox"/> <input type="checkbox"/>
8d	If you answered "Yes" to line 8c, have you attached an attestation letter from an independent registered engineer? Don't treat the facility as a qualified industrial facility unless you answered "Yes" to both lines 8c and 8d. See instructions	<input type="checkbox"/> <input type="checkbox"/>
9	What were the emissions of carbon oxide during the calendar year (amount released to the atmosphere plus amount captured)?	
9a	Of the amount listed on line 9, what amount was carbon dioxide?	
9b	Of the amount listed on line 9, what amount was carbon monoxide?	
10	Was annualization of first-year carbon oxide emissions required for this calendar year?	<input type="checkbox"/> <input type="checkbox"/>
10a	If you answered "Yes" to line 10, state the annualized carbon oxide emissions and attach a statement that shows how you determined the annualized carbon oxide emissions	
11	Was aggregation of multiple facilities required to achieve the requisite carbon capture thresholds?	<input type="checkbox"/> <input type="checkbox"/>
11a	If you answered "Yes" to line 11, attach a statement that lists the facilities and describes the appropriateness of their aggregation.	
Section 2—Carbon capture equipment and DAC facility information:		
12	Is carbon captured by a DAC facility?	<input type="checkbox"/> <input type="checkbox"/>
13	State the location of the carbon capture equipment or DAC facility (county and state)	
14	Was any carbon capture equipment placed in service prior to February 9, 2018? See instructions	<input type="checkbox"/> <input type="checkbox"/>
15	What was the placed-in-service date (MM/DD/YYYY) of the carbon capture equipment or DAC facility described on line 13? See instructions	
16	Are you the owner of the carbon capture equipment described on line 13?	<input type="checkbox"/> <input type="checkbox"/>
16a	If you answered "No" to line 16, state your basis for claiming the credit	
17	For carbon capture equipment placed in service after February 9, 2018, do you attest that, to the best of your knowledge, you're the only person who will claim the carbon oxide sequestration credit for carbon oxide captured by each single train of carbon capture equipment during the tax year (irrespective of any election you make to allow a contracting disposer, injector, or utilizer to claim the credit)? Don't claim the credit unless you can answer "Yes." See instructions	<input type="checkbox"/> <input type="checkbox"/>
18	For the carbon capture equipment described on line 13, what was the carbon capture capacity on or after February 8, 2018?	
* If available.		
		Model Certificate CF

Part I. Information About Industrial Facility, Carbon Capture Equipment, Carbon Oxide Sequestration Credit, and Elections
(continued)

Yes No

- 19 Was additional carbon capture equipment installed on or after February 9, 2018? Yes No
- 19a For equipment described on line 19, what was the beginning of construction date (MM/DD/YYYY)? _____
- 19b For equipment described on line 19, what was the placed-in-service date (MM/DD/YYYY)? _____
- 19c Is the placed-in-service date of the carbon capture equipment described on line 19 determined pursuant to the 80/20 rule? Yes No
- 19d If you answered "Yes" to line 19c, state your investment in new carbon capture equipment and the fair market value of pre-existing carbon capture equipment _____
- 19e If the placed-in-service date of the carbon capture equipment was determined pursuant to the 80/20 rule, did you include its investment in a transportation pipeline as new carbon capture equipment? Yes No
- 19f If you answered "Yes" to line 19e, state your investment in a transportation pipeline _____
- 20 What was the total amount of carbon oxide captured during the calendar year (in metric tons)? _____
- 20a Of the amount listed on line 20, what amount was carbon dioxide? _____
- 20b Of the amount listed on line 20, what amount was carbon monoxide? _____
- 21 Was annualization of first-year captured carbon oxide required for this calendar year? Yes No
- 21a If you answered "Yes" to line 21, state the annualized carbon oxide emissions _____
- Section 3—Information about carbon oxide sequestration credit and your elections:**
- 22 During the calendar year, are other parties contractually ensuring disposal, injection, or utilization of qualified carbon oxide captured at this facility? Yes No
- 23 For this calendar year, do you elect to allow any of the parties described on line 22 to claim some or all of the carbon oxide sequestration credit? Yes No
- 24 If you answered "No" to line 23, do you elect to apply the \$10 and \$20 rates (adjusted for inflation) in lieu of the applicable dollar amounts? Yes No
- 25 If you answered "Yes" to line 24, determine the credit using lines 1 through 6 in Part III.
- 26 If you answered "No" to line 24, determine the credit using lines 7 through 15 in Part III.
- 27 Is the facility described in Part I an applicable facility and are you making the election under section 45Q(f)(6)? See instructions Yes No
- 27a If you answered "Yes" to both parts of line 27, determine the credit using lines 7, 8, or 9 in Part III. See instructions.

Part II. Reserved for future use.

Part III. Credit Calculation

Section A—Facilities at Which Qualified Carbon Oxide Qualifies for a Credit Under Section 45Q(a)(1) or (2) for Which an Election Was Made Under Section 45Q(b)(3)

Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility on or after February 9, 2018, and before 2023, disposed of in secure geological storage, and not used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project, nor utilized as described in section 45Q(f)(5).

		(a) Metric tons	(b) Rate	(c) Carbon oxide sequestration credit. Multiply column (a) by column (b).
1a	Metric tons captured and delivered to point of disposal			
1b	Metric tons captured and securely stored by you. Attach Model Certificates DISP-Operator and DISP-Owner for each disposal site			
1c	Metric tons captured and securely stored (physically disposed) by another person. Attach Model Certificates DISP-Operator and DISP-Owner for each disposal site			
1d	Add lines 1b and 1c		\$26.94	
1e	Metric tons captured and securely stored (physically disposed) by another person and for which you allow that person to claim the resulting carbon oxide sequestration credit. Attach Model Certificate ELECT for each disposal site		\$26.94	
1f	Your carbon oxide sequestration credit. Subtract line 1e from line 1d		\$26.94	

Model Certificate CF

Section A—Facilities at Which Qualified Carbon Oxide Qualifies for a Credit Under Section 45Q(a)(1) or (2) for Which an Election Was Made Under Section 45Q(b)(3) (continued)

Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility on or after February 9, 2018, and before 2023, disposed of in secure geological storage, and used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project.

	(a) Metric tons	(b) Rate	(c) Carbon oxide sequestration credit. Multiply column (a) by column (b).
2a Metric tons captured and delivered to point of injection			
2b Metric tons captured and securely stored by you. Attach Model Certificates EOR-Operator and EOR-Owner for each recovery project			
2c Metric tons captured and securely stored by another person. Attach Model Certificates EOR-Operator and EOR-Owner for each recovery project			
2d Add lines 2b and 2c		\$13.47	
2e Metric tons captured and securely stored by another person and for which you allow that person to claim the resulting carbon oxide sequestration credit. Attach Model Certificate ELECT for each recovery project		\$13.47	
2f Your carbon oxide sequestration credit. Subtract line 2e from line 2d		\$13.47	

Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility on or after February 9, 2018, and before 2023, and utilized as described in section 45Q(f)(5).

	(a) Metric tons	(b) Rate	(c) Carbon oxide sequestration credit. Multiply column (a) by column (b).
3a Metric tons captured and delivered to point of utilization			
3b Metric tons captured and physically utilized by you. Attach Model Certificate UTZ for each utilization facility. Expressed as carbon dioxide equivalents that were determined pursuant to an approved Life Cycle Assessment (LCA). See instructions			
3c Metric tons captured and physically utilized by another person. Attach Model Certificate UTZ for each utilization facility. Expressed as carbon dioxide equivalents that were determined pursuant to an approved LCA. See instructions			
3d Add lines 3b and 3c		\$13.47	
3e Metric tons captured and physically utilized by another person and for which you elect to allow that person to claim the resulting carbon oxide sequestration credit. Expressed as carbon dioxide equivalents that were determined pursuant to an approved LCA. See instructions. Attach Model Certificate ELECT for each utilization facility		\$13.47	
3f Your carbon oxide sequestration credit. Subtract line 3e from line 3d		\$13.47	

Model Certificate CF

Section A—Facilities at Which Qualified Carbon Oxide Qualifies for a Credit Under Section 45Q(a)(1) or (2) for Which an Election Was Made Under Section 45Q(b)(3) (continued)

Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility after 2022, disposed of in secure geological storage, and not used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project, nor utilized as described in section 45Q(f)(5).

		(a) Metric tons	(b) Rate	(c) Carbon oxide sequestration credit. Multiply column (a) by column (b).
4a	Metric tons captured and delivered to point of disposal			
4b	Metric tons captured and securely stored (physically disposed) by you. Attach Model Certificates DISP-Operator and DISP-Owner for each disposal site			
4c	Metric tons captured and securely stored (physically disposed) by another person. Attach Model Certificates DISP-Operator and DISP-Owner for each disposal site			
4d	Add lines 4b and 4c		\$134.70	
4e	Metric tons captured and securely stored (physically disposed) by another person and for which you allow that person to claim the resulting carbon oxide sequestration credit. Attach Model Certificate ELECT for each disposal site		\$134.70	
4f	Your carbon oxide sequestration credit. Subtract line 4e from line 4d		\$134.70	

Note. Enter \$26.94 in column (b) for lines 4d, 4e, and 4f if prevailing wage and apprenticeship requirements are not met.

Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility after 2022, disposed of in secure geological storage, and used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project.

		(a) Metric tons	(b) Rate	(c) Carbon oxide sequestration credit. Multiply column (a) by column (b).
5a	Metric tons captured and delivered to point of injection			
5b	Metric tons captured and securely stored (physically disposed) by you. Attach Model Certificates EOR-Operator and EOR-Owner for each recovery project			
5c	Metric tons captured and securely stored (physically disposed) by another person. Attach Model Certificates EOR-Operator and EOR-Owner for each recovery project			
5d	Add lines 5b and 5c		\$67.35	
5e	Metric tons captured and securely stored (physically disposed) by another person and for which you allow that person to claim the resulting carbon oxide sequestration credit. Attach Model Certificate ELECT for each recovery project		\$67.35	
5f	Your carbon oxide sequestration credit. Subtract line 5e from line 5d		\$67.35	

Note. Enter \$13.47 in column (b) for lines 5d, 5e, and 5f if prevailing wage and apprenticeship requirements are not met.

Model Certificate CF

Section A—Facilities at Which Qualified Carbon Oxide Qualifies for a Credit Under Section 45Q(a)(1) or (2) for Which an Election Was Made Under Section 45Q(b)(3) (continued)

Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility after 2022, and utilized as described in section 45Q(f)(5).

		(a) Metric tons	(b) Rate	(c) Carbon oxide sequestration credit. Multiply column (a) by column (b).
6a	Metric tons captured and delivered to point of utilization			
6b	Metric tons captured and physically utilized by you. Attach Model Certificate UTZ for each utilization facility. Expressed as carbon dioxide equivalents that were determined pursuant to an approved Life Cycle Assessment (LCA). See instructions			
6c	Metric tons captured and physically utilized by another person. Attach Model Certificate UTZ for each utilization facility. Expressed as carbon dioxide equivalents that were determined pursuant to an approved LCA. See instructions			
6d	Add lines 6b and 6c		\$67.35	
6e	Metric tons captured and physically utilized by another person and for which you elect to allow that person to claim the resulting carbon oxide sequestration credit. Expressed as carbon dioxide equivalents that were determined pursuant to an approved LCA. See instructions. Attach Model Certificate ELECT for each utilization facility		\$67.35	
6f	Your carbon oxide sequestration credit. Subtract line 6e from line 6d		\$67.35	

Note. Enter \$13.47 in column (b) for lines 6d, 6e, and 6f if prevailing wage and apprenticeship requirements are not met.

Section B—Qualified Facilities Under Section 45Q(a)(3) or (4) for Which No Election Was Made Under Section 45Q(b)(3)

Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility on or after February 9, 2018, and before 2023, during the 12-year period beginning on the date the equipment was originally placed in service, disposed of in secure geological storage, and not used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project, nor utilized as described in section 45Q(f)(5).

		(a) Metric tons	(b) Rate	(c) Carbon oxide sequestration credit. Multiply column (a) by column (b).
7a	Metric tons captured and delivered to point of disposal			
7b	Metric tons captured and securely stored (physically disposed) by you. Attach Model Certificates DISP-Operator and DISP-Owner for each disposal site			
7c	Metric tons captured and securely stored (physically disposed) by another person. Attach Model Certificates DISP-Operator and DISP-Owner for each disposal site			
7d	Add lines 7b and 7c		\$40.89	
7e	Metric tons captured and securely stored (physically disposed) by another person and for which you allow that person to claim the resulting carbon oxide sequestration credit. Attach Model Certificate ELECT for each disposal site		\$40.89	
7f	Your carbon oxide sequestration credit. Subtract line 7e from line 7d		\$40.89	

Model Certificate CF

Section B—Qualified Facilities Under Section 45Q(a)(3) or (4) for Which No Election Was Made Under Section 45Q(b)(3) (continued)

Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility on or after February 9, 2018, and before 2023, during the 12-year period beginning on the date the equipment was originally placed in service, disposed of in secure geological storage, and used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project.

		(a) Metric tons	(b) Rate	(c) Carbon oxide sequestration credit. Multiply column (a) by column (b).
8a	Metric tons captured and delivered to point of injection			
8b	Metric tons captured and securely stored (physically disposed) by you. Attach Model Certificates EOR-Operator and EOR-Owner for each recovery project			
8c	Metric tons captured and securely stored (physically disposed) by another person. Attach Model Certificates EOR-Operator and EOR-Owner for each recovery project			
8d	Add lines 8b and 8c		\$27.61	
8e	Metric tons captured and securely stored (physically disposed) by another person and for which you allow that person to claim the resulting carbon oxide sequestration credit. Attach Model Certificate ELECT for each recovery project		\$27.61	
8f	Your carbon oxide sequestration credit. Subtract line 8e from line 8d		\$27.61	

Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility on or after February 9, 2018, and before 2023, during the 12-year period beginning on the date the equipment was originally placed in service, and utilized as described in section 45Q(f)(5).

		(a) Metric tons	(b) Rate	(c) Carbon oxide sequestration credit. Multiply column (a) by column (b).
9a	Metric tons captured and delivered to point of utilization			
9b	Metric tons captured and physically utilized by you. Attach Model Certificate UTZ for each utilization facility. Expressed as carbon dioxide equivalents that were determined pursuant to an approved Life Cycle Assessment (LCA). See instructions			
9c	Metric tons captured and physically utilized by another person. Attach Model Certificate UTZ for each utilization facility. Expressed as carbon dioxide equivalents that were determined pursuant to an approved LCA. See instructions			
9d	Add lines 9b and 9c		\$27.61	
9e	Metric tons captured and physically utilized by another person and for which you elect to allow that person to claim the resulting carbon oxide sequestration credit. Expressed as carbon dioxide equivalents that were determined pursuant to an approved LCA. See instructions. Attach Model Certificate ELECT for each utilization project		\$27.61	
9f	Your carbon oxide sequestration credit. Subtract line 9e from line 9d		\$27.61	

Model Certificate CF

Section B—Qualified Facilities Under Section 45Q(a)(3) or (4) for Which No Election Was Made Under Section 45Q(b)(3) (continued)

Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility after 2022, during the 12-year period beginning on the date the equipment was originally placed in service, disposed of in secure geological storage, and not used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project, nor utilized as described in section 45Q(f)(5).

	(a) Metric tons	(b) Rate	(c) Carbon oxide sequestration credit. Multiply column (a) by column (b).
10a Metric tons captured and delivered to point of disposal			
10b Metric tons captured and securely stored (physically disposed) by you. Attach Model Certificates DISP-Operator and DISP-Owner for each disposal site			
10c Metric tons captured and securely stored (physically disposed) by another person. Attach Model Certificates DISP-Operator and DISP-Owner for each disposal site			
10d Add lines 10b and 10c		\$85	
10e Metric tons captured and securely stored (physically disposed) by another person and for which you allow that person to claim the resulting carbon oxide sequestration. Attach Model Certificate ELECT for each disposal site		\$85	
10f Your carbon oxide sequestration credit. Subtract line 10e from line 10d		\$85	

Note. Enter \$17 in column (b) for lines 10d, 10e, and 10f if prevailing wage and apprenticeship requirements are not met.

Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility after 2022, during the 12-year period beginning on the date the equipment was originally placed in service, disposed of in secure geological storage, and used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project.

	(a) Metric tons	(b) Rate	(c) Carbon oxide sequestration credit. Multiply column (a) by column (b).
11a Metric tons captured and delivered to point of injection			
11b Metric tons captured and securely stored (physically disposed) by you. Attach Model Certificates EOR-Operator and EOR-Owner for each recovery project			
11c Metric tons captured and securely stored (physically disposed) by another person. Attach Model Certificates EOR-Operator and EOR-Owner for each recovery project			
11d Add lines 11b and 11c		\$60	
11e Metric tons captured and securely stored (physically disposed) by another person and for which you allow that person to claim the resulting carbon oxide sequestration credit. Attach Model Certificate ELECT for each recovery project		\$60	
11f Your carbon oxide sequestration credit. Subtract line 11e from line 11d		\$60	

Note. Enter \$12 in column (b) for lines 11d, 11e, and 11f if prevailing wage and apprenticeship requirements are not met.

Model Certificate CF

Section B—Qualified Facilities Under Section 45Q(a)(3) or (4) for Which No Election Was Made Under Section 45Q(b)(3) (continued)

Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility after 2022, during the 12-year period beginning on the date the equipment was originally placed in service, and utilized as described in section 45Q(f)(5).

	(a) Metric tons	(b) Rate	(c) Carbon oxide sequestration credit. Multiply column (a) by column (b).
12a Metric tons captured and delivered to point of utilization			
12b Metric tons captured and physically utilized by you. Attach Model Certificate UTZ for each utilization facility. Expressed as carbon dioxide equivalents that were determined pursuant to an approved Life Cycle Assessment (LCA). See instructions			
12c Metric tons captured and physically utilized by another person. Attach Model Certificate UTZ for each utilization facility. Expressed as carbon dioxide equivalents that were determined pursuant to an approved LCA. See instructions			
12d Add lines 12b and 12c		\$60	
12e Metric tons captured and physically utilized by another person and for which you elect to allow that person to claim the resulting carbon oxide sequestration credit. Expressed as carbon dioxide equivalents that were determined pursuant to an approved LCA. See instructions. Attach Model Certificate ELECT for each utilization project		\$60	
12f Your carbon oxide sequestration credit. Subtract line 12e from line 12d		\$60	

Note. Enter \$12 in column (b) for lines 12d, 12e, and 12f if prevailing wage and apprenticeship requirements are not met.

Section C—Qualified DAC Facilities Under Section 45Q(d) Placed in Service After 2022

Qualified carbon oxide captured using DAC equipment originally placed in service at a qualified DAC facility after 2022, during the 12-year period beginning on the date the equipment was originally placed in service, disposed of in secure geological storage, and not used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project, nor utilized as described in section 45Q(f)(5).

	(a) Metric tons	(b) Rate	(c) Carbon oxide sequestration credit. Multiply column (a) by column (b).
13a Metric tons captured and delivered to point of disposal			
13b Metric tons captured and securely stored (physically disposed) by you. Attach Model Certificates DISP-Operator and DISP-Owner for each disposal site			
13c Metric tons captured and securely stored (physically disposed) by another person. Attach Model Certificates DISP-Operator and DISP-Owner for each disposal site			
13d Sum of 13b and 13c		\$180	
13e Metric tons captured and securely stored (physically disposed) by another person and for which you allow that person to claim the resulting carbon oxide sequestration credit. Attach Model Certificate ELECT for each disposal site		\$180	
13f Your carbon oxide sequestration credit. Subtract line 13e from line 13d		\$180	

Note. Enter \$36 in column (b) for lines 13d, 13e, and 13f if prevailing wage and apprenticeship requirements are not met.

Model Certificate CF

Section C—Qualified DAC Facilities Under Section 45Q(d) Placed in Service After 2022 (continued)

Qualified carbon oxide captured using DAC equipment originally placed in service at a qualified DAC facility after 2022, during the 12-year period beginning on the date the equipment was originally placed in service, disposed of in secure geological storage, and used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project.

	(a) Metric tons	(b) Rate	(c) Carbon oxide sequestration credit. Multiply column (a) by column (b).
14a Metric tons captured and delivered to point of injection			
14b Metric tons captured and securely stored (physically disposed) by you. Attach Model Certificates EOR-Operator and EOR-Owner for each recovery project			
14c Metric tons captured and securely stored (physically disposed) by another person. Attach Model Certificates EOR-Operator and EOR-Owner for each recovery project			
14d Add lines 14b and 14c		\$130	
14e Metric tons captured and securely stored (physically disposed) by another person and for which you allow that person to claim the resulting carbon oxide sequestration credit. Attach Model Certificate ELECT for each recovery project		\$130	
14f Your carbon oxide sequestration credit. Subtract line 14e from line 14d		\$130	

Note. Enter \$26 in column (b) for lines 14d, 14e, and 14f if prevailing wage and apprenticeship requirements are not met.

Qualified carbon oxide captured using DAC equipment originally placed in service at a qualified DAC facility after 2022, during the 12-year period beginning on the date the equipment was originally placed in service, and utilized as described in section 45Q(f)(5).

	(a) Metric tons	(b) Rate	(c) Carbon oxide sequestration credit. Multiply column (a) by column (b).
15a Metric tons captured and delivered to point of utilization			
15b Metric tons captured and physically utilized by you. Attach Model Certificate UTZ for each utilization facility. Expressed as carbon dioxide equivalents that were determined pursuant to an approved Life Cycle Assessment (LCA). See instructions			
15c Metric tons captured and physically utilized by another person. Attach Model Certificate UTZ for each utilization facility. Expressed as carbon dioxide equivalents that were determined pursuant to an approved LCA. See instructions			
15d Sum of 15b and 15c		\$130	
15e Metric tons captured and physically utilized by another person and for which you elect to allow that person to claim the resulting carbon oxide sequestration credit. Expressed as carbon dioxide equivalents that were determined pursuant to an approved LCA. See instructions. Attach Model Certificate ELECT for each utilization project		\$130	
15f Your carbon oxide sequestration credit. Subtract line 15e from line 15d		\$130	

Note. Enter \$26 in column (b) for lines 15d, 15e, and 15f if prevailing wage and apprenticeship requirements are not met.

Company's name and EIN

Model Certificate DISP-Owner

Disposal Owner Certification		2023
Name(s) shown on return:		Identifying number:
Information about you, the owner of the geologic disposal site:		
1 Name	_____	
2 Address	_____	
3 EIN	_____	
Information about your suppliers of qualified carbon oxide. Complete a separate Model Certificate DISP-Owner for each of your suppliers of qualified carbon oxide:		
4 Name	_____	
5 EIN	_____	
6 Name and location of qualified carbon oxide capture facility (if supplier supplied any qualified carbon oxide)	_____	
7 Type of industrial facility at which the supplier captured its qualified carbon oxide	_____	
8 Check here if you were one of the suppliers. Don't check unless the EIN of the supplier of the qualified carbon oxide is the same as the EIN of the entity that's an owner of the geologic disposal site. If the EINs aren't the same, there must be a binding written contract between the entities	<input type="checkbox"/>	
9 Unless line 8 is checked, do you attest that a binding written contract between you and the supplier exists that ensures that you will securely store the qualified carbon oxide in the manner required under section 45Q and the underlying regulations?	Yes	No
	<input type="checkbox"/>	<input type="checkbox"/>
10 Provide the date (MM/DD/YYYY) of the contract referenced in the line above or the date of the most recent amendment	_____	
11 Metric tons of qualified carbon oxide received from the supplier during the calendar year (metric tons should agree with the figure reported for you for this supplier by the project's operator in Model Certificate DISP-Operator, Table 3)	_____	
12 Metric tons of qualified carbon oxide received from the supplier and stored by you during the calendar year (metric tons should agree with the figure reported for you for this supplier by the disposal site's operator in Model Certificate DISP-Operator, Table 3)	_____	
13 Metric tons of nonqualified carbon oxide received by you during the calendar year	_____	
14 Metric tons of nonqualified carbon oxide stored by you during the calendar year (metric tons should be from Model Certificate DISP-Operator, Table 3)	_____	
15 Add lines 11 and 13. Total amount of qualified carbon oxide injected (amount should agree with the figure reported for you in Model Certificate DISP-Operator, Table 3)	_____	
16 Add lines 12 and 14. Total amount of qualified carbon oxide stored (amount should agree with the figure for you in Model Certificate DISP-Operator, Table 3)	_____	
17 Reserved for future use.		
18 Check here if you attest that the supplier of qualified carbon oxide elected to allow you to claim some or all of the carbon oxide sequestration credit attributable to their qualified carbon oxide. If you checked the box, attach a copy of Model Certificate ELECT signed by the supplier for this calendar year	<input type="checkbox"/>	
<p>Under penalties of perjury, I attest that I am an officer of the company that's the owner of the subject DISP project. I further attest that the above information is true and correct and that I have provided a signed copy of this completed certificate to each person who supplied qualified carbon oxide to my company for use at the subject DISP project during this calendar year.</p>

Model Certificate UTZ																																						

Part 1. Information About the Qualified Carbon Utilization Facility and Utilization of Carbon Oxide *(continued)*

Section 2—Information about the qualified carbon oxide supplied to the utilization facility:

6 In Table 2, provide information about all suppliers of qualified carbon oxide (COx) during the calendar year. “Qualified” COx means COx from a supplier who attests that the COx was captured at one of its qualified 45Q facilities. “Supplier” means the person who captured the qualified COx, which may differ from the company that sold the COx or physically delivered the COx to the owner of the utilization facility. If there are more than three suppliers of qualified COx to the utilization facility, prepare a separate table with all information and attach it to this model certificate.

Table 2 — Information About Suppliers of Qualified Carbon Oxide

Qualified COx supplier	Name	EIN	Name of capture facility	Location of capture facility (county, state)	IRS-issued registration number	EPA e-GGRT ID number(s)*	Check if supplier supplied any nonqualified COx
1							<input type="checkbox"/>
2							<input type="checkbox"/>
3							<input type="checkbox"/>

- 7 List all suppliers of nonqualified carbon oxide
- 8 Complete Table 3 below using information that conforms to the Life Cycle Assessment (LCA) that was approved by the Department of Energy and the IRS. If there are more than four owners of the utilization facility or three suppliers of qualified carbon oxide, prepare a separate table with all information and attach it to this model certificate.
- 9 Check here to attest that all figures in Table 3 conform to the LCA that was subject to a technical review by the DOE, and approved by the IRS
- 10 Attach a copy of the LCA approval letter from the IRS. Don't file this model certificate if you haven't received the approval letter.

Table 3 — Information About Utilization

(A) Owner or lessee of utilization facility	Name of qualified COx supplier 1			Name of qualified COx supplier 2			Name of qualified COx supplier 3			Total qualified COx from all suppliers		Total nonqualified COx from all suppliers		Sum for all COx suppliers	
	(B) Metric tons of qualified COx delivered to utilization facility	(C) Metric tons of qualified COx utilized	(D) Metric tons of qualified COx delivered to utilization facility	(E) Metric tons of qualified COx utilized	(F) Metric tons of qualified COx delivered to utilization facility	(G) Metric tons of qualified COx utilized	(H) Metric tons of COx delivered to utilization facility (add columns (B), (D), and (F))	(I) Metric tons of COx utilized (add columns (C), (E), and (G))	(J) Metric tons of COx delivered to utilization facility	(K) Metric tons of COx utilized	(L) Metric tons of COx delivered to utilization facility (add columns (H) and (J))	(M) Metric tons of COx utilized (add columns (I) and (K))

* If available.

Part I. Information About the Qualified Carbon Utilization Facility and Utilization of Carbon Oxide *(continued)*

11 If the total for column (H) is less than 25,000 metric tons, have you verified with the supplier that its facility meets the minimum capture requirements? **Yes** **No**

Part II. Information About the Life Cycle Assessment (LCA) and This Claim

- 1 Title of the LCA submitted to the Department of Energy (DOE)
- 2 Date (MM/DD/YYYY) the LCA was submitted to the DOE
- 3 Project or LCA number assigned by the DOE
- 4 Date (MM/DD/YYYY) approval letter for the utilization facility was received from the IRS
- 5 Attach a copy of the approval letter from the IRS.
- 6 State if you're applying the TD or the NPRM

Utilization Certification (continued)

Part III. Information About You and Each of Your Suppliers of Qualified Carbon Oxide

Section 1—Information about you, the owner or lessee of the utilization project:

- 1 Name
- 2 Address
- 3 EIN

Section 2—Information about all suppliers of qualified carbon oxide to you. Complete multiple model certificates if you had more than one supplier of qualified carbon oxide:

- 4 Supplier's name
- 5 Supplier's EIN
- 6 Name and location of qualified carbon oxide capture facility (if supplier supplied any qualified carbon oxide)
- 7 Type of industrial facility at which the supplier captured its qualified carbon oxide
- 8 Check here if you were one of the suppliers. Don't check unless the EIN of the supplier of the qualified carbon oxide is the same as your EIN. If the EINs aren't the same, there must be a binding written contract between the entities
- 9 Unless line 8 is checked, do you attest that a binding written contract between you and the supplier exists that ensures that you will utilize its qualified carbon oxide in the manner required under section 45Q(f)(5) and the underlying regulations? Yes No
- 10 Provide the date (MM/DD/YYYY) of the contract referenced in the line above or the date of the most recent contract amendment
- 11 Metric tons of qualified carbon oxide received from the supplier during the year and used in the process indicated on line 6 (metric tons should agree with the figure reported in Table 3)
- 12 Metric tons of the supplier's qualified carbon oxide, expressed as carbon dioxide equivalent, utilized in your facility and determined by an LCA (metric tons should agree with the figure reported in Table 3)
- 13 Metric tons of the supplier's nonqualified carbon oxide, expressed as carbon dioxide equivalent, utilized in your facility and determined by an LCA (metric tons should be part of the figure in Table 3)
- 14 Check here if you attest that the supplier of qualified carbon oxide elected to allow you to claim some or all of the carbon oxide sequestration credit attributable to their qualified carbon oxide. Attach a copy of Model Certificate ELECT signed by both you and the supplier for this year

Model Certificate UTZ

Utilization Certification (continued)

Under penalties of perjury, I attest that I am an officer of the company that's the owner of the subject utilization project. I further attest that the above information is true and correct and that I have provided a signed copy of this completed certificate to each person who supplied qualified carbon oxide to my company for use at the subject utilization facility during this year.

Signature and date signed

Model Certificate ELECT

Election Certification		2023				
Name(s) shown on return:		Identifying number:				
Part I. Information About Electing Taxpayer and Credit Claimant						
Section 1—Electing taxpayer's information from Model Certificate CF:						
1	Name	_____				
2	Address	_____				
3	TIN	_____				
4	Location of capture facility	_____				
5	Placed-in-service date of carbon capture equipment. See Rev. Rul. 2021-13, 2021-30 I.R.B. 152	_____				
6	Type of industrial facility	_____				
7a	IRS-issued registration number for each qualified facility where carbon oxide was captured	_____				
7b	EPA e-GGRT ID number(s)* of each qualified facility where carbon oxide was captured	_____				
Section 2—Information about the credit claimant. Complete a separate Model Certificate ELECT for each credit claimant (see instructions):						
8	Name	_____				
9	Address	_____				
10	TIN	_____				
11	Do you attest that the credit claimant isn't a subcontractor? If you can't answer "Yes," you can't elect to allow the credit claimant to claim any of your credit	<table border="0"> <tr> <td align="right">Yes</td> <td align="right">No</td> </tr> <tr> <td align="center"><input type="checkbox"/></td> <td align="center"><input type="checkbox"/></td> </tr> </table>	Yes	No	<input type="checkbox"/>	<input type="checkbox"/>
Yes	No					
<input type="checkbox"/>	<input type="checkbox"/>					
12	Check which statement applies:					
	a <input type="checkbox"/> Credit claimant disposed of qualified carbon oxide in secure geological storage and didn't use it as a tertiary injectant in a qualified enhanced oil or natural gas recovery project, nor utilized it in a way described in section 45Q(f)(5).					
	b <input type="checkbox"/> Credit claimant disposed of qualified carbon oxide in secure geological storage and used it as a tertiary injectant in a qualified enhanced oil or natural gas recovery project.					
	c <input type="checkbox"/> Credit claimant utilized qualified carbon oxide in a way described in section 45Q(f)(5).					
13	Location of disposal site if box 12a or 12b was checked	_____				
14a	IRS-issued registration number for each disposal site if box 12a or 12b was checked	_____				
14b	EPA e-GGRT ID number(s)* of each disposal site if box 12a or 12b was checked	_____				
15	Check which statement applies:					
	a <input type="checkbox"/> Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility on or after February 9, 2018, and before 2023, disposed of in secure geological storage, and not used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project, nor utilized in a way described in section 45Q(f)(5).					
	b <input type="checkbox"/> Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility on or after February 9, 2018, and before 2023, disposed of in secure geological storage, and used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project.					
	c <input type="checkbox"/> Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility on or after February 9, 2018, and before 2023, and utilized as described in section 45Q(f)(5).					
	d <input type="checkbox"/> Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility after 2022, during the 12-year period beginning on the date the equipment was originally placed in service, disposed of in secure geological storage, and not used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project, nor utilized as described in section 45Q(f)(5).					
	e <input type="checkbox"/> Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility after 2022, during the 12-year period beginning on the date the equipment was originally placed in service, disposed of in secure geological storage, and used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project.					
	f <input type="checkbox"/> Qualified carbon oxide captured using carbon capture equipment originally placed in service at a qualified facility after 2022, during the 12-year period beginning on the date the equipment was originally placed in service, and utilized as described in section 45Q(f)(5).					
16	<input type="checkbox"/> If box 15a, 15b, or 15c was checked, check here if you elect to claim the credit rates for equipment placed in service prior to the enactment of the Bipartisan Budget Act of 2018.					

Model Certificate ELECT

Election Certification (continued)

Section 2—Information about the credit claimant. Complete a separate Model Certificate ELECT for each credit claimant (see instructions): (continued)

- 17 Check the correct credit rate that applies to 2023 based on the boxes checked for lines 12, 15, and 16.
a \$26.94 (\$20 plus inflation for old equipment)
b \$13.47 (\$10 plus inflation for old equipment)
c \$26.94 (\$134.70**) for new equipment and qualified carbon oxide disposed of in secure storage and not used in EOR
d \$13.47 (\$67.35**) for new equipment and qualified carbon oxide disposed of in secure storage and used in EOR or utilized in a manner described in section 45Q(f)(5)
e \$40.89 for new equipment and qualified carbon oxide disposed of in secure storage and not used in EOR
f \$27.61 for new equipment and qualified carbon oxide disposed of in secure storage and used in EOR or utilized in a manner described in section 45Q(f)(5)
g \$17 (\$85**) for qualified equipment placed in service after 2022 and qualified carbon oxide disposed of in secure storage and not used in EOR
h \$12 (\$60**) for qualified equipment placed in service after 2022 and qualified carbon oxide disposed of in secure storage and used in EOR or utilized in a manner described in section 45Q(f)(5)
i \$36 (\$180**) for qualified DAC equipment placed in service after 2022 and qualified carbon oxide disposed of in secure storage and not used in EOR
j \$26 (\$130**) for qualified DAC equipment placed in service after 2022 and qualified carbon oxide disposed of in secure storage and used in EOR or utilized in a manner described in section 45Q(f)(5)

* If available.

** If prevailing wage and apprenticeship requirement are met.

Part II. Election Information

- 1 If box 12a was checked, metric tons of qualified carbon oxide captured by the Electing Taxpayer and disposed of in secure geological storage by the Credit Claimant and not used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project, nor utilized in a way described in section 45Q(f)(5) (metric tons should agree with the amount on Model Certificate DISP-Owner, line 12)
2 If box 12b was checked, metric tons of qualified carbon oxide captured by the Electing Taxpayer and disposed of in secure geological storage by the Credit Claimant and used as a tertiary injectant in a qualified enhanced oil or natural gas recovery project (metric tons should agree with the amount on Model Certificate EOR-Owner, line 12)
3 If box 12c was checked, metric tons of the Electing Taxpayer's qualified carbon oxide, expressed as carbon dioxide equivalent, utilized in the Credit Claimant's facility and determined by an LCA (metric tons should agree with the amount in Model Certificate UTZ, Part III, line 12)
4 Metric tons of qualified carbon oxide listed on line 1, 2, or 3, allowed by electing taxpayer to be claimed by the credit claimant. Based upon the box checked in Part I, line 15, electing taxpayer adds this amount to Model Certificate CF, Part III, column (a) of lines 1e, 2e, 3e, 4e, 5e, 6e, 7e, 8e, 9e, 10e, 11e, 12e, 13e, 14e, or 15e
5 2023 credit rate from line 17 of Part I
6 Multiply line 4 by line 5. Carbon oxide sequestration credit allowed by electing taxpayer to be claimed by the credit claimant. Credit claimant adds this amount to its Form 8933, line 19
7 Subtract line 4 from amount listed on lines 1, 2, or 3. Metric tons of qualified carbon oxide not allowed by electing taxpayer to be claimed by the credit claimant
8 Multiply line 7 by line 5. Carbon oxide sequestration credit retained by the electing taxpayer

Election Certification (continued)

Under penalties of perjury, I attest that I am an officer of the company that's the owner of carbon capture equipment described in Part I, lines 1 through 7. I further attest that the above information is true and correct.

Signature and date signed

Printed or typed name of person signing this report

Title

Company's name and EIN

Under penalties of perjury, I attest that I am an officer of the company that's the owner of the carbon oxide disposal, use, or utilization site described in Part I, lines 8 through 12. I further attest that the above information is true and correct.

Signature and date signed

Printed or typed name of person signing this report

Model Certificate RECAPTURE

Recapture Certification							2023	
Name(s) shown on return:							Identifying number:	
Part I. Information About the Geologic Disposal Site								
Section 1—Information about the owner(s) of the geologic disposal site:								
1 Table 1 — Information About the Owner(s) of the Geologic Disposal Site								
	2023		2022		2021		2020	
	Name, EIN, and address	Operating interest (%)	Name, EIN, and address	Operating interest (%)	Name, EIN, and address	Operating interest (%)	Name, EIN, and address	Operating interest (%)
Owner A								
Owner B								
Owner C								
Owner D								
All other owners. Attach a complete table on a separate sheet.								
Section 2—Information about the geologic disposal site or EOR project for 2023:								
2 Indicate if the project is a geologic disposal site (without EOR) or an EOR project								
3 Name and location (county and state)								
4 List the name and EIN of the person who, for purposes of Regulations section 1.45Q-2(h), is the operator of the project								
5 List any other companies that are identified as the operator of the project for any other purpose(s) and the nature of the purpose(s)								
6a IRS-issued registration number(s) for geologic disposal site								
6b EPA e-GGRT ID number(s)*								
7 When did injection of captured carbon oxide begin (MM/YYYY)?								
8 If the EOR project was previously certified under section 43, state the name of the certified project and the date (MM/DD/YYYY) of the petroleum engineer's certification								
9 If the EOR project wasn't previously certified under section 43, attach a copy of a valid petroleum engineer's certification to this Model Certificate RECAPTURE.								
Yes No								
10 Is this EOR project an enhanced natural gas recovery project?								
11–15 Reserved for future use.								
16 If the amount of sequestered carbon oxide has been determined pursuant to 40 CFR Part 98 subpart RR, attach a copy of the approved MRV plan or provide the URL of it on the EPA's website.								
17 If the amount of sequestered carbon oxide has been determined pursuant to ISO 27916, attach a copy of the ISO 27916 documentation for the calendar year. Also attach a copy of the certification by a qualified independent engineer or geologist.								
* If available.								
Model Certificate RECAPTURE								

Part II. Determination of Recaptured Qualified Carbon Oxide

- 1 List the total metric tons of qualified carbon oxide securely stored in the geologic disposal site or EOR project during 2023
- 2 Metric tons of qualified carbon oxide that, during 2023, the owner, operator, or regulatory agency determined has leaked from the containment area of the reservoir during 2023 or previous calendar years if not previously accounted for
- 3 Metric tons of qualified carbon oxide that, during 2023, the owner, operator, or regulatory agency determined has leaked from the containment area of the reservoir during 2023 or previous calendar years if not previously accounted for, and will eventually migrate to the atmosphere
- 4 If line 3 is less than line 2, attach a statement explaining how you determined that the qualified carbon oxide won't eventually migrate to the atmosphere.
- 5 Subtract line 1 from line 3. If greater than zero, a recapture event has occurred. This is the qualified carbon oxide subject to recapture. See Regulations section 1.45Q-5(d). Complete the remainder of Part II. Don't complete this model certificate if a recapture event didn't occur
- 6 Attach a statement describing the cause of the leakage of qualified carbon oxide.
- 7 Which regulatory agencies were made aware of the leakage of qualified carbon oxide?
- 8 Attach a copy of Model Certificate DISP-Operator or Model Certificate EOR-Operator for this disposal site for each of the previous THREE calendar years.
- 9 Complete Table 2 below.
- 10 In column (C), list the amount of total carbon oxide stored in each of the THREE calendar years prior to the current calendar year. This would be from Model Certificate EOR-Operator, Table 3, column (M), row (5), for each year.
- 11 In columns (E), (F), (G), (H), and (I), allocate the amount in column (D) to each owner of the geologic disposal site or EOR project for each year. Check the box if the carbon oxide was qualified. Use two columns for any owner that stored both qualified and nonqualified carbon oxide. If more columns are needed, attach a separate table that shows the allocation for all owners. You should allocate the amount of stored carbon oxide on a pro rata basis, using figures from Model Certificate EOR-Operator, Table 3, of each year, unless there is a sound engineering basis to do otherwise.
- 12 Check here if the allocation of the amounts in column (D) were done in a manner other than pro rata and attach an explanatory statement

Table 2 — Information About Stored Carbon Oxide Subject to Recapture

	(A) Year prior	(B) Year	(C) Metric tons of stored carbon oxide from Table 3 of the applicable Operator Certificate for the indicated year	(D) Stored carbon oxide subject to recapture*	Allocation of stored carbon oxide subject to recapture							
					Owner name and EIN	(E)	(F)	(G)	(H)	(I)	(J) Reserved for future use	(K) Total. Add columns (E) through (I)
					Check if carbon oxide was qualified carbon oxide	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
(1)	1st	2022										
(2)	2nd	2021										
(3)	3rd	2020										
(4)	Total. Add rows (1) through (3).											
(5)	Subtract Part II, line 5, from column (D), row (4). Metric tons of carbon oxide not subject to recapture due to look-back being limited to THREE calendar years.											

- 13 Provide a copy of Parts I and II to each owner of the disposal site or EOR project during the current and THREE previous calendar years.

Recapture Certification (continued)

Under penalties of perjury, I attest that I am an officer of the company that's the operator of the subject geologic disposal site or the subject EOR project or have been designated by the operating interest owners to prepare and submit this certificate to the IRS on their behalf. I further attest that the above qualified carbon oxide sequestration credit recapture information is true and correct.

Signature and date signed

Printed or typed name of person signing this report

Title

Company's name and EIN

TREASURY/IRS AND OMB USE ONLY DRAFT

Part III. Determination of Recaptured Qualified Carbon Oxide for Supplier

Part III will be prepared by each owner of the disposal site or EOR project during the current and THREE previous calendar years. Part III will be used to determine the amount of qualified carbon oxide sequestration credit that needs to be recaptured. A separate Part III should be completed for each supplier of qualified carbon oxide during the current and THREE previous calendar years and a copy should be given to each supplier.

Information about you, the owner of the EOR project:

- 1 Name
2 Address
3 EIN

Information about suppliers who supplied carbon oxide during any of the THREE previous calendar years. COMPLETE A PART III FOR EACH SUPPLIER:

- 4 Name
5 EIN
6 Name and location of carbon oxide capture facility
7 Type of industrial facility
8 Complete Table 5 using information from Table 3 of Model Certificate EOR for the previous THREE calendar years.

Recapture Certification *(continued)*

Table 5 — Information About Carbon Oxide Sequestration Credit Subject to Recapture by Supplier

			Supplier Name:						
(A) Year prior	(B) Year	(C) Total metric tons of stored carbon oxide from Table 2	(D) Total metric tons of stored carbon oxide subject to recapture	(E) Your amount of qualified carbon oxide subject to recapture	(F) Rate of carbon oxide sequestration credit for the year (\$/MT)	(G) Metric tons of carbon oxide for which the supplier elected to allow you to claim the carbon oxide sequestration credit (MT)	(H) Amount of carbon oxide sequestration credit for which the supplier elected to allow you to claim the carbon oxide sequestration credit (\$). Multiply column (G) by column (F).	(I) Metric tons of carbon oxide for which the supplier didn't elect to allow you to claim the carbon oxide sequestration credit (MT). Subtract column (G) from column (E).	(J) Amount of carbon oxide sequestration credit for which the supplier didn't elect to allow you to claim the carbon oxide sequestration credit (\$). Multiply column (I) by column (F).
(1)	1st	2022							
(2)	2nd	2021							
(3)	3rd	2020							
(4)	Total metric tons. Add rows (1) through (3)								
(5)	Amount of carbon oxide sequestration credit you must recapture this year for carbon oxide supplied by this supplier. Add rows (1) through (3). Add to your Form 8933, Part III, line 22								
(6)	Total metric tons. Add rows (1) through (3)								
(7)	Amount of carbon oxide sequestration credit the supplier of carbon oxide must recapture this year. Add rows (1) through (3). The supplier must add this amount to its Form 8933, Part III, line 22								

Under penalties of perjury, I attest that I am an officer of the company that's the owner of the subject geologic disposal site or the subject EOR project. I further attest that the above information is true and correct and that I have provided a signed copy of this completed recapture certificate to each person.

Paperwork Reduction Act Notice. We ask for the information on this form to carry out the Internal Revenue laws of the United States. You are required to give us the information. We need it to ensure that you are complying with these laws and to allow us to figure and collect the right amount of tax.

You are not required to provide the information requested on a form that is subject to the Paperwork Reduction Act unless the form displays a valid OMB control number. Books or records relating to a form or its instructions must be retained as long as their contents may become material in the administration of any Internal Revenue law. Generally, tax returns and return information are confidential, as required by section 6103.

The time needed to complete and file this form will vary depending on individual circumstances. The estimated burden for individual and business taxpayers filing this form is approved under OMB control number 1545-0074 and 1545-0123 and is included in the estimates shown in the instructions for their individual and business income tax return. The estimated burden for all other taxpayers who file this form is shown below.

Recordkeeping	11 hr., 43 min.
Learning about the law or the form	2 hr., 9 min.
Preparing and sending the form to the IRS	3 hr., 39 min.

If you have comments concerning the accuracy of these time estimates or suggestions for making this form simpler, we would be happy to hear from you. See the instructions for the tax return with which this form is filed.
