Agent

Agent Required

Ports

The Arrival Report (currently named Preliminary Entry, but will be changed by the tie of release) will be the 1<sup>st</sup> step for most vessel scenarios.

At the top of each page it indicates what step of the process they are on and information about the vessel (automated from the eNOAD/APIS transmission), the Fee history (not yet integrated), and the vessel's certificates (which the agent will be responsible for uploading).

The "Agent" field will be auto-populated based on their ACE log-in. This field aligns with the CBP form 3171 and 1300

Additional Remarks

---

You must resolve 4 error(s) in this form in order to submit.

They will be able to indicate if the service provided will occur on overtime or leave blank.

Many vessel agents are aware of the local port's operating hours.

This aligns with the regulations on the CBP form 3171.

They can then Submit the data to CBP once complete or Save it as a Draft.

After filing the Arrival Report they can then File an Entrance

Any data that was populated on the Arrival Report will carry over to the Entrance, which can be updated, if necessary.

They will provide the actual Arrival Date and Time, indicate whether the tonnage mark is submerged or not, and what the operating draft is.

These fields align with the CBP form 1300.

<span>↑</span> Upload Data <span>?</span>			At least one entry required

The Cargo Operations selected in the Arrival Report are carried over to the Entrance. Corresponds to the CBP form 1300.

The Crew count is carried over from the Arrival Report. Corresponds to the CBP form 1300.

The vessel agent is then able to add line items for the Vessel's Stores and Crew's Effects or they can upload a spreadsheet (a template will be available for the user to prepare and upload). Replaces the CBP form 1303 and 1304 respectively.

The vessel agent can apply for certain exemptions if they believe they are eligible. This will be automated in the future based on the data available to CBP. This is currently determined manually by the CBPO.

The vessel agent can outline any additional requests or remarks prior to Saving or Submitting.

After submitting the Entrance, the vessel agent can then submit the Clearance.

U.S. vessels do not require an Entrance prior to Clearance, since they are based in the U.S. and may not have an Entrance prior to needing to Clear.

The vessel agent information is carried over from the Arrival Report, along with the Port itinerary information and will allow the vessel agent to update the next port, if needed.

Vessel agent will update the operating draft at the time of expected departure and declare if the vessel is departing in ballast or took bunkers while in the U.S. This aligns with the CBP form 1300.

Bunkers  
(Required)

           Barrels of Marine Gas Oil, valued at \$            USD  which is of foreign origin

           Barrels of Marine Diesel Oil, valued at \$            USD  which is of foreign origin

Last saved on Saturday, Oct 30th at 10:31 am.

The departing crew and passenger counts will be pulled automatically from the departure eNOAD transmission and the vessel agent will be able to update, if necessary.

They will be able to include any additional remarks or requests prior to saving or submitting.

## \* | Special Permits

### Request to Unlade Cargo

- Not Original Destination
- Jones Act Exception

### Request To Lade Cargo

- Prematurely Landed
- Empty Containers Or Stevedoring Equipment
- Overcarried

### Request To Retain Cargo

- Emergent Situation
- Denied Foreign Entry
- Inaccessibly Stowed
- Overcarried

At any point between the Arrival Report, Entrance, or Clearance the vessel agent can request Special Permits.

All special permits are either outlined specifically by regulation or covered by other regulations and defined by CBP policy.

Permits are typically requested via the CBP form 3171, email, fax, and phone.

This capability will centralize and maintain records of all special permit requests.

After requesting Special Permits, they will have the ability to provide any additional requests or remarks in a remarks field prior to saving or submitting.
