

methylenedioxyamphetamine from the drug testing panel, because the number of positive specimens reported by HHS-certified laboratories does not support testing all specimens for MDA and MDMA in Federal workplace drug testing programs. Information provided to the Department through the NLCP in 2021 and 2022 shows the positivity rate for MDMA ranges from 0.001 to 0.003%, and a review of the results indicate that >25% of the positive specimens are likely agency blind samples. MDA has a lower positivity rate than MDMA and both have lower positivity rates than phencyclidine (PCP). SAMHSA also considered removing PCP but decided against this change. While PCP has an overall positivity rate nearly as low as MDMA, there are regional differences in positivity, with some areas of the country having much higher rates, so PCP remains a regulated test analyte. Because MDA and MDMA are Schedule I drugs, a Federal agency may test specimens for these analytes in accordance with Section 3.2 of the UrMG and OFMG (*i.e.*, on a case-by-case basis for reasonable suspicion or post-accident testing, or routinely with a waiver from the Secretary). The Division of Workplace Programs welcomes public comment prior to the DTAB meeting regarding the removal of MDA and MDMA from the Urine and Oral Fluid Analyte Table. SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency's (FEMA's) Homeland Security Grant Program (HSGP) supports state and local efforts to prevent terrorism and other catastrophic events and to prepare the Nation for the threats and hazards that pose the greatest risk to the security of the United States. The HSGP provides funding to implement investments that build, sustain, and deliver the 32 core capabilities essential to achieving the National Preparedness Goal of a secure and resilient Nation. The building, sustainment, and delivery of these core capabilities are not exclusive to any single level of government, organization, or community, but rather, require the combined effort of the whole community. The HSGP supports core capabilities across the five mission areas of Prevention, Protection, Mitigation, Response, and Recovery based on allowable costs. HSGP is comprised of three grant programs: State Homeland Security Program (SHSP), Urban Area Security Initiative (UASI), and Operation Stonegarden (OPSG). Together, these grant programs fund a range of activities, including planning, organization, equipment purchase, training, exercises, and management

and administration across all core capabilities and mission areas. The authorizing authority of the HSGP is section 2002 of the Homeland Security Act of 2002 (Pub. L. 107-296) (*See* 6 U.S.C. 603-609, *as amended*).

This revision of the information collection removes the OPSG Daily Activity Report, FEMA Form FF-207-FY-21-113 (formerly 089-0-27) that was created at the behest of CBP to fulfill CBP's requirements under OPSG and is only used to collection information from the public by CBP. FEMA has previously included this instrument under this collection as a service to CBP, but including an instrument used by CBP under a collection granting FEMA the authority to collect information does not provide the proper service to CBP, FEMA or the public.

Abstract: The Homeland Security Grant Program (HSGP) is an important tool among a comprehensive set of measures to help strengthen the Nation against risks associated with potential terrorist attacks. FEMA uses the information to evaluate applicants' familiarity with the national preparedness architecture and identify how elements of this architecture have been incorporated into planning, operations, and investments at the regional, state and local levels. Together, these grants fund a range of preparedness activities, including planning, organization, equipment purchase, training, exercises, and management and administration costs.
