om Quarter 4 results for the discrepancy report year.

Description
Comparison of Active systems in the SDWIS And WFRS databases
Comparing populations for each systems between SDWIS and WFRS databases
Comparing Counties Served by CWS in SDWIS and WFRS
Checking the total CWS Population for each County versus the US Census population for that County
Summary overview of the different Fluoridation Statuses
List of all Natural CWS sorted by the last time the Natural Fluoride Concentration was updated in WFRS
List of Natural CWS that have a Natural Fluoride Concentration that is too high or too low for that Fluoridation Status design
Comparion of Adjusting systems in SDWIS And WFRS
List of all Adjusting systems in WFRS sorted by the last time Operational Data was entered for the system
List of all Adjusting systems number of months that have entered Operational data for the year of the DR (so 2020 for this
List of all Multisource and Variable systems in WFRS for this state
Contact information fore each CWS as it appears in WFRS and SDWIS
State information about My Waters Fluoride, including if they have opted in, and if so the point of contact
