<sup>1</sup> This indicator was added to better characterize the distribution of contacts and referrals among individuals. This is not directly referenced in grantee NOFOs.

<sup>2</sup> This indicator was added to ensure consistency with 988 State/Territory Reporting, which distinguishes emergency rescues that include law enforcement and those that do not include law enforcement. While this is not directly referenced in grantee NOFOs, it is in alignment with language requiring grantees to report the number of contacts resulting in emergency rescues.

<sup>3</sup> This indicator was added to capture the consistency with which risk assessments are completed during each contact or the outcomes of this risk assessment. While this is not directly referenced in grantee NOFOs, it is in alignment with language requiring grantees to report “risk assessment and outcome for each contact with an enrolled individual.”
