

EXHIBIT B. Examples that show different versions of Chart 1 (monthly covered prescriptions), Chart 1A (Supplemental Coverage), and Chart 2 (yearly spending totals)

The examples in this exhibit illustrate some of the main variations in model language for Chart 1, Chart 1A and Chart 2 of the Model Part D Explanation of Benefits (EOB) for a fictional enrollee. This section shows the monthly list of prescriptions filled by a plan member and summarizes the monthly and yearly spending totals.

These examples use numbers for the year 2025 and placeholders for the names of drugs. All examples use 2024 benefit parameters¹ where 2025 benefit parameters are not yet available and will be updated in the final version.

Example 1: Deductible payment stage, no payments from plan or others2

Example 2: Initial coverage stage, with LIS, payments from plan and Extra Help or another organization.....3

Example 3: Using a separate chart for Supplemental Drug Coverage5

Example 4: Using “notes” on Chart 1 to show changes to the formulary7

Examples 5 & 6: Chart 2 for yearly spending totals9

Example 3:

Using a separate chart for Supplemental Drug Coverage

Example 3 shows a version of Chart 1A, which shows prescriptions covered under the plan's Supplemental Drug Coverage. This chart follows Chart 1.

Showing a separate chart for prescriptions covered under the plan's Supplemental Drug Coverage helps reduce potential confusion by emphasizing that payments for these prescriptions do not count toward members' Out-of-Pocket Costs or Total Drug Costs.

NOTE: When Chart 1A is included in an EOB, the following sentence is added to the first bulleted point in the introductory section of Chart 1: "(Prescriptions for drugs covered by our plan's Supplemental Drug Coverage are shown separately in Chart 1A)."

CHART 1A

Your prescriptions for drugs covered by your plan’s Supplemental Drug Coverage: March 2025

Your Supplemental Drug Coverage pays for some drugs not generally covered by Medicare. Any prescriptions you filled for these drugs this month are listed in the chart below. **The amounts paid for these drugs do *not* count toward your Out-of-Pocket Costs or Total Drug Costs.**

Drug Name, Fill Date, Pharmacy, Rx#	You Paid	Plan Paid	Other Payments
[insert name of first drug], 0.5 mg 03/01/25, ABC Pharmacy Rx# 106663421555, 30 day supply	\$47	\$153	\$0
Totals for the month of March 2025	\$47	\$153	\$0

Example 4: Using “notes” on Chart 1 to show changes to the formulary

Example 4 shows how explanatory notes are used in Chart 1. These notes can provide additional information about a prescription, such as notes that highlight general price increases for that drug, or when a payment for a drug does not count toward Out-of-Pocket Costs, or the drug is only partially covered because it is a compound drug that includes non-Part D drugs. The plan may also suggest lower-cost alternatives that a member and their doctor might consider in this section.

Examples 5 & 6: Chart 2 for yearly spending totals

Examples 5 and 6 illustrate differences in the wording of the text that explains the yearly total amounts. These examples are for plan members who have no supplemental drug coverage. Each is in a different payment stage:

- Example 5 shows a version of Chart 2 for a plan member without LIS who is in the deductible payment stage. This member receives no payments from the plan or from third parties.
- Example 6 shows a version of Chart 2 for a plan member with LIS who is in the initial coverage period. This member receives payments from the plan and from Extra Help (these payments count toward Out-of-Pocket Costs).
