## DATA TYPE/ FIELD LENGTH KEY:

This column is composed of two parts: (1) the data type, which is represented by a two letter code, and (2) a number, which represents the maximum length of a response for that element. This means that an "IN 1" element with 4 options (1,2,3,4) can only report one of those 4 options, but an "IN 4" element with 4 options can report any combination of those 4 (e.g. 124, 13, 4, etc).

## Data Type Codes:

AN = AlphaNumeric, aka numbers and letters allowed, sometimes called a text field

IN = Integer, only whole numbers allowed

DT = Date, typically dates are best reported yyyymmdd to simplify sorting/ordering

DE = Decimal floating point, used for numeric values where a decimal point is needed, such as a wage/earnings value
