

instruments under this new generic collection for use across FEMA's grant programs. These instruments will replace the current quarterly performance reporting that does not have a standard format.

Grant performance reporting is a Federal requirement; standardized instruments under this generic collection will serve as the minimum performance reporting requirement for all programs. FEMA grants will collect both performance and project effectiveness measures via the required instruments under this new generic collection. Each FEMA grant program will collect only relevant, useful data. FEMA will utilize a standard framework under this generic collection but will not require each program to create the same end-product. Programs will tailor grant performance reporting instruments based on the grant's specific objectives, activities, indicators, targets, and reporting measures most appropriate for each program's funding objectives. Instruments under this generic collection are not intended to replace all existing information collection instruments that are programmatic or statutorily specific (*i.e.*, existing grant specific reporting).

Collection of Information

Title: Generic Clearance for FEMA's Standardized Grants Performance Reporting.

Type of Information Collection: New information collection.

OMB Number: 1660–NW170.

FEMA Forms: Not Applicable.

Abstract: Performance reporting is required for recipients of Federal Emergency Management Agency (FEMA) grants. However, the scope and detail of previous performance reporting varied across different FEMA grant programs. FEMA is changing its programmatic reporting to facilitate better data collection. The instruments under this generic collection will satisfy the minimum performance reporting requirement for all programs while introducing a common performance reporting framework. Individual grant programs will use this framework as a starting point and then develop tailored program-specific instruments based on the program's objectives, activities, indicators, and targets. Each FEMA grant program will collect only relevant, useful data. Performance data is used by FEMA to track recipient progress, monitor project execution, evaluate program outcomes, and respond to requests from Congress.

Agency Information Collection Activities: Proposed Collection, Comment Request; Generic Clearance for Hazard Mitigation Assistance Programs

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 60-Day notice of new collection and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public to take this opportunity to comment on a new information collection. In accordance with the requirements of the Paperwork Reduction Act of 1995, this notice seeks comments concerning a new generic information collection allowing FEMA to individually update instruments needed to provide financial, non-financial, program management, and technical assistance for FEMA's major disaster, emergency response, emergency recovery, and hazard mitigation activities.

DATES: Comments must be submitted on or before February 9, 2024.

ADDRESSES: To avoid duplicate submissions to the docket, please submit comments at <http://www.regulations.gov> under Docket ID FEMA–2023–0031. Follow the instructions for submitting comments.

All submissions received must include the Agency name and Docket ID. Regardless of the method used to submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at <http://www.regulations.gov>, and will include any personal information you provide. FOR FURTHER INFORMATION CONTACT: Jennie Orenstein, Branch Chief, FEMA's Federal Insurance and Mitigation Administration's Policy, Tools and Training Branch, at jennie.gallardy@fema.dhs.gov or (202) 212–4071. You may contact the Information Management Division for copies of the proposed collection of information at email address: FEMA-Information-Collections-Management@fema.dhs.gov.

SUPPLEMENTARY INFORMATION: The Robert T. Stafford Disaster Relief and Emergency Assistance Act (Pub. L. 93–288, as amended), 42 U.S.C. 5121–5207 (Stafford Act) provides broad authority to FEMA for disaster and emergency relief operations, reducing risk to people and property from hazards, and related activities and operations. The Stafford Act authorizes FEMA to provide financial and technical assistance to assist state, local, territorial, and Tribal (SLTT) governments and certain private non-profit (PNP) entities with the response to and recovery from Presidentially declared major disasters and emergencies, and the

implementation of hazard mitigation measures and related activities that reduce or eliminate long-term risk to people and property from hazards and their effects.

The National Flood Insurance Act of 1968 (“NFIA”), as amended, and the Flood Disaster Protection Act of 1973, as amended (42 U.S.C. 4001, et. seq.) authorize FEMA’s National Flood Insurance Program (NFIP), including a wide range of related activities. For instance, the NFIA authorizes FEMA to provide financial assistance for planning and carrying out projects and activities designed to reduce the risk of flood damage to NFIP-insured structures.

FEMA routinely receives additional guidance from Congress, through new legislation, and the President, through Executive Orders, that requires changes to previously approved collection instruments in a few months to provide timely assistance to survivors. FEMA is proposing moving instruments from currently approved information collections into this new generic information collection to provide the necessary flexibility to update individual existing instruments and create new instruments as new guidance from Congress and the President is received, deliver timely assistance to survivors (both before and after a disaster), and maintain compliance with the Paperwork Reduction Act.
