

NVDOT's and Brightline West's DSWP further explains that over 95 percent of the total direct dollar expenditures for the Project would be spent on domestically sourced products and labor, including 100 percent of the civil infrastructure costs. In addition, the Project is expected to support approximately 35,000 domestic jobs across the construction period and includes a project labor agreement (PLA). The operator has reached an agreement with rail labor which may result in ongoing operations and maintenance work being performed by union labor.⁶ The DSWP further explains efforts Brightline West would take to facilitate, where feasible, a ramp up in domestic production capabilities for the materials that are not currently produced in the United States on future high-speed rail projects in the United States.

In the absence of a waiver, NVDOT and Brightline West argue that the Project could not be delivered within the planned schedule and budget because there is no domestic supplier for the components listed above. To ensure safety of the system, Brightline West expects to conform with FRA's Passenger Equipment Safety Standards governing Tier III equipment,⁷ which allows for service-proven high-speed rail technologies from around the world (in this case Europe) to be introduced to the United States with minimal modification.

For example, the high-speed rolling stock aluminum car shells are critical to the achievement of high speeds, due to aluminum's strength and light weight, and it has taken decades of development in technology by highly specialized experts that can shape, mold, and weld these car shells to the required safety and quality standards, including crashworthiness. There is currently no available aluminum car shell manufacturer in the United States, and it would take years to establish a domestic, quality-controlled manufacturing capability. The relatively small size of the Project's order (ten trainsets) is also not considered by the applicant to be sufficient to justify the significant capital investments required to initiate development of domestic production capacity for those products.

In its request for a waiver, NVDOT and Brightline West explain how they conducted due diligence and performed thorough market research to adequately

consider qualifying alternate items, products, or materials. Brightline West engaged with both Alstom and Siemens to determine the systems that could be manufactured domestically. These efforts included considering options for the establishment of either temporary or permanent manufacturing facilities, alternative manufacturing processes, and system design. In addition, Brightline West conducted market research to identify a domestic supplier for high-speed turnout and fire alarm components. However, Brightline West was unable to identify a domestic supplier for the rolling stock, signal systems, turnout, and fire alarm components.

VII. Proposed Waiver

Based on its review of the waiver request and DSWP, FRA proposes to waive its Buy America requirements for the following components for the Project:

- The infrastructure components listed above in Section V(c); and the rolling stock components listed in either:
 - Section V(a), if Siemens is selected as the preferred supplier; or
 - Section V(b), if Alstom is selected as the preferred supplier.

The proposed waiver would apply only to components listed above for use in the Project, as described in the grant agreement between FRA and NVDOT. FRA is not proposing to waive any requirements under BABA, as the proposed waiver does not apply to any construction materials used in the Project. The proposed waiver would not apply to other FRA grantees or to other grants that might be made to NVDOT or Brightline West for other projects (including any future phases related to the Project).

VIII. Request for Comment

FRA will consider comments received during the comment period, consistent with BABA and 2 CFR 184.7. FRA may consider comments received after this period to the extent practicable. Consistent with 49 U.S.C. 22905(a)(4), if FRA determines it is necessary to waive its Buy America requirements, FRA will publish its decision in the **Federal Register** and provide an opportunity for public comment on such finding for a reasonable period of time not to exceed 15 days. After such period, FRA's decision will be effective.

Issued in Washington, DC.

Amitabha Bose,
Administrator.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. FRA-2023-0002-N-36]

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of information collection; request for comment.

SUMMARY: Under the Paperwork Reduction Act of 1995 (PRA) and its implementing regulations, FRA seeks approval of the Information Collection Request (ICR) summarized below. Before submitting this ICR to the Office of Management and Budget (OMB) for approval, FRA is soliciting public comment on specific aspects of the activities identified in the ICR.

DATES: Interested persons are invited to submit comments on or before February 9, 2024.

ADDRESSES: Written comments and recommendations for the proposed ICR should be submitted on regulations.gov to the docket, Docket No. FRA-2023-0002. All comments received will be posted without change to the docket, including any personal information provided. Please refer to the assigned OMB control number (2130-0533) in any correspondence submitted. FRA will summarize comments received in a subsequent 30-day notice and include them in its information collection submission to OMB for approval.

FOR FURTHER INFORMATION CONTACT: Ms. Arlette Mussington, Information Collection Clearance Officer, at email: arlette.mussington@dot.gov or telephone: (571) 609-1285, or Ms. Joanne Swafford, Information Collection Clearance Officer, at email: joanne.swafford@dot.gov or telephone: (757) 897-9908.

SUPPLEMENTARY INFORMATION: The PRA, 44 U.S.C. 3501-3520, and its implementing regulations, 5 CFR part 1320, require Federal agencies to provide 60 days' notice to the public to allow comment on information collection activities before seeking OMB approval of the activities. See 44 U.S.C. 3506, 3507; 5 CFR 1320.8 through 1320.12. Specifically, FRA invites interested parties to comment on the following ICR regarding: (1) whether the information collection activities are necessary for FRA to properly execute its functions, including whether the activities will have practical utility; (2) the accuracy of FRA's estimates of the

⁶ In March 2023, thirteen rail unions representing more than 160,000 workers signed a Memorandum of Understanding with Brightline West, establishing a commitment for the use of highly skilled union labor required to operate and maintain the System.

⁷ See 49 CFR part 238.

burden of the information collection activities, including the validity of the methodology and assumptions used to determine the estimates; (3) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (4) ways for FRA to minimize the burden of information collection activities on the public, including the use of automated collection techniques or other forms of information technology. See 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1).

FRA believes that soliciting public comment may reduce the administrative and paperwork burdens associated with the collection of information that Federal regulations mandate. In summary, comments received will advance three objectives: (1) reduce reporting burdens; (2) organize information collection requirements in a “user-friendly” format to improve the use of such information; and (3)

accurately assess the resources expended to retrieve and produce information requested. See 44 U.S.C. 3501.

The summary below describes the ICR that FRA will submit for OMB clearance as the PRA requires:

Title: Qualification and Certification of Locomotive Engineers.

OMB Control Number: 2130–0533.

Abstract: Section 4 of the Rail Safety Improvement Act of 1988, Public Law 100–342, 102 Stat. 624 (June 22, 1988), later amended and re-codified by Public Law 103–272, 108 Stat. 874 (July 5, 1994), required FRA to issue regulations to establish any necessary program for certifying or licensing locomotive engineers. The collection of information is used by FRA to ensure that railroads employ and properly train qualified individuals as locomotive engineers and designated supervisors of locomotive engineers (DSLEs).

The collection of information is used by FRA to verify that railroads have established required certification programs for locomotive engineers and that these programs fully conform to the standards specified in the regulation.

In this 60-day notice, FRA makes adjustments that increased the burden hours from 23,964 to 23,969 hours. This increase is a result of a correction of rounding errors from the previous submission and in the number of estimated qualified DSLEs and locomotive engineers as required under 49 CFR 240.201 and 240.221.

Type of Request: Extension without change (with changes in estimates) of a currently approved collection.

Affected Public: Businesses (Railroads).

Form(s): N/A.

Respondent Universe: 784 Railroads.

Frequency of Submission: On occasion; annually; triennially.

REPORTING BURDEN

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. FRA–2023–0002–N–38]

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of information collection; request for comment.

SUMMARY: Under the Paperwork Reduction Act of 1995 (PRA) and its implementing regulations, FRA seeks approval of the Information Collection Request (ICR) summarized below. Before submitting this ICR to the Office of Management and Budget (OMB) for approval, FRA is soliciting public comment on specific aspects of the activities identified in the ICR.

DATES: Interested persons are invited to submit comments on or before February 26, 2024.

ADDRESSES: Written comments and recommendations for the proposed ICR should be submitted on *regulations.gov* to the docket, Docket No. FRA–2023–0002. All comments received will be posted without change to the docket, including any personal information provided. Please refer to the assigned OMB control number (2130–0597) in any correspondence submitted. FRA will summarize comments received in a

subsequent 30-day notice and include them in its information collection submission to OMB for approval.

FOR FURTHER INFORMATION CONTACT: Ms. Arlette Mussington, Information Collection Clearance Officer, at email: *arlette.mussington@dot.gov* or telephone: (571) 609–1285, or Ms. Joanne Swafford, Information Collection Clearance Officer, at email: *joanne.swafford@dot.gov* or telephone: (757) 897–9908.

SUPPLEMENTARY INFORMATION: The PRA, 44 U.S.C. 3501–3520, and its implementing regulations, 5 CFR part 1320, require Federal agencies to provide 60 days' notice to the public to allow comment on information collection activities before seeking OMB approval of the activities. See 44 U.S.C. 3506, 3507; 5 CFR 1320.8 through 1320.12. Specifically, FRA invites interested parties to comment on the following ICR regarding: (1) whether the information collection activities are necessary for FRA to properly execute its functions, including whether the activities will have practical utility; (2) the accuracy of FRA's estimates of the burden of the information collection activities, including the validity of the methodology and assumptions used to determine the estimates; (3) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (4) ways for FRA to minimize the burden of information collection activities on the public,

¹ Throughout the tables in this document, the dollar equivalent cost is derived from the 2022 Surface Transportation Board Full Year Wage A & B data series using the appropriate employee group to calculate the average hourly rate that includes 75 percent overhead.

² Total burden hours are divided equally for each requirement 14.75 + 14.75 = 84.84 hours.

³ Total burden hours are divided equally for each requirement 29.42 + 29.42 = 84.84 hours.

⁴ Total burden hours are divided equally for each requirement 550 + 550 = 84.84 hours.

⁵ Totals may not add up due to rounding.
