

## 2024 Conservation Effects Assessment Project Respondent Booklet

Through the Conservation Effects Assessment Project (CEAP), you have the opportunity to help measure and document the benefits and outcomes of voluntary implementation of conservation practices on cultivated croplands, including those funded through federal conservation programs. CEAP provides an accurate and reliable measurement of voluntary conservation implementation to keeping America's working lands healthy and productive.

You are among a small group of farmers and ranchers who are being asked to participate in this year's CEAP survey. A field on your operation was selected as part of a sample of land areas used for agriculture. Sometime between now and March 2025, a representative with the National Agricultural Statistics Service (NASS) will contact you and ask you to provide information about this field, how it is used and what, if any, conservation practices are employed on it.

The information gathered through CEAP will be combined with data from other sources to create a complete picture of conservation and environmental management conditions across the United States. The results will help USDA, farm organizations, policymakers and others to better quantify the benefits and outcomes achieved through voluntary conservation implementation, including efforts funded by federal conservation programs.

**Your participation is vital.** Your responses will help ensure that the benefits and outcomes of federal conservation programs are understood and that these programs are strengthened and expanded to benefit future generations.

**Your survey response is confidential.** The information you provide will be used for statistical purposes only. In accordance with federal law, your responses will be kept confidential and will not be disclosed in identifiable form.

Thank you for your participation and support of our programs and U.S. agriculture. If you have questions about the survey, please contact us at 888-424-7828 or visit [https://www.nass.usda.gov/Surveys/Guide\\_to\\_NASS\\_Surveys/Conservation\\_Effects\\_Assessment\\_Project/index.php](https://www.nass.usda.gov/Surveys/Guide_to_NASS_Surveys/Conservation_Effects_Assessment_Project/index.php).
