Traceable Opioid Material® Kits (TOM Kits®)

The Centers for Disease Control and Prevention (CDC) has developed **Traceable Opioid Material® Kits (TOM Kits®)** to support laboratory detection of current and emerging opioids in the U.S. The following TOM Kits® are available from Cayman Free or charge in qualified labs.

Fentanyl Analog Screening (FAS) Kit & Emergent Panels

The FAS Kit and its companion panels (Emergent Panels Versions 1, 2, & 3) are control analog screening standard materials that enable labs to screen for 250 synthetic opioid compounds, including more than 100 emerging opioids.

FAS Kit - Emergent Drug Panel (EDP)

The FAS Kit - Emergent Drug Panel (EDP) expands testing laboratory capabilities to the detection and identification of additional emerging drugs of abuse that are commonly found as co-drugs in fentanyl-containing samples. The FAS Kit - EDP includes 40 stimulants, hallucinogens, benzodiazepines, synthetic cannabinoids, and the veterinary sedative and analgesic drug xylazine. This panel is distinct from the previous FAS Kit and FAS Kit - Emergent Panels as it does not contain any fentanyl compounds or other synthetic opioids.

To view the entire list of compounds covered in these kits, please download this [PDF](#) (PDF).

Eligibility Requirements

Labs that perform drug testing or analysis may apply for free FAS Kits if they meet the following requirements:

Must be located in the U.S. or a U.S. Territory with a verifiable business address.

Hold a valid DEA controlled substance registration for Schedule I controlled substances.

To start the application process for a new DEA controlled substance registration, go to <https://www.deadiversion.usdoj.gov/cfs/registration/index.cfm#start>

For additional guidance, contact DEA's Registration Call Center at 1-800-852-7079 or visit DEA's web site. A description of the registration process and a link to DEA's field office search tool can be found at <https://www.deadiversion.usdoj.gov/cfs/registration/index.cfm>

FAS Kit Application

To be considered for FAS Kits, please ensure your lab meets the eligibility requirements listed above and complete the kit application below. Once your application has been reviewed, a member of our team will contact you with further instructions.

If you need the FAS Kit materials in a different format, please email Sales@CaymanChemical.com to outline how these materials could be better supplied.

EDP™, FAS™, TRACEABLE OPIOID MATERIAL®, and TOM KITS® are registered marks of the U.S. Department of Health and Human Services.

CDC estimates the average public reporting burden for this collection of information as 4 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB Control Number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC-ARTS, Division of Information Collection Review Office, 3525 Office Road NE, MS D-74, Atlanta, Georgia 30333, ATTN: IRMS (D020-1122).

Which of the following best describes your laboratory?

☐ Academic Research Laboratory

☐ Environmental Laboratory

☐ Government Crime Laboratory

☐ Government Toxicology Laboratory

☐ Private or Public Clinical Laboratory

☐ Other (please specify)

Which of the following tests or services are performed by your laboratory? (Select all that apply)

☐ Solid drug sample testing

☐ Post-mortem toxicology sample testing

☐ Workplace drug screening

☐ Newborn drug screening

☐ Drug pharmacology and pharmacokinetics research

☐ Clinical testing for disease diagnosis and treatment

☐ Other (please specify)

Which of the following drug categories does your laboratory test for? (Select all that apply)

☐ Opioids

☐ Synthetic Cannabinoids

☐ Stimulants and Hallucinogens

☐ Benzodiazepines

On average, how many opioid-related samples does your laboratory analyze on a weekly basis?

☐ 0 - 100

☐ 100 - 500

☐ 500 - 1000

☐ 1000 - 5000

Which of the following analytical techniques do you perform in your laboratory? (Select all that apply)

☐ Immunoreactive

☐ Infrared Spectrometry

☐ Mass Spectrometry

☐ Nuclear Magnetic Resonance Spectrometry

☐ Raman Spectrometry

☐ X-ray Diffraction

☐ Chromatography, Separation

☐ UV-Vis

☐ Other (please specify)

Which matrix type does your laboratory analyze? (Select all that apply)

☐ Blood

☐ Urine

☐ Drug Presiders

☐ Waste Water

☐ Other (please specify)
